1-2-3 Blocks Attachment Hardware Kit

This hardware allows for joining blocks together with all hardware buried within the blocks. The hardware is also slightly smaller than the holes allowing edges and faces to be joined together with faces being flush with each other.

Order No. 630-4044

Hardware Kit Includes:

4 PCS Dowels;
4 PCS M6 threaded dowels;
2 PCS M6 70mm Allen screws;
4 PCS M6 30mm Allen screws;
1 PCS Hex key;
1 PCS M4 threaded knob

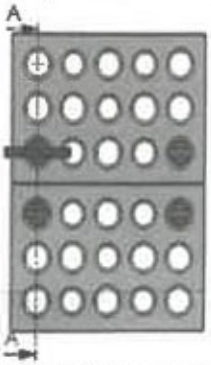
1-2-3 Blocks and Attachment Hardware Kit

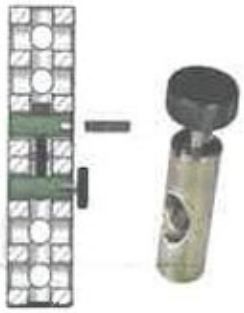
Can be used as 2-4-6 blocks, cheaper and lighter

Hardened steel precision-all six sides ground to ±.0001" squareness per inch. The 3/8" through holes are arranged for mounting and conversion into angle plates and various other inspection or production set-ups. Weight: 4.5 lbs

Order No. 630-4043

Kit includes:





Using this hardware allows two blocks to be attached to each other in literally every possible configuration.

1-2-3 Blocks Attachment Hardware Kit

To use, insert a through hole dowel into a block hole and thread a screw through the hole. Next, insert a threaded dowel with the M4 threaded knob into a hole in another block and screw and tighten the screw into this nut to secure the two blocks together. Each dowel has a straight screwdriver slot in line with the hole to assist in getting the dowels perfectly lined up to accept the bolts. An M4 thread knob can be inserted in the thread dowel to help in getting the dowels lined up to accept the screws.
