Welcome to LittleMachineShop.com...

...the premier source of machines, tooling, parts, and accessories for bench top machinists.

We focus on best-in-class machines and we offer tools, accessories, and replacement parts for:

- Bench top lathes
- Bench top milling machines
- Small band saws

Products we support are sold by LittleMachineShop.com, Grizzly Industrial, Harbor Freight Tools, Micro-Mark, Busy Bee Tools, and others. Besides the products shown in this catalog, we have virtually every replacement part for the mini lathes, mini mills, and micro mills sold by these companies.

Visit our website at www.littlemachineshop.com to see large, full-color pictures along with more products and more information than we can fit in this catalog.

Check our website at www.littlemachineshop.com for current prices. Prices are subject to change without notice.

HiTorque Mills and Lathes from LittleMachineShop.com

HiTorque machines from LittleMachineShop.com are designed to be “best-in-class” offerings that provide more power, greater capacity, and more features than similarly sized machines from other vendors.

It all starts with the HiTorque drive system, which is powered by a brushless DC motor and controller. The wound stator and permanent magnet rotor provide virtually constant torque over the entire speed range. RPM feedback from the motor to the controller helps insure constant speed through varying loads.

By contrast, the conventional wound rotor DC motor and PWM controller card used in most other bench top mills and lathes require provide two speed ranges (selected by changing gears) to enhance low speed torque because the output torque of a DC drive like this falls off as the motor speed is reduced.

Compared with the standard SIEG drive, the brushless DC drive in the HiTorque mills and lathes have greater torque, especially at low speeds. Compare the typical torque curves.

The HiTorque drive lets you take deeper cuts at all speeds, and the low speed torque makes slow-speed operations like parting off significantly easier. Because of the nearly linear torque curve, the HiTorque drive does not need 2-speed gears. There is one continuous speed range. This means there are no gears to shift and no plastic gears to break.

All HiTorque mills include these features, many of which you won’t find on competitive machines:

- R8 spindle for wide tool availability (2 MT on 4700)
- 0.001” graduated dials, 0.100” per turn
- Solid rectangular column for rigidity
- Dovetail column to maintain head alignment at any height
- E-stop safety power switch
- Fine feed on Z-axis for precise control
- NSK brand Japanese-quality spindle bearings
- Adjustable gibs on all dovetail ways

Unique features of HiTorque lathes from LittleMachineShop.com include (besides the all-important HiTorque drive system) a cam-lock tailstock, genuine NSK spindle bearings, and extended threading capabilities.

Tooling Packages and Accessories

At LittleMachineShop.com, we offer much more than machines. For each of our mills and lathes, we offer tooling packages that include everything you need to get started with a new machine. Tooling packages offer tremendous savings over buying individual items, and you know that every part of the tooling package will work with your new machine.

Each mill tooling package includes an appropriately sized:

- Precision vise and mounting kit
- Thin parallels set
- 1-2-3 blocks
- Clamping kit
- Collet set
- End mill set
- Center drills
- Edge and center finder
- T-slot cleaner

Lathe tooling packages include:

- Quick change tool post set (for lathes that don’t already have one)
- Indexable turning tools
- Boring bar
- Center drills
- Cut-off blade
- Drill chuck and arbor

For some machines, we offer more than one tooling package, with the higher priced packages including more pieces (for example, more end mill sizes) and higher quality components.

For complete details on the tooling packages, look in the Contents (the page opposite this one) for Kits > Mill Starter Kits and Kits > Lathe Starter Kits.

We also offer stands designed specifically for these machines. Find them in this catalog under Machines > Stands/Cabinets.
HiTorque Mills

HiTorque Large Bench Mill, Models 6700/6750  NEW FOR 2020!

The LittleMachineShop.com HiTorque Large Bench Mill is our largest mill - a significant step up in size, rigidity, and power compared to a mini mill, or even our bench mill. This benchtop mill provides a larger table (29.1" x 7.1", or 740 mm x 180 mm), more travel, and more horsepower.

The HiTorque Large Bench Mill incorporates a true quill and drill press-style handles for easy drilling. A button on the end of each handle reverses the spindle for easy tapping. Other features include:

- Spindle speed display
- Resume running at last-used spindle speed
- Magnetic “tool box” on column for convenient storage
- Digital position readout on quill reads in inches and mm

6750 HiTorque Deluxe Large Bench Mill has all the features of the 6700 large bench mill plus:

- Power head lift raises or lowers the mill head with the touch of a button
- 3-axis digital readout (DRO) with Bluetooth and 7” tablet display
- Electrically interlocked spindle lock for easy, safe tool changes

6700 HiTorque Large Bench Mill $3099.00; 6750 HiTorque Large Bench Mill, Deluxe $4099.00

HiTorque Bench Mill, Models 6500/6550  NEW FOR 2021!

The LittleMachineShop.com HiTorque Bench Mill provides a larger table, more travel, and more horsepower than a mini mill. The 23.4" x 5.5" (595 mm x 140 mm) table on the 6500 bench mill provides a large work area. And the extra-long 27.6" x 6.3" (700 mm x 160 mm) table on the 6550 deluxe bench mill is huge! A 750 watt (1 hp) brushless DC motor provides abundant spindle power and tremendous low-end torque.

Like the HiTorque Large Bench Mill, the HiTorque Bench Mill has a true quill and drill press-style handles for easy drilling and a reverse button on each handle reverses to make tapping easy. Also:

- Tapping mode for reversing taps out
- Solid rectangular column for rigidity
- Spindle speed display
- Includes ½” capacity drill chuck and arbor

6550 HiTorque Deluxe Bench Mill has all the features of the 6500 bench mill plus:

- Extra-long table 27.6" x 6.3” (700 mm x 160 mm)
- 3-axis digital readout (DRO) with Bluetooth and 7” tablet display
- Electrically interlocked spindle lock
- Machined aluminum handwheels

6500 HiTorque Bench Mill $1899.95; 6550 HiTorque Bench Mill, Deluxe $2669.95

HiTorque Mini Mill, Models 3990/4190

The LittleMachineShop.com HiTorque Mini Mill offers best-in-class features: more power, more torque, and a larger table than competitors’ mills. It has our exclusive solid column for extra rigidity. And it includes one of the most popular upgrades for our earlier mills: an air spring to support the mill head, which provides greater support for the head and increased travel on the Z-axis. The 500 Watt brushless spindle drive motor provides tremendous low-end torque. And you can vary the speed from 100 RPM to 2500 RPM continuously. There are no gears to shift. With no gears, the HiTorque Mini Mill is the quietest in its class.

The large mill table provides 50% more table area than other mini mills. It also has 30% more travel in each direction. The resettable feed dials allow you to zero them at any point.

The HiTorque Mini Mill has drill press handles for drilling and fast motion of the mill head. It also has Z-axis fine feed with 0.001” resolution for milling operations.

4190 HiTorque Deluxe Mini Mill has all the features of the 3990 mini mill plus:

- 3-axis digital readout (DRO) with Bluetooth and 7” tablet display
- Electrically interlocked spindle lock
- Machined aluminum handwheels

3990 HiTorque Mini Mill $1149.95; 4190 HiTorque Mini Mill, Deluxe $1799.95
HiTorque Micro Mill, Model 4700

Like its big brothers, the best-in-class LittleMachineShop.com HiTorque Micro Mill has more power, more torque, and a larger table than competitors’ micro mills.

The 250 Watt brushless spindle drive motor provides tremendous low-end torque. And you can vary the speed from 100 RPM to 5000 RPM continuously. There are no gears or belts to shift, making it convenient and quiet. The large mill table provides 50% more width than other micro mills. The resettable feed dials allow you to zero them at any point.

The HiTorque Micro Mill has a drill press handle for drilling. It also has Z-axis fine feed with 0.001” resolution for milling operations.

Other features include:
- #2 Morse Taper spindle
- Solid, non-tilting column for great rigidity
- Adjustable Z-axis stop for repetitive drilling
- Includes 3/8” capacity drill chuck and arbor

4700 HiTorque Micro Mill $849.95

HiTorque Lathes

HiTorque 8½” x 20” Bench Lathe, Models 7500/7550

NEW FOR 2020!

The LittleMachineShop.com 8½”x20” HiTorque Bench Lathe is the best in its class. No other lathe in this size offers power cross feed. The 1000 Watt brushless spindle drive motor provides tremendous low-end torque, with speed continuously variable from 100 RPM to 2000 RPM in both directions. There are no gears to shift.

All the gears on this lathe are metal.

- Power longitudinal feed and power cross feed
- Genuine NSK ball bearings
- Induction hardened bed ways
- Cam lock tailstock

7550 HiTorque Deluxe Bench Lathe has all the features of the 7500 bench lathe plus:

- AXA quick change tool post (QCTP) set with five tool holders
- Digital readout (DRO) displays on compound rest and cross slide
- Anodized aluminum hand wheels, knobs, and levers

Improved splash guard
Modified compound rest to better accommodate QCTP

7500 HiTorque 8½”x20” Bench Lathe $2199.95; 7550 HiTorque 8½”x20” Bench Lathe, Deluxe $3199.95

HiTorque 7”x16” Mini Lathe, Models 5100/7350

The LittleMachineShop.com HiTorque Mini Lathe the most power, most torque, and more features than competitors’ mini lathes.

The 500 Watt brushless spindle drive motor provides tremendous low-end torque. And you can vary the speed from 50 RPM to 2500 RPM continuously in both directions without shifting gears.

Extended threading capabilities let you can create every American Standard Unified class 2A inch screw thread from 4 to 80 threads per inch and, with the extra 21 tooth change gear that is included, every American Standard Metric class 6h thread from 0.3 to 8 mm pitch.

The lathe includes a chip tray, a backsplash guard, and spreaders to give the feet a broader stance.

- 4” 3-jaw chuck
- Rear apron shield to keep swarf out of the mechanism
- Cam lock tailstock
- Reversible lead screw for right and left hand threads

7350 HiTorque Deluxe Mini Mill adds an all-steel wedge-style quick change tool post set with five tool holders; digital readout (DRO) displays on the compound rest, cross slide, and tailstock; and metal hand wheels with chrome levers.

5100 HiTorque 7”x16” Mini Lathe $949.95; 7350 HiTorque 7”x16” Deluxe Mini Lathe $1249.95

SIEG X2D Mini Mill

The SIEG X2D Mini Mill has all the features you want at an incredibly low price.

This mill has a solid column that does not tilt, which is significantly stiffer than the tilting column on other low-cost mini mills.

The large mill table provides 50% more table area than other mini mills. It also has 30% more travel in each direction.

The X2D Mini Mill has drill press handles for drilling and fast motion of the mill's head. It also has Z-axis fine feed with 0.001" resolution for milling operations.

- 350 Watt variable speed DC drive
- R8 Spindle for wide tool availability
- Air spring provides greater support for the mill head and increased travel on the Z-axis
- Solid column mount for greater rigidity
- Includes ½” capacity drill chuck and arbor

4962 SIEG X2D Mini Mill $699.95

SIEG C3 7”x14” Mini Lathe

The SIEG C3 7x14 Mini Lathe has all the features you want at an incredibly low price.

A full 14" bed length with a cam-lock tailstock accommodates longer work pieces.

Real top and bottom half-nuts and a reversible 16 TPI lead screw provide extended threading capability. You can create every American Standard Unified class 2A inch screw thread from 4 to 80 threads per inch, and you can create every American Standard Metric class 6h thread from 0.3 to 8 mm pitch.

The cross feed and compound rest dials are graduated in 0.001" and 0.025 mm. The lathe is equipped with a 4-way indexing tool post set for 5/16" (8 mm) tools.

The lathe includes a chip tray, a backsplash guard, and a threading dial.

- Includes 3” 3-jaw chuck, 2 sets of jaws, and chuck key
- Variable speed 350 Watt spindle motor with two speed ranges for low speed torque
- Digital spindle speed readout
- Cam-lock tailstock
- Zero-settable hand wheels graduated in 0.001” on cross slide and compound rest
- Rear apron shield to keep swarf out of the mechanism
- Extended threading capability - inch and metric threads
- Four-way turret tool post
- Reversible lead screw for right and left hand threads

4959 SIEG C3 7”x14” Mini Lathe $749.95

Band Saws

4x6 Horizontal / Vertical Band Saw, Model 5300

This 4" x 6" capacity horizontal / vertical band saw has automatic shutoff at the end of the cut when in the horizontal position. The saw is floor standing on the included stand.

The vertical position allows for freehand cutting of large, thin work pieces.

In the horizontal position the vise can be set from 90° to 45° for angle cuts. The saw has adjustable down pressure and automatic shutoff for unattended operation. There is a work stop for repetitive cuts at the same dimension.

The saw has three speeds and comes with a 14 TPI blade.

5300 4x6 Horizontal / Vertical Band Saw $349.95

Bench Top Band Saw, Model 4829

This small bench top band saw for sale is perfect for the small shop. It's got the capacity of larger floor-standing saws but takes a fraction of the space. The cast iron vise swivels for angle cuts.

The two speed motor makes it great for ferrous and non-ferrous metals. It's quieter and more accurate than chop saws. You can remove the saw from the base and configure it for portable use.

The double-chain drive makes this table top band saw more rugged than the competition.

4829 Bench Top Band Saw $249.95

Drill Presses

13" Bench Top 16-Speed Drill Press, Model 5540

This is a versatile drill press for the home shop. With 13" swing and 16 speeds it can handle materials from wood, plastic, and most metals, including stainless steel. The 3/4 horsepower motor lets you drill up to 1/2" holes in steel at one pass. The 16 spindle speeds range 220 to 3600 RPM.

The large round table tilts 45 degrees either way and raises and lowers with a rack and pinion. There is an adjustable depth quill stop with a gage.

Included are a 5/8" drill chuck with key, a drill chuck arbor to fit the 2 Morse taper spindle, and a drift key for chuck removal from the spindle.

5540 13" Bench Top 16-Speed Drill Press, $299.00

10" Bench Top 12-Speed Drill Press, Model 5530

With a 10" swing and 12 speeds this drill press can handle materials from wood, plastic, and most metals, including stainless steel. The 1/2 horsepower motor lets you drill up to 3/8" holes in steel at one pass. The 12 spindle speeds range from 300 to 2900 RPM.

The large table tilts 45 degrees either way and raises and lowers with a rack and pinion. There is an adjustable depth quill stop with a gage.

Included are the 1/2" drill chuck with key, a 2 Morse taper drill chuck arbor, and a drift key for chuck removal from the spindle.

5530 10" Bench Top 12-Speed Drill Press, $159.95
CNC Machines: Accessories

3414 Jog Dial for CNC Machines $94.95
- The ideal Mach3 accessory
- Fully configurable
- USB interface
- Setup software included
- Complete jog pendant

The Z-Bot Jog Dial II replaces the hand cranks on CNC mills. The Z-Bot Jog Dial II is a USB jog pendant controller developed to work in conjunction with the popular Mach3 CNC control software. It is supplied with an installation disc that contains a Mach3 custom plug-in. The Jog Dial II is highly flexible, easy to use, requires minimal configuration, and does not use any parallel port pins.

The Jog Dial II USB controller has an inner and outer dial. Used for rapid coarse positioning, the outer dial will jog progressively faster, up to the full jog speed configured in Mach3, as the dial is turned further to the right or left of the center detent. The outer dial springs back to center position when released. Used for fine positioning, the inner dial jogs the machine one step increment, as configured in Mach3. Four buttons are used to select the axis to jog. The fifth button is easily configured for a variety of Mach3 functions using the plug-in supplied.

CNC Machines: CNC Lathes

5045 Lathe CNC, Tormach 15L Slant Pro $15,260.00
- 15" Diameter swing over bed
- 3 HP Spindle (up to 3500 RPM)
- D1-4 Nose with removable SC taper Insert
- 25" Carriage
- Conversational programming

The Tormach 15L Slant-PRO™ is a compact CNC slant-bed lathe designed for prototyping and light production work. With highly configurable options and upgrades, the Tormach 15L Slant-PRO™ is a multipurpose CNC lathe for the small shop. This CNC lathe for sale can be accessorized with a wide array of tool changing and work holding options, including gang, quick change, or fully automatic tool changing, collet closers, etc. The available spindle speed range and horsepower make it well suited to automatic tool changing, collet closers, etc. The available spindle speed range and horsepower make it well suited to automatic tool changing, collet closers, etc.

CNC Machines: CNC Milling Machines

5980 Milling Machine CNC, Tormach 1100M $14,241.00
- Tormach 1100M 3-Axis CNC Mill and Stand
- PathPilot® Controller and Control System
- 7.500 RPM R8 Spindle
- Travel: 18.0" x 11.0" x 16.25" (X, Y, Z-Axis)
- Enhanced Y-Axis Travel and Spindle Motor from the 1100 Series 3

With its ability to cut challenging materials like titanium as well as softer materials such as aluminum, plastic and wood, the Tormach 1100M PCNC Mill is an immensely flexible. It has a small footprint (typically 56" x 48" x 88" with stand) and ability to run continuous machining, industry standard G-code compliance and built-in Dropbox™ support for seamlessly transferring programs.This starter package includes the Tormach 1100M PCNC Mill, PathPilot® controller, chip pan, standard LCD monitor, waterproof mini keyboard, jog shuttle controller, 5" CNC Vise, manual operator set (inch), cutting stool starter set, cable kit, 1 gallon machine way oil, and 1-year Autodesk Fusion license.

Collets and Chucks: 3C Collets

2244 Collet Closer, 7x10, 7x12 $111.85
- 3C collet closer for 7x10 and 7x12 mini lathes
- Includes a 3 Morse taper to 3C collet adapter and a drawtube assembly

The adapter is precision ground to minimize runout. Drawtube is 3/4" in diameter and allows 7/16" material to pass through. See the Compatibility tab for machines that work with this product. Ships from factory without a handwheel handle. See related products for handle parts.

2240 Collet Adapter, 3MT to 3C $62.19
2374 Collet Closer, 7x14 Mini Lathe $112.45
2728 Collet Closer, Universal $113.18

CNC Machines: Accessories

5349 Milling Machine CNC, Tormach 440 Starter Package $7,195.00
- PCNC 440 Milling Machine & Chip Pan
- PathPilot® Controller and Control System
- 10,000 RPM R8 Spindle
- Travel: 10" x 6.25" x 10" (X, Y, Z-Axis)
- TTS Tooling, 4" CNC Vise and Cutting Tools

A machine that fits all-around capability in a compact and affordable package, the PCNC 440 is perfect for anybody that wants to do real cutting but doesn’t have a lot of space. The typical footprint of the PCNC 440 is 42" x 36" (1067 mm x 914 mm) which allows for bench top use or mounting on the optional stand. The PCNC 440 offers high-performance bipolar stepper motors with Leadshine micro stepping drivers. It also incorporates rolled 27 ball screws with anti-backlash double ball nuts. It has a cast iron frame and table with hand-scraped hydrodynamic ways and tapered adjustment gibs. The way surfaces are low friction PTFE-filled Acetyl bonded sliding surfaces similar to Rulon® and Teflon®. The PCNC 440 is rated to cut aluminum, steel, titanium, as well as plastics, composites, wood, and PCB boards. This starter package includes the Tormach 440 PCNC Mill, PathPilot® controller, chip pan, standard LCD monitor, waterproof mini keyboard, jog shuttle controller, 4" CNC Vise, manual operator set (inch), cutting stool starter set, cable kit, 1 gallon machine way oil, and 1-year Autodesk Fusion license.

5977 Milling Machine CNC, Tormach 770M $13,113.75
- Tormach 770M 3-Axis CNC Mill and Stand
- PathPilot® Controller and Control System
- 10,000 RPM R8 Spindle
- Travel: 14" x 7.5" x 13.2" (X, Y, Z-Axis)
- TTS CNC Operator set and 5" CNC Vise

With its ability to cut challenging materials like titanium as well as softer materials such as aluminum, plastic and wood, the Tormach 770M PCNC Mill is an immensely flexible. It has a small footprint (typically 56" x 48" x 88" with stand) and ability to run on standard Vac, single-phase household power. Its R8 spindle has a top speed of 10,000 RPM X-Y- and Z-Axis travel of 14" x 7.5" x 13.2". Additionally, the 770M has numerous add-on accessories such as an automatic tool changer (not included in starter package) which make the 770M Ideal for short-run production jobs. The 770M utilizes the PathPilot® control software which is user-friendly, supports up to 4-axis of continuous machining, industry standard G-code compliance and built-in Dropbox™ support for seamlessly transferring programs.

This starter package includes the Tormach 770M Compact 3-Axis CNC mill with PathPilot® controller, stand, controller arm, lifting bar, backspash kit, 5" CNC vise, TTS CNC operator set, standard LCD monitor, waterproof mini keyboard, waterproof mouse, 1-gallon machine way oil, and 1-year Autodesk Fusion license.

5978 Milling Machine CNC, Tormach 770M $11,848.00
- Tormach 770M 3-Axis CNC Mill and Stand
- PathPilot® Controller and Control System
- 10,000 RPM R8 Spindle
- Travel: 14" x 7.5" x 13.2" (X, Y, Z-Axis)
- TTS CNC Operator set and 5" CNC Vise

With its ability to cut challenging materials like titanium as well as softer materials such as aluminum, plastic and wood, the Tormach 770M PCNC Mill is an immensely flexible. It has a small footprint (typically 56" x 48" x 88" with stand) and ability to run on standard Vac, single-phase household power. Collets and Chucks: 3C Collets

1991 Collet Set, 3C, Set of 7
$109.95
- Set of seven 3C round collets range in size from 1/8” to 1/2” by 16ths
- Includes 1/8”, 3/16”, 1/4”, 5/16”, 3/8”, 7/16” and 1/2”
- Made of high grade tool steel
- Hardened and ground to close tolerance
- Externally threaded
The thru bore of the collets is 0.467”. The 1/2” collet is bored to 1/2” by 0.66” deep. All the other collets will pass the full material size through the length of the collet.

4678 Collet, 3C, 1/8” $15.95
4679 Collet, 3C, 3/16” $15.95
4680 Collet, 3C, 1/4” $15.95
4681 Collet, 3C, 5/16” $15.95
4682 Collet, 3C, 3/8” $15.95
4683 Collet, 3C, 7/16” $15.95
4684 Collet, 3C, 1/2” $15.95

Collets and Chucks: 5C Collets

3190 Collet Block Set, 5C Hex and Square
$64.95
- Holds standard 5C collets
- Economical indexing for 2, 3, 4, and 6 divisions
- Easy cross drilling at 60°, 90° and 120°
- Made of hardened tool steel
- Ground square and parallel within 0.0005” all over
This set includes five pieces, the square block, the hexagonal block, two quick acting rings and the lever operated collet closer.
5C collets have a range of 1/16” to 1-1/16”.

3047 Collet Chuck, 5C Collets
$339.95
- Plain back collet chuck mounts like a lathe chuck
- 5” (130 mm) diameter
- 1/16” to 1 1/8” capacity with appropriate collets
- Through hole is 1.231”
This 5C collet chuck mounts with three holes for M8 cap screws. They are through drilled and counterbored for bolting on from the front. The registration inset is 95 mm in diameter. Put this 5C collet holder to the test today.

3619 Collet Chuck, 5C
$6.95
- Fully threaded adjustment screw
- Thread size: 3/8”-24
- Speeds up repetitive work
- Overall length 3.94” (100 mm)
- Shaft threading 2.20” (56 mm)
Collet stops eliminate push-back of the workpiece and provide a consistent locating surface to ensure each part is indexed to the same depth. The stop rod is easily adjustable.

4662 Collet Set, 5C, Set of 69
$495.95
- Set of 69 5C round collets range in size from 1/16” to 1-1/8” by 64ths
- Made of high grade tool steel
- Hardened and ground to close tolerance
- Internally threaded for a work stop
3842 Collet Set, 5C, Set of 17
$129.95
4664 Collet Set, 5C, Set of 33
$239.95
1708 Collet Set, 5C, Set of 6
$41.90

Collets and Chucks: 7BS Collets

2992 Collet Set, 7BS, Set of 7
$97.65
- Set of seven Brown & Sharpe 7 round collets
- Hardened and precision ground
- 3/8”-16 drawbar thread
- 0.0008” (0.02 mm) maximum runout
- Overall length is 3.15”
Set of seven Brown & Sharpe round collets to fit spindles with a Brown & Sharpe taper. This set ranges from 1/8” to 1/2” by 16ths (1/8”, 3/16”, 1/4”, 5/16”, 3/8”, 7/16”, and 1/2”). These collets are made from high-grade tool steel and are precision ground and hardened. Maximum runout is 0.0008” (0.02 mm). Drawbar thread is 3/8”-16, the width at the top is 0.725” and the width at the bottom is 0.600”. Overall length is 3.15”.
2992 Collet, 7BS, 1/8” $13.95
2993 Collet, 7BS, 3/16” $13.95
2994 Collet, 7BS, 1/4” $13.95
2995 Collet, 7BS, 5/16” $13.95
2996 Collet, 7BS, 3/8” $13.95
2997 Collet, 7BS, 7/16” $13.95
2998 Collet, 7BS, 1/2” $13.95

Collets and Chucks: Brown & Sharpe Collets

2999 Collet Set, 7BS, Set of 7
$97.65
- Set of seven Brown & Sharpe 7 round collets
- Hardened and precision ground
- 3/8”-16 drawbar thread
- 0.0008” (0.02 mm) maximum runout
- Overall length is 3.15”
Set of seven Brown & Sharpe round collets to fit spindles with a Brown & Sharpe taper. This set ranges from 1/8” to 1/2” by 16ths (1/8”, 3/16”, 1/4”, 5/16”, 3/8”, 7/16”, and 1/2”). These collets are made from high-grade tool steel and are precision ground and hardened. Maximum runout is 0.0008” (0.02 mm). Drawbar thread is 3/8”-16, the width at the top is 0.725” and the width at the bottom is 0.600”. Overall length is 3.15”.
2992 Collet, 7BS, 1/8” $13.95
2993 Collet, 7BS, 3/16” $13.95
2994 Collet, 7BS, 1/4” $13.95
2995 Collet, 7BS, 5/16” $13.95
2996 Collet, 7BS, 3/8” $13.95
2997 Collet, 7BS, 7/16” $13.95
2998 Collet, 7BS, 1/2” $13.95

Collets, 5C Individual Sizes

4593 Collet, 5C, 1/16” $7.95
4594 Collet, 5C, 1/8” $7.95
3670 Collet, 5C, 3/16” $7.95
3476 Collet, 5C, 1/4” $7.95
4595 Collet, 5C, 5/16” $7.95
3477 Collet, 5C, 3/8” $7.95
4596 Collet, 5C, 7/16” $7.95
3478 Collet, 5C, 1/2” $7.95
4597 Collet, 5C, 9/16” $7.95
3479 Collet, 5C, 5/8” $7.95
4598 Collet, 5C, 11/16” $7.95
3480 Collet, 5C, 3/4” $7.95
4599 Collet, 5C, 13/16” $7.95
3481 Collet, 5C, 7/8” $7.95
4600 Collet, 5C, 15/16” $7.95
3482 Collet, 5C, 1” $8.95

5479 Mount, 5C for 3 Jaw Lathe Chucks, 4” $39.95
- 4” adapter
- 5C adapter body
- 3 hole chuck mounting pattern is pre-drilled
- Hardened and ground
- 84mm Lathe chuck bolt circle diameter
5C adapter with standard internal and external threads.

5478 Mount, 5C for 3 & 4 Jaw Lathe Chucks, 3” $36.95

Collets and Chucks: ER Collets

1112 Collet Chuck, Rotary Table, ER-32, 80 mm Diameter $79.95
- Collet Chuck for Rotary Tables
- Fits tables with 8 mm T-Slot
- 80 mm Outside Diameter
This 80 mm diameter ER-32 collet chuck clamps directly to a rotary table with an 8 mm T-Slot. T-Slot nuts, bolts and top brackets are included. The collet chuck holds standard ER-32 collets. View our related products for links to rotary tables, ER Collets and a three Nut Bench.

1111 Collet Chuck, Rotary Table, ER-25, 80 mm Diameter $69.95

2289 Collet Holder, ER-32 Rotating, Aluminum $55.00
- Holds 18 ER-32 collets
- Can be mounted anywhere
- Made from anodized aluminum, red finish
- Easy rotation for quick accessibility
- Durable material for heavy use
Rotating rack allows for quick and easy access to 18 ER-32 collets. This carousel, made from red anodized aluminum, can be mounted anywhere. Ease of rotation makes collet size selection quick and easy.

5844 Collet Nut, ER-16 $11.47
- Holds ER16 collets
- Internal thread M22 x 1.5
- Outside diameter 1.1" (28 mm)
- Tightening diameter 0.98" (25 mm)
- Black oxide finish
Collet nut for ER-16 collets and micro mills with an ER-16 Spindle like the HiTorque Micro Mill. Holds ER-16 collets and has an internal thread of M22 x 1.5. The outside diameter is 1.1" (28 mm) with a tightening diameter of 0.98" (25 mm) across the flats. The collet nut has a black oxide finish. Collet must be assembled into a collet chuck nut before inserting into the collet chuck.

3407 Collet Nut, ER-32 $19.95
- Fits ER-32 collet chucks
This is an M-type M40-1.5 ER-32 collet chuck nut.

4702 Collet Set, ER-16, Set of 6 $70.38
- Set of 6 ER-16 collets, sizes 1/16" to 3/8" by sixteenths
- Made of high grade tool steel
- Major diameter 0.67" (17.0 mm)
- Length 1.08" (27.5 mm)
- Set Range 0.04" - 0.393" (1.0 mm - 10 mm)
Set of six ER-16 collets sizes 1/16", 1/8", 3/16", 1/4", 5/16", and 3/8". This set of ER-16 collets provides the basics you need for the Tormach Tooling System ER-16 collet holder. They'll also work great in a Taig mill equipped with the ER-16 spindle. ER-16 collets have a major diameter of 0.67" (17.0 mm) and a length of 1.08" (27.5 mm). The collets in this set have a clamping range of 0.04" - 0.393" (1.0 mm - 10 mm). ER collets are made from high grade tool steel, hardened and ground to close tolerance. Kerf cuts allow the collet to expand and contract as needed within the specific clamping range to securely hold the tool or workpiece. Collet must be assembled into a collet chuck nut before inserting into the collet chuck.

2442 Collet Set, ER-20, Set of 3 $36.95
- Includes 1/8", 1/4" and 3/8" collets
- Made of high grade tool steel
- Major diameter 0.83" (21 mm)
- Length 1.24" (31.5 mm)
- Set Range 0.12" - 0.393" (3.0 mm - 10 mm)
Set of three ER-20 collets sizes 1/8", 3/16" and 1/4". This set of ER-20 collets provides the basics you need for the Tormach Tooling System ER-20 collet holder. ER-20 collets have a major diameter of 0.83" (21 mm) and a length of 1.24" (31.5 mm). The collets in this set have a clamping range of 0.12" - 0.393" (3.0 mm - 10 mm). ER collets are made from high grade tool steel, hardened and ground to close tolerance. Kerf cuts allow the collet to expand and contract as needed within the specific clamping range to securely hold the tool or workpiece. Collet must be assembled into a collet chuck nut before inserting into the collet chuck.

2662 Collet Set, ER-25, Set of 15 $179.95
- Set of 15 ER-25 round collets
- Made of high grade tool steel
- Major diameter 1.02" (26 mm)
- Length 1.34" (34 mm)
- Range 0.04" - 0.629" (1.0 mm - 16.0 mm)
Set of 15 ER-25 collets. Sizes include: 1/16", 3/32", 1/8", 3/16", 7/32", 1/4", 5/32", 11/32", 3/8", 13/32", 7/16", 1/2", 17/32", 9/16", and 5/8". ER-25 collets have a major diameter of 1.02" (26 mm) and a length of 1.34" (34 mm). The collets in this set have a clamping range of 0.04" - 0.629" (1.0 mm - 16.0 mm). ER collets are made from high grade tool steel, hardened and ground to close tolerance. Kerf cuts allow the collet to expand and contract as needed within the specific clamping range to securely hold the tool or workpiece. Collet must be assembled into a collet chuck nut before inserting into the collet chuck.

2559 Collet Set, ER-32, Set of 18 $203.95
- Set of 18 ER-32 collets sizes 3/32" to 3/4"
- Made of high grade tool steel
- Major diameter 1.30" (33 mm)
- Length 1.57" (40 mm)
- Range 0.08" - 0.787" (2.0 mm - 20.0 mm)
Set of 18 ER-32 collets. Sizes include: 3/32", 1/8", 3/16", 7/32", 1/4", 5/32", 11/32", 3/8", 13/32", 7/16", 1/2", 17/32", 9/16", 5/8", 21/32", 11/16", 23/32", and 3/4". ER-32 collets have a major diameter of 1.30" (33 mm) and a length of 1.57" (40 mm). The collets in this set have a clamping range of 0.08" - 0.787" (2.0 mm - 20.0 mm). ER collets are made from high grade tool steel, hardened and ground to close tolerance. Kerf cuts allow the collet to expand and contract as needed within the specific clamping range to securely hold the tool or workpiece. Collet must be assembled into a collet chuck nut before inserting into the collet chuck.

2558 Collet Set, ER-32, Set of 11 $132.95

2557 Collet Set, ER-32, Set of 6 $74.95

5666 Collet Set, ER-40, Set of 24 $269.95
- Set of 24 ER-40 round collets 1/8" to 1"
- Made of high grade tool steel
- Major Diameter 1.62" (41.15 mm)
- Length 1.85" (46 mm)
- Range 0.04" - 0.629" (1.0 mm - 16.0 mm)
Set of 24 ER-40 collets. Sizes include: 1/8", 3/16", 7/32", 1/4", 5/16", 11/32", 3/8", 13/32", 7/16", 1/2", 17/32", 9/16", 5/8", 21/32", 11/16", 23/32", 3/4", 25/32", 13/16", 27/32", 7/8", 15/16", 31/32", and 1". ER-40 collets are 1.62" (41.15 mm) maximum diameter and 1.81" (46 mm) long. The collets in this set have a clamping range of 0.04" - 0.629" (1.0 mm - 16.0 mm). ER collets are made from high grade tool steel, hardened and ground to close tolerance. Kerf cuts allow the collet to expand and contract as needed within the specific clamping range to securely hold the tool or workpiece. Collet must be assembled into a collet chuck nut before inserting into the collet chuck.
### Collets, ER-11 Individual Sizes
- Hardened and ground to close tolerance
- Made of high grade tool steel
- Major diameter 0.45” (11.5 mm)
- Length 0.71” (18.0 mm)
- Range of ER-11 collets 1/32” to 1/4” (0.5 mm to 7.0 mm)

ER-11 collets have a major diameter of 0.45” (11.5 mm) and a length of 0.71” (18 mm). They have a clamping range of 1/32” to 1/4” (0.5 mm to 7.0 mm). ER collets are made from high grade tool steel, hardened and ground to close tolerance. Kerf cuts allow the collet to expand and contract as needed within the specific clamping range to securely hold the tool or workpiece. *Collet must be assembled into a collet chuck nut before inserting into the collet chuck.

Collets and Chucks: R8 Collets

- 3/8”-16 internal drawbar thread
- Made of high grade tool steel
- Hardened and ground to close tolerance
- Overall length is 3.39” (86 mm)

Set of eleven #3 Morse taper round collets. Made of high grade tool steel these collets have been hardened and ground to close tolerance. Includes sizes: 1/8”, 3/16”, 1/4”, 5/16”, 3/8”, 7/16”, 1/2”, 9/16”, 11/16”, and 3/4”. 3 Morse taper collets fit spindles with a Morse taper. The drawbar thread is 3/8”-16 and the overall length is 3.39” (86 mm).

| Collet Set, 3MT, Set of 11 | $139.35 |

Collet Holder, R8 Rotating

- Holds 11 R8 collets
- Can be mounted anywhere
- Made from durable ABS plastic
- Easy rotation for quick accessibility
- Low Price - Great for small shops

Rotating R8 collet rack allows for quick and easy access to 11 R8 collets. This carousel, made from durable ABS plastic, can be mounted anywhere. At the low price, buy multiple racks for large R8 collet sets.

| Collet Holder, R8 Rotating, Aluminum | $55.00 |

Collet Set, R8 Metric, Set of 10

- Set of ten R8 round collets in metric sizes
- Hardened and ground to close tolerance
- Made of high grade tool steel
- 7/16”-20 drawbar thread

Set of ten R8 round collets to fit spindles with a R8 taper. Metric sizes included: 3, 4, 5, 6, 8, 10, 12, 14, 16, and 20 mm. Collets are made from high-grade tool steel and are precision ground and hardened. Maximum runout is 0.0007” (0.018 mm). Drawbar thread is 7/16”-20.

| Collet Set, R8 Metric, Set of 10 | $64.95 |

Collet Set, 3MT, Set of 13, Professional Grade

- Set of thirteen R8 round collets
- Hardened and ground to close tolerance
- Made of high grade tool steel
- 7/16”-20 drawbar thread
- 0.0005” (0.013 mm) maximum runout

Set of 13 professional grade R8 round collets to fit spindles with a R8 taper. Set includes sizes 1/8” to 7/16” by 16ths (1/8", 3/16", 1/4", 5/16", 3/8", 7/16", 1/2", 9/16", 11/16", 3/4", 13/16", and 7/8”). These are high precision professional grade collets with a maximum runout of 0.0005” (0.013 mm). Collets are made from high-grade tool steel and are precision ground and hardened.

| Collet Set, R8, Set of 13, Professional Grade | $124.95 |
## Coolant Systems: Cutting Compounds

- Safe for people
- Safe for materials
- Safe for the environment
- Safe for machines

Kool Mist 77 coolant is highly recommended for mist cooling any metal or alloy where tougher machine conditions require greater lubricity. It is particularly useful where the material is very abrasive.

Improves metal cutting, milling, turning, drilling, grinding, and sawing.

You can also use Kool Mist 77 as a flood coolant.

Kool Mist 77 is 100% synthetic and biodegradable, and meets the requirements of OSHA & EPA. This coolant will not cause rancidity or buildup and creates no rust or corrosion when diluted with clean water. Workpieces and machine parts remain clean and unstained.

Mix this Kool Mist coolant concentrate with 32 parts water before use. Makes over 4 gallons of coolant.

## Coolant, DuraKut 9000B, Gallon

- Non-toxic, Non-hazardous
- One premixed gallon
- Works well with Fogbuster and other Misting systems
- Ok to use with all metals
- Extends the life of machining tools

This is a moderate duty nearly dry machining fluid, designed for mist units. It works great with the Fogbuster unit. DuraKut 9000B machine coolant can be applied using mist systems or other minimum quantity lubrication setups. It may be used in a variety of metalworking applications including sawing, milling, and tapping.

## Coolant, Kool Mist 77, Gallon

- 100% synthetic and biodegradable
- Extends tool life
- Improves tool life and controls chip welding
- Safe and odorless
- Spray top for easy application

Kool Mist 77 is 100% synthetic and biodegradable, and meets the requirements of OSHA & EPA. This coolant will not cause rancidity or buildup and creates no rust or corrosion when diluted with clean water. Workpieces and machine parts remain clean and unstained.

Mix this Kool Mist coolant concentrate with 32 parts water before use. Makes over 4 gallons of coolant.

Coolant Systems: Flood Systems

4551 Coolant Hose Set, Modular, 1/4" ID $8.95
- 12" length of 1/4" ID modular coolant hose
- 1/16", 1/8", 1/4" nozzles
- 1/8" NPT and 1/4" NPT connectors
This is a starter set for modular coolant hose.

4553 Coolant Hose Plier, Modular 1/4" ID $18.95
4552 Coolant Hose Valve, Modular 1/4" ID $3.95
4716 Coolant Hose Valve, Modular 1/4" ID $3.95
4550 Coolant Hose, Modular 1/4" ID, 12' Long $3.95

4763 Coolant Hose, Steel with Magnetic Base $59.95
- 5/8" diameter X 13' long steel nozzled hose
- Flow control valve
- On/off switchable magnetic base
- Magnetic base dimensions: 2.36" x 1.97" x 2.17"

4657 Coolant Tank and Pump $301.92
- 3 gallons (12 liters) per minute flow rate
- 7 gallons (26.5 liters) capacity
- Tank is 21.5" x 11.8" x 9.3" tall
- Includes magnetic base and 18" modular hose
- Sturdy side handles allow for ease in moving
This flood coolant tank and pump is good for small mills, lathes, and band saws. Power: 120V 60Hz This unit has a strong 7 drain hose and a 6' fill hose connected to the magnetic base of the coolant hose. The 18" modular coolant hose has a lever controlled on/off valve. Side handles make the system easy to move and they fold down to the sides when not in use. On/Off switch is conveniently located on the top of the unit.

3520 Flood Coolant Unit $249.95
- Includes tank, pump, hose, and nozzle
- Delivers up to 100 GPH
- Flow can be regulated without harming pump
- Screen and chip collector easily removed for cleaning
- Tank is oil resistant polyethylene
This coolant pump and tank unit is great for bench top milling machines. It is compact (the tank holds 1 gallon) and easy to use and clean. Power: 120V 60Hz 80 watts

3521 Flood Coolant Unit & Coolant $289.95

Coolant Systems: Lubricants

3984 Lubriplate 630-AA Lithium Grease $11.95
- Lithium-based grease for general purpose lubrication
- High anti-wear for extra lubricity
- Water resistant
- Wide operating temperature range
- 630-AA is an NLGI No. 1 lubricant
This is the grease we recommend for small machine tools. It is great for many other applications as well.

3195 M1 Lubricant, 12 oz. Aerosol Can, Starrett $9.95
- Starrett M1 all-purpose lubricant in 12 oz. Aerosol can
- Must be shipped by ground; not available outside the continental US
M1® is the "modern one" - the superior alternative. This all-purpose lubricant dries quickly and will not attract dirt or other contaminants as other leading lubricants do. Starrett lubricant simultaneously dries as it protects, avoiding dirt and grime. Dries to leave a film that protects and lubricates. Lubricates without silicone. Penetrates to quickly to free frozen nuts, bolts and metal parts. Prevents rust and corrosion damage by providing a molecular shield that locks to the metal. Non-soluble in water so it displaces moisture to lift it away from the surface to be protected. Nonconductive, preventing short circuits. Applications for industry are nearly endless. Protect working surfaces of machinery; use in dip tanks to protect production parts in process, or apply on tools when stored. Starrett M1 lubricant is also ideal in hostile corrosive situations that destroy metal equipment used in marine environments.

3179 M1 Lubricant, Case of 12 Aerosol Cans, Starrett $99.95

Coolant Systems: Mist Systems

4718 FogBuster Sprayer Coolant System with Tank, 1 Outlet $345.00
- FogBuster model 10100 with one spray outlet
- 1/2 gallon clear coolant tank
- Stainless steel handle, nozzle with magnetic base, and pressure regulator
- Reduces airborne pollutants in shop
Half-gallon models are the ideal size for many coolant and lubricant applications. Coolant level can be easily viewed through the clear reservoir. The provided stainless steel handle makes mounting or carrying this spray mist coolant system quick and easy. The hose from tank to nozzle is 5 feet long. Unlike other mist coolant systems, the FogBuster does not atomize coolant at the nozzle tip. Coolant is carried accurately with the airflow after leaving the nozzle and will produce a small spray pattern from several inches from its target. Greater cooling and lubrication is achieved along with a reduction in coolant waste because virtually all of the coolant is being utilized on the part and tool. FogBuster offers a wide range of coolant and air flows, will spray virtually any type of coolant or lubricant, and its unique high volume low pressure design operates on only 10 to 20 PSI. Coolant flow is easily adjusted by a precision needle valve at the sprayer head, and can be set from very small amounts to a heavy spray to suit your job application. Air flow is adjusted at the air pressure regulator, and once flows are set sprayer operation is instant with the flip of an air toggle switch conveniently located on your machine or when called for in a program. Just hook up your air compressor.

4719 Lathe Mount for FogBuster Mist Unit $31.95

1825 Tool and Instrument Oil, Starrett $10.60
- Starrett catalog number 1620
This oil is the same extra-fine lubricant made to Starrett specifications and used in the Starrett factory to lubricate and protect their precision measuring tools and instruments. It is also perfect for all mechanics, homeowners, hobbyists, and sportsmen who require the finest all-purpose oil. Special high-refining makes Starrett Tool and Instrument Oil colorless, ensures thorough lubrication of close-fitting parts at high temperatures and below zero, and provides a strong lasting film over all areas requiring protection against rust. This oil has not been adulterated by additives for color and odor.

4120 Way Oil, Mobil Vactra Oil No. 2 $34.95
- ISO viscosity 68
- One gallon
- Recommended for horizontal slideways on small to medium size machine tools
- Rust Protection, ASTM D6658 Pass
- Flash Point, ASTM D92, 228°C
When you need oil for your machine, many types of oil will work - even motor oil. However, the best oil to use is oil designed specifically for lubricating machine ways. This type of oil has an additive that helps the oil stick to the surface. We suggest and use 4120 Mobil Vactra Oil No. 2 Way Oil with ISO viscosity 68. Information provided by Mobil. Mobil Vactra Oil Numbered Series products are recommended for the lubrication of machine tool slideway systems. They are designed for use with combinations of cast iron, steel and non-metallic way materials. Mobil machine oil may be applied by hand, forced-feed lubricator or in flood application by circulation system. Mobil Vactra Oil No. Series of products are suitable for use in applications that require Fives Cincinnati specifications P53, P47, and P50. Mobil Vactra Oil No. 2 is recommended for horizontal slideways on small to medium size machine tools. It is also suitable for circulating application in large machines and as a moderate duty hydraulic fluid. Mobil machine oil can be used for lubrication of ball screws, linear guides, headstocks, translating screws. Mobil Vactra Oil Numbered Series is recommended for applications where oil contamination of the aqueous coolants shortsens coolant batch life. Mobil Vactra Oil No. 2 Way Oil ISO Viscosity Grade 68cSt @ 40°C, ASTM D4456 Flash Point, ASTM D92, C228 Pour Point, ASTM D97, -18°C Copper Strip Corrosion, ASTM D 130C, 3 h 1/8 Rust Protection, ASTM D 6658 Pass/FZG Load Support, ISO 14635, Fail Stage 13

4713 Lathe Mount for FogBuster Mist Unit $31.95
Coolant Systems: Mist Systems

2965 Mist Coolant System with Tank, 1 Outlet

- Kool Mist model 100NF12 with one spray outlet
- 12° Lock-Line® spray positioner
- Heavy duty magnetic base
- 1 gallon stainless steel coolant tank
- Adjustable coolant nozzle and 4 coolant hose

This spray mist unit has a 1/8" NPT thread for your compressed air supply. (You furnish the air compressor.)

4278 Mist Coolant System with Tank, 1 Outlet plus Kool Mist 77

$241.95

3458 Mist Coolant System with Tank, 2 Outlets

$380.00

4691 Mist Coolant System, Lite Duty

- Kool Mist model 80S 90 Degree
- 4" long 90 degree nozzle.
- Adjustable coolant nozzles and 2 coolant hose

These models are to be used with your own tank. The Lite Duty models are best used in production operations that require minimal set up changes. This is the least expensive model, but does not provide the flexibility to be moved quickly from machine to machine. Lite Duty models generate a very fine spray mist. Simplicity of the Systems: The controls of these units are mounted permanently to the machine, close to the operator and the cut. No Coolant Tank Furnished: Coolant mist may be placed in any clean container that will not contaminate the coolant. Coaxial Coolant Line: Coolant and compressed air are not mixed until they reach the nozzle. To overcome the need for dual lines, Kool Mist has developed a coaxial line, or a hose within a hose. Coolant line exteriors may be nylon braided for normal duty, or metal braided from protection from hot chips and abrasion. Easy to Use Control: Output from each nozzle is regulated by a single knob on the control. Mist Spray may be turned on or off instantly to coordinate with the cutting cycle, and the spray mist made lean or rich as needed. Nozzle position can be a permanent mount or the flexible magnetic base. 90 degree nozzle.

PORTaMIST Spray Mist Unit 12”

$138.00

2966 PORTaMIST Spray Mist Unit 12”

- Kool Mist PORTaMIST model 60M12
- 12° Lock-Line® spray positioner
- Heavy duty magnetic base
- Adjustable coolant nozzle
- 4 coolant and air hoses

This spray mist coolant unit has a male 1/8” NPT thread for your compressed air supply. (You furnish the air compressor.) Includes a sample of Kool Mist 77.

4984 PORTaMIST Spray Mist Unit 18”

$153.00

2226 Spra-Kool Midget Mist Coolant Spray Unit

$35.95

- For turning, drilling, milling, sawing, and grinding
- Designed to be moved from machine to machine
- Adjustable coolant spray nozzle for precise aim
- Adjustable spray volume
- Removable strainer prevents clogs

The Spra-Kool coolant spray unit works on 30 to 150 PSI air pressure. (You furnish the air compressor.) Only solid brass fittings are used. There is nothing to rust or corrode. The system is suitable for use with any type of soluble coolant or oil.

3804 Spra-Kool Midget Mist Coolant Spray Unit & Coolant

$42.95

Cutting Tools: Boring Bars

1246 Boring Bar Set, 3/8” Shank, Carbide

$19.95

- Set of nine boring bars - 3 lengths for each min. bore size
- Shank diameter 3/8”
- Hardened and ground to +0” - .0005”
- Shafts are made of special heat treated alloy steel
- Designed so the same bar can bore flat

This carbide tipped 9-piece boring bar set includes three different length boring bars each for minimum bores of 5/16”, 3/8”, and 7/16”. The bore depth ranges from 3/4” to 2-1/4”. The heat treated, alloy steel shanks are held to 0.000 to -0.0005” from the nominal diameter. The holder may vary from that shown in the photo.

3768 Boring Bar Set, 1/2” Shank, Carbide with Holder for Mini Lathe

$33.19

3832 Boring Bar Set, 3/4” Shank, Carbide

$49.95

1247 Boring Bar Set, 1/2” Shank, Carbide

$24.95

2682 Boring Bar Set, 1/2” Shank, HSS

$92.95

2683 Boring Bar Set, 3/8” Shank, HSS

$74.95

1779 Boring Bar, 3/8” Indexable

$34.95

- Profiling bars for semi-finish and finishing operations
- Designed for CCMT 80° inserts
- 7° Relief angle
- Negative 5° Lead angle for boring
- 3° Side & end cutting edge angle

This 1/8” diameter indexable boring bar for sale uses CCMT inserts. Minimum bore diameter is 0.050” Use CCMT 21.51 or CCMT 21.52 inserts with this boring bar set.

1780 Boring Bar, 1/2” Indexable

$35.95

3719 Boring Bar, 5/16” Indexable

$38.95

5436 Boring Bar, 5/16” Indexable, 505- SCLCR06, Reduced Neck

$29.95

4788 Boring Bar, 3/8” Indexable, 80 Deg HSS Diamond Inserts, A R Warner Kit #13

$96.00

- 3/8” diameter, 5” long boring bar
- 3 CEMW-21.5.5 high speed steel inserts
- 1 extra Torx screw
- 1 wrench

This Arthur R. Warner Co. precision boring bar uses high speed steel inserts. Combine the advantages of high speed steel cutting tools with the convenience of indexable tooling. The minimum boring diameter is 0.330”.

The Arthur R. Warner Co. is a family-owned American manufacturer of high speed steel tools with specialization in cutting, shaping, pre-grinding, heat treating, and finish grinding of premium grades of flat high speed steel. Their quality is excellent and LittleMachineShop.com is proud to carry their products.

1720 Boring Bar, 3/8” Indexable, HSS Triangle Inserts, A R Warner Kit #12

$95.95

- 3/8” diameter, 5” long boring bar with TPNW-1.81.5.5 insert
- 2 extra TPNW-1.81.5.5 high speed steel inserts
- 1 extra Torx screw
- 1 wrench

This Arthur R. Warner Co. precision boring bar uses high speed steel inserts. Combine the advantages of high speed steel cutting tools with the convenience of indexable tooling. The Arthur R. Warner Co. is a family-owned American manufacturer of high speed steel products with specialization in cutting, shaping, pre-grinding, heat treating, and finish grinding of premium grades of flat high speed steel. Their quality is excellent and LittleMachineShop.com is proud to carry their products.

  - High speed steel pilotless countersinks and deburring tools
  - Cam relieved for chatter-free cutting
  - For mild steel, brass, aluminum, and plastics
  - 82 degree point angle

- **5193 Counterbore Set, 3 Flute HSS, Set of 7** $69.95
  - Sizes #6, #8, #10, 1/4", 5/16", 3/8", and 1/2"
  - Continuous pilot counterbores
  - Pilot extends the full length of the flute
  - Made of High Speed Steel

Continuous pilot counterbores cut rapidly, smoothly, and accurately, producing long spiraling chips rather than small metal particles. The pilot extends the full length of the flute portion of the tool. As cutter flutes are ground back due to wear, a new section of pilot becomes exposed. The pilot head may be cut off to any desired length when repeated sharpening makes it too long for practical use. Continuous pilot counterbores have a life many times that of the conventional type counterbore.

Cutting Tools: Cut-Off Tools

5108 Cut-Off Blade, 1/32", M2 HSS $16.00
- M2 High Speed Steel
- Width: 0.32", Height: 0.32", Length: 3.0"
- Used on 5106, 5107, and 5130 grooving & cut-off tools
- 0.32" x 0.32" x 3.0" HSS cut-off blade.

This is a premium American-made M2 high speed steel cut-off blade from the Arthur R. Warner Co.

This is a replacement blade for 5106, 5107, and 5130 grooving & cut-off tools.

The Arthur R. Warner Co. is a family-owned American manufacturer of high speed steel products with specialization in cutting, shaping, pre-grinding, heat treating, and finish grinding of premium grades of flat high speed steel. Their quality is excellent and LittleMachineShop.com is proud to carry their products.

5109 Cut-Off Blade, 1/16", M2 HSS $16.00

3415 Cut-Off Blade, P1 Carbide Tipped $65.95
- This blade is size P1
- Two micro grain carbide tips brazed on
- High speed steel
- Width: 1/16", Height: 1/16", Length: 4-1/2"
- 1/16" x 1/16" x 4-1/2" M2 HSS cut-off blade. These T-shape parting blades provide great side clearance.

4993 Cut-Off Blade, P2 Indexable $52.95
- This blade is size P2
- Fits 0XA and AXA cut-off holders
- Uses GTN-2, GTL-2 or GTR-2 inserts
- Includes one GTN-2 insert
- 0.072" x 0.125" x 4.125" M2 HSS cut-off blade. GTx-2 inserts have a 2mm (0.078") cutting width.

Cut-Off Blades, High Speed Steel

- 1/2" x 4-1/2" M2 HSS cut-off blades
- These T-shape parting blades provide great side clearance
- P1N blades are 0.063" wide
- P12 blades are 5/64" (0.078") wide

We carry both imported M2 blades and premium American-made M2 high speed steel cut-off blades from the Arthur R. Warner Co.

1929 Cut-Off Blade, P1 $7.95
1728 Cut-Off Blade, P1, M2 HSS $19.95
1930 Cut-Off Blade, P1N $7.95
1729 Cut-Off Blade, P1N, M2 HSS $19.95
1552 Cut-Off Blade, P1X $7.95

5431 Cut-Off Tool Holder, SGTHR9.5-2 $29.95
- Holder style 9.5-2
- Uses GTN-2, GTL-2 or GTR-2 inserts
- 3/8" x 3/8" shank size
- 0.087" and 0.094" insert width
- 1.10" maximum work diameter

SGTHR9.5-2 cut-off tool holder style 9.5-2 has a 3/8" x 3/8" shank and holds inserts that are 0.087" and 0.094" in width. Self-gripping T-Cut style offers rigidity, stability and high reliability for superior straightness of cut. Maximum work diameter 1.10"

5107 Grooving & Cut-Off Tool, 3/8" Shank, HSS Blade, A R Warner Kit #28 $85.00
- For external grooving and cut-off operations
- Includes one 3/8" shank holder 3" overall length
- Includes one 0.062" cutoff blade T-15 high speed steel
- Includes one 7/64" Allen wrench

The blade is 0.18" tall and 3" long.

Made in the US by the Arthur R. Warner Co.

The Arthur R. Warner Co. is a family-owned American manufacturer of high speed steel products with specialization in cutting, shaping, pre-grinding, heat treating, and finish grinding of premium grades of flat high speed steel. Their quality is excellent and LittleMachineShop.com is proud to carry their products.

5130 Grooving & Cut-Off Tool, 1/2" Shank, HSS Blade, A R Warner Kit #29 $97.00
5106 Grooving & Cut-Off Tool, 5/16" Shank, HSS Blade, A R Warner Kit #27 $82.00

Cutting Tools: Drill Sets

3418 Drill Set, 115 Piece Jobber Length Cobalt Steel $499.95
- Made in USA
- Bronze color finish
- 135° split point

115 Piece cobalt steel drill set.Set includes 1/16" - 1/2" by 64ths, A - Z, and No. 1 - 60. Cobalt drills display higher red hardness and are especially effective in drilling hard or abrasive materials. These are jobbers length drills with straight shanks. Jobbers length drills are normal length drills.Includes a metal index for storing the drills.

2826 Drill Set, 115 Piece Jobber Length HSS $184.95
- 118° Point
- Surface Treated Black Finish
- Jobber Length
- Straight Shank
- High Speed Steel

115 Piece high speed steel drill set.Set includes 1/16" - 1/2" by 64ths, A - Z, and No. 1 - 60. These are jobber length drills with straight shanks. Jobber length drills are normal length drills.Includes a metal index for storing the drills.

3043 Drill Set, #1-60 Jobber Length HSS $39.95
2828 Drill Set, 29 Piece Jobber Length HSS $44.95
3044 Drill Set, A-Z Jobber Length HSS $69.95
3977 Drill Set, #61-80 Jobber Length HSS $17.95
Cutting Tools: Drill Sets

2827 Drill Set, 115 Piece Screw Machine Length $314.95

- Made in USA
- Surface treated black finish
- Heavy duty 135° split point
- Machine length
- High speed steel

115 Piece high speed steel machine screw set. Screw Machine Drill Bit Set includes 1/16" - 1/2" by 64ths, A - 2, and No. 1 - 60. These are screw machine length drills with straight shanks. Screw machine length drills are 5/8 as long as normal jobber-length drills. These shorter drill bits are useful on mini lathes and mini mills where there isn't much distance for tools. Includes a Huot metal index for storing the drills.

2829 Drill Set, 29 Piece Jobber Length HSS $85.95

- High speed steel
- 135° point
- Set packaged in steel case
- 19 Piece cobalt metric drills
- Sizes 1 mm to 10 mm

This set includes five different sizes of combined drills and countersinks, commonly called center drills. They are used to produce a center hole on a workpiece for turning between centers. Center drills are also used to start drilled holes. Because they are very stiff they don't have a tendency to wander. This set is high speed steel and includes sizes 1, 2, 3, 4, and 5. These are 60 degree center drills with a right hand cutting direction. Each center drill is made of ground high speed M42 cobalt steel for good wear resistance.

2830 Drill Set, 29 Piece Screw Machine Length $84.95

- Made in USA
- Bright finish
- 118° point
- Jobber length
- High speed steel

19 Piece metric high speed steel drill set. Set includes 1.0 mm - 10.0 mm by 0.5 mm. These are jobbers length drills with straight shanks. Jobber length drills are normal length drills. Includes a Huot metal index for storing the drills.

3591 Drill Set, 29 Piece Jobber Length HSS, $139.95

- Turbomax Tip
- 1/16" through 1/2" by 1/64"
- Revolutionary tip design stays sharper longer and drills up to 28 percent faster
- Three-flatted shank design provides better chuck grip and reduces slippage
- M-2 high speed steel for the best combination of strength, heat resistance, and wear resistance
- Gold oxide finish. Made in US

High speed steel drill bit set with Turbo Point tip. 29-piece set in metal index case includes drill bit sizes 1/16" through 1/2" in 1/64" increments. These are jobbers length drills with straight shanks. Jobber length drills are normal length drills. Three-flatted shank design is ideal for use in keyless chucks.

3590 Drill Set, 21 Piece Jobber Length HSS, $73.95

- Turbomax Tip
- 1/16" through 1/2" by 1/64"
- Revolutionary tip design stays sharper longer and drills up to 28 percent faster
- Three-flatted shank design provides better chuck grip and reduces slippage
- M-2 high speed steel for the best combination of strength, heat resistance, and wear resistance
- Gold oxide finish. Made in US

High speed steel drill bit set with Turbo Point tip. 29-piece set in metal index case includes drill bit sizes 1/16" through 1/2" in 1/64" increments. These are jobbers length drills with straight shanks. Jobber length drills are normal length drills. Three-flatted shank design is ideal for use in keyless chucks.

4130 Tap & Drill Combo Set, 18 Pieces HSS $54.95

- High speed steel taps and drill bits
- Drill bits are matched with taps for quick use
- Includes 6-32, 8-32, 10-24, 10-32, 1/4"-20, 5/16"-18, 3/8"-16, 7/16"-14, and 1/2"-13 HSS taps
- Includes #36, #29, #25, #21, #7, F, 5/16", U, and 27/64" HSS drill bits

This set makes tapping common thread sizes a breeze. No need to get out your reading glasses to check those pesky drill charts any more. With this kit you'll be able to grab the correct drill bit and tap and go to work immediately.

Cutting Tools: End Mills

Corner Rounding End Mills, HSS, Individual Sizes

- Formed Radius Cutters with right hand cut
- Resharpen without changing form
- Straight flutes
- Weldon Shank

Intended for use in rounding off sharp corners. Form-relieved type corner rounding end mills may be sharpened many times without changing the form of the radius. Non-center, right hand cutting with straight flutes and a weldon shank.

5137 Corner Rounding End Mill, 1/16", HSS $11.95

5138 Corner Rounding End Mill, 1/8", HSS $11.95

5139 Corner Rounding End Mill, 1/4", HSS $19.95

Drill-Mills, 90 Degree, 2-Flute, Cobalt, Individual Sizes

- 90 Degree angle
- Cobalt steel
- For spotting, chamfering, grooving
- For aluminum

Drill-mills work best on aluminum. They can be used for spotting holes instead of using a center drill; and are great for chamfering edges. Use a drill-mill to make a 90 degree angle groove.

5359 Drill-Mill, 90 Degree, 1/4" 2 Flute, Cobalt $23.95

5360 Drill-Mill, 90 Degree, 3/8" 2 Flute, Cobalt $25.95

5361 Drill-Mill, 90 Degree, 1/2" 2 Flute, Cobalt $35.95

#### End Mills, 4 Flute, M42 Cobalt, Coated, Individual Sizes
- M42 8% cobalt 4 flute end mills
- 3/8" shank
- Made in the USA

These are high quality, American made, cobalt end mills for general milling operations including slots, grooves and similar features. They are ground from solid M42 8% cobalt steel. The cutting areas are either Titanium Nitride (TiN) or Titanium CarboNitride (TiCN) coated. These CNC qualified end mills feature a spiral flute design for a faster and smoother cutting action.

### Cutting Tools: Engraving Tools

#### End Mills, Miniature, 2 Flute, Double Ended HSS, Individual Sizes
- Double ended, 2 flute miniature end mills
- High Speed Steel
- 2-1/4" overall length
- 3/16" Shank diameter

Popular for small slotting, engraving, pocketing and similar applications. The medium-high helix angle produces an ideal shearing cut for outstanding performance.

#### Cutting Tools: Engraving Tools

- Submicron grade carbide
- 1/8" shank, 1 1/2" overall length
- Recommended for use with plastics
- Use for aluminum, steel, and stainless steel
- Kyocera Micro Tools PN EGR1250-090

These engraving cutters can be used on mild steel, alloyed steel, stainless steel, nickel alloys, titanium, cast iron, aluminum, copper, brass, and plastics. These cutters cause fewer burs on plastics.

3779 Engraving Tool, 90 Degree Angle $23.95

Cutting Tools: Indexable End Mills

- 90° square shoulder milling
- Cutting Diameters: 3/8", 1/2", and 5/8"
- Overall length 3"
- Two single flute and one two flute tools
- Use standard APKT-1003 Inserts (not included)

Square shoulder milling cutters allow for a true 90° cut, combining peripheral milling with face milling. It is ideal for slotting. This 3 Piece set of square shoulder end mills have 1/2" shanks and overall length of 3" each. The cutting diameters are 3/8", 1/2" and 5/8". The 3/8" and 1/2" end mills are single flute and require one APKT-1003 insert each. The 5/8" end mill has 2 flutes and requires two inserts. Flute length on each tool is 1 1/2". End mills use M2.5 x 6 mm insert screws and a T8 Wrench. APKT-1003 indexable inserts not included. APKT-1003 carbide coated inserts are an excellent alternative to HSS for heavy material removal.

**Cutting Tools: Saw Blades**

**Band Saw Blades, 44-7/8”, Porta-Band Bi-Metal, Individual Sizes, Starrett**
- 44-7/8” (1140 mm) x 1/2” (13 mm) x 0.020” (0.5 mm)
- Triple tempered M-42 cobalt high speed steel teeth with a fatigue resistant alloy steel backer
- Patented “Thin Tooth” design of the Split-Chip advantage “bi-metal unique”
- Faster cutting and longer life than ordinary blades
- Starrett Univerz bandsaw blades available in a variety of tooth pitches
  These 44-7/8” bandsaw blades utilize Starrett’s exclusive bi-metal unique saw technology for faster cutting and longer life.

Besides fitting LittleMachineShop.com portable band saws, these Starrett bandsaw blades fit Black & Decker, DeWalt, Greenlee, Makita, Unitec, Porter-Cable, Ridgid, Rockwell, Skil, Milwaukee portable band saws.

4932 Band Saw Blade, 44-7/8”, Univerz Bi-Metal 105, Starrett $9.95

- Starrett bi-metal unique HSS Safe-Flex hacksaw blades
  These blades are 12” long, 1/2” wide and are 0.025” thick.
  Bi-metal unique High Speed Steel Safe-Flex hacksaw blades are made with a patented solid-state diffusion process with 70% more HSS weld area and ground teeth for reduced blade fracture, faster cutting and longer life.

1850 Hacksaw Blade, Bi-Metal, 18 TPI, Starrett $2.01
1851 Hacksaw Blade, Bi-Metal, 24 TPI, Starrett $2.01
3561 Hacksaw Blade, Bi-Metal, 32 TPI, Starrett $2.01

**Cutting Tools: Slitting Saws**

**Slitting Saw Blades, HSS, Individual Sizes**
- 3” Saw Diameter
- 1” Hole Size
- 30 Teeth
- High Speed Steel

4725 Slitting Saw Blade, 1/32”, HSS $9.95
4726 Slitting Saw Blade, 3/64”, HSS $9.95
4727 Slitting Saw Blade, 1/16”, HSS $9.95
4728 Slitting Saw Blade, 3/32”, HSS $9.95
4729 Slitting Saw Blade, 1/8”, HSS $14.95

**Cutting Tools: T-Slot and Dovetail Cutters**

1450 Chamfer Cutter, 45 Degree 1/2” Dia., HSS $21.95
- High Speed Steel Cutter
- 1/2” Cutting Diameter
- 3/8” Shank Diameter
- Use for Chamfering and Angle Milling
  High speed steel, right hand cutting chamfer cutter. 45 degree chamfer angle with a 1/2” cutting diameter and 3/8” shank. Use for chamfering and angle milling.

5921 Dovetail Cutter, Indexable 60 Degree 1/2”, Dia., 1 Flute $25.95
- 3/8” Shank 1 Flute Indexable Dovetail Cutter
- Right Hand Cut
- 60° Dovetail Angle 15° Clearance
- 1/2” Cutting Diameter
  Requires 1 TDEX 21.5 Insert (Not Included)
  High speed steel, right hand cutting chamfer cutter. 45 degree chamfer angle with a 1/2” cutting diameter and 3/8” shank. Use for chamfering and angle milling.

5922 Dovetail Cutter, Indexable 60 Degree 3/4”, Dia., 2 Flute $35.95
- 3/8” Shank 2 Flute Indexable Dovetail Cutter
- Right Hand Cut
- 60° Dovetail Angle 15° Clearance
- 1/2” Cutting Diameter
  Requires 2 TDEX 21.5 Insert (Not Included)
  High speed steel, right hand cutting chamfer cutter. 45 degree chamfer angle with a 1/2” cutting diameter and 3/8” shank. Use for chamfering and angle milling.

**Dovetail Cutters**
- High speed steel cutters
- 60° dovetail angle
- 3/8” shank diameter

2904 Dovetail Cutter, 60 Degree 3/8” Dia., HSS $13.95
2905 Dovetail Cutter, 60 Degree 1/2” Dia., HSS $14.95
2906 Dovetail Cutter, 60 Degree 3/4” Dia., HSS $15.95
5090 Dovetail Cutter, 60 Degree 1-3/8” Dia., HSS $34.95

**T-Slot Cutters, HSS, Individual Sizes**
- High speed steel T-slot cutters
- Eight teeth
- Positive radial rake, right and left hand spiral.

5195 T-Slot Cutter, 3/8” T-slot, HSS $21.95
5196 T-Slot Cutter, 7/16” (12 mm) T-slot, HSS $26.95
5194 T-Slot Cutter, 8 mm T-slot, HSS $18.95

**Cutting Tools: Turning Tools**

5612 Chamfer Tool, 3/8” Indexable, SCSCR-06-2J, Tormach $43.95
- Designation: SCSCR-06-2J
- Steel shank 3/8” x 3-1/2”
- Designed for CCMT and CCGT 21.51 inserts
- Approach 45°, 7° relief angle
- Insert Shape: 80° (C)
  Right hand Chamfer Tool. Includes wrenches and (1) insert.

5618 Chamfer Tool, 1/2” Indexable, SCSCR-08-3A, Tormach $43.95
Cutting Tools: Turning Tools

5611 Facing Tool, 3/8" Indexable, SCKCR-06-2J, Tormach

- Designation: SCKCR-06-2J
- Steel shank 3/8" x 3 1/2"
- Designed for CCMT and CCGT 21.51 inserts
- Approach 75°, 7° relief angle
- Insert Shape: 80° (C)

Right hand Facing Tool. Includes wrenches and (1) insert.

5617 Facing Tool, 1/2" Indexable, SCKCR-08-3A, Tormach

- Designation MEGHR06-2
- Shank size 3/8"
- Overall length is 3"
- Uses MGMN-200 Inserts

MEGHR06-2 external right hand grooving tool holder has a 3/8" x 3/8" shank. Tool holder design provides precision clamping & insert indexing accuracy. Ideal for external grooving, turning, part-off, relieving & profile machining. Maximum cutting depth is 1/2" Overall length is 3".

5613 Profiling Tool, 3/8" Indexable, SCMCN-06-2J, Tormach

- Designation: SCMCN-06-2J
- Steel shank 3/8" x 3 1/2"
- Designed for CCMT and CCGT 21.51 inserts
- Approach 50°, 7° relief angle
- Insert Shape: 80° (C)

Neutral hand Profile Tool. Includes wrenches and (1) insert.

5619 Profiling Tool, 1/2" Indexable, SCMCN-08-3A, Tormach

- Designation MEGHR08-2
- Shank size 3/8"
- Overall length is 3"
- Uses MGMN-200 Inserts

MEGHR08-2 external right hand grooving tool holder has a 3/8" x 3/8" shank. Tool holder design provides precision clamping & insert indexing accuracy. Ideal for external grooving, turning, part-off, relieving & profile machining. Maximum cutting depth is 1/2" Overall length is 3".

2431 Profiling Tool, 3/8" Indexable, 35 Deg Diamond Inserts, A R Warner Kit #15

- 3/8" square, 6" long profiling tool
- Includes 2 HSS (VCMW-221) inserts
- Includes 1 carbide (VCMT-221) insert
- 2 MS-1153 screws
- 1 T-7 torx wrench

This Arthur R. Warner Co. precision profiling tool uses high speed steel or carbide inserts. Combine the advantages of high speed steel cutting tools with the convenience of indexable tooling. This profiling tool is great for CNC applications, and can be used for most of your turning needs.

Contents:
1 Right Hand bar 3/8 inch shank, 6 inch overall length, Side angle: 3 degrees
2 Inserts T-15 High Speed Steel VCMW221, Relief : 7 degrees, IC: 0.250 inch, Thickness: 0.125 inch, Hole: 0.110 inch, Top opening: 0.146 inch, Radius: 0.015 inch
1 Insert Carbide VCMT221, Relief : 7 degree, IC: 0.250 inch, Thickness: 0.125 inch, Hole: 0.110 inch, Top opening: 0.146 inch, Radius: 0.015 inch
Screws: (3) MS-1153

Wrench: T-7

The Arthur R. Warner Co. is a family-owned American manufacturer of high speed steel products with specialization in cutting, shaping, pre-grinding, heat treating, and finish grinding of premium grades of flat high speed steel. Their quality is excellent and LittleMachineShop.com is proud to carry their products.

4820 Profiling Tools, 3/8" Indexable R / L, 35 Deg Diamond Inserts, A R Warner Kit #16

- 3/8" Square Shank Right Hand profiling tool, 6" overall length
- 3/8" Square Shank Left Hand profiling tool, 6" overall length
- Includes 3 HSS (VCWM-221) inserts
- Includes 1 carbide (VCMT-221) insert
- 1 extra MS-1153 Torx screw, 1 T-7 wrench

This Arthur R. Warner Co. precision profiling tool uses high speed steel or carbide inserts. Combine the advantages of high speed steel cutting tools with the convenience of indexable tooling. This profiling tool is great for CNC applications, and can be used for most of your turning needs.

Contents:
1 Right Hand bar 3/8 inch shank, 6 inch overall length, Side angle: 3 degrees
1 Left Hand bar 3/8 inch shank, 6 inch overall length, Side angle: 3 degrees
3 Inserts T-15 High Speed Steel VCMW221, Relief : 7 degrees, IC: 0.250 inch, Thickness: 0.125 inch, Hole: 0.110 inch, Top opening: 0.146 inch, Radius: 0.015 inch
1 Insert Carbide VCMT221, Relief : 7 degree, IC: 0.250 inch, Thickness: 0.125 inch, Hole: 0.110 inch, Top opening: 0.146 inch, Radius: 0.015 inch
Screws: (3) MS-1153

Wrench: T-7

The Arthur R. Warner Co. is a family-owned American manufacturer of high speed steel products with specialization in cutting, shaping, pre-grinding, heat treating, and finish grinding of premium grades of flat high speed steel. Their quality is excellent and LittleMachineShop.com is proud to carry their products.

4516 Tool Bit Sharpening Training Set

- Six presharpened 1/4" high speed steel tool bits
- Five unsharpened 1/4" tool bits
- Sharpening instructions

Learn how to grind tool bits with this set. The presharpened tool bits show you how the finished product should look. The unsharpened tool bits give you plenty of practice. The presharpened tool bits are ground in the same manner as hand-ground tool bits so they provide an example of how to properly grind tool bits. All the tool bits are M2 high speed steel. M2 is a high speed steel in the tungsten-molybdenum series. The carbides in it are small and evenly distributed. It has high wear resistance. It is used to manufacture a variety of tools, such as drill bits, taps and reamers.

3192 Tool Bit, 5/16" Right Hand, Brazed Carbide

- AR-5 Style turning tool
- C6 Carbide tipped single point brazed tip
- Overall length 2 1/4"
- Right hand tool; cuts from right to left
- Use for steel and steel alloys

These tool bit are C6 grade carbide. C6 carbide is designed for steel and steel alloys, but in hobby use works fine on aluminum and non-ferrous metals too.

3193 Tool Bit, 5/16" Left Hand, Brazed Carbide

2250 Tool Bits, 1/4" Presharpened, Set of 6

- Six pre-sharpened 1/4" high speed steel tool bits
- Includes Right hand, Left hand, 45 degree chamfer, Round nose, Boring bar, Cut off

These tool bits are made from high speed steel.
Cutting Tools: Turning Tools

2412 Tool Bits, 5/16" Brazed Carbide, Set of 5
- 5 piece cutting tool set
- 5/16" (8mm) shanks
- Carbide cutting tips
- Variety of tips for roughing, straight and facing cuts and parting-off
- Ideal for mini lathes

This set includes five different brazed carbide turning tools. The shanks are 5/16" (8mm) which is the right size for the mini lathe. This set includes one each of the following tool bits: DIN 4971R (ISO1) Straight cutter for rough turning, DIN 4975 (ISO10) Pointed tip for straight turning, DIN 4980R (ISO6) Right angle cutter, DIN 4971R (ISO1) Straight cutter for rough turning, DIN 4981R (ISO7) Parting-off cutter.

Tool Bits, M2 High Speed Steel, Individual Sizes
- 2-1/2' long M2 HSS tool bits
- M2 is a high speed steel in the tungsten-molybdenum series. The carbides in it are small and evenly distributed. It has high wear resistance. It is used for a variety of tools, such as drill bits, taps and reamers.

1154 Tool Bit, 1/8' x 2-1/2", M2 HSS $1.49
1153 Tool Bit, 3/16' x 2-1/2", M2 HSS $1.95
1155 Tool Bit, 1/4' x 2-1/2", M2 HSS $1.95
1152 Tool Bit, 5/16' x 2-1/2", M2 HSS $1.95
1156 Tool Bit, 3/8' x 2-1/2", M2 HSS $2.95

Tool Bits, T-15 High Speed Steel, Individual Sizes
- 2-1/2' long T-15 HSS tool bits
- T-15 is a tungsten type super high speed steel containing high vanadium for excellent abrasion resistance and cobalt for good red hardness. ASi T-15 is ideal for cutting difficult to machine materials where high frictional heat is present.

1726 Tool Bit, 1/8' x 2-1/2' T-15 HSS, A R Warner $9.95
1716 Tool Bit, 3/16' x 2-1/2' T-15 HSS, A R Warner $9.95
1717 Tool Bit, 1/4' x 2-1/2' T-15 HSS, A R Warner $10.95
1715 Tool Bit, 5/16' x 2-1/2', T-15 HSS, A R Warner $13.95
1718 Tool Bit, 3/8' x 3', T-15 HSS, A R Warner $17.95

3694 Turning & Boring Tools, 3/8" Indexable, HSS Inserts, A R Warner Kit #8
- Right and left hand turning tools with 0.375" shank 3.5" long
- Boring bar with 0.375" shank 5.0" overall length
- Includes three T-15 HSS (CCMW21.51) inserts for turning
- Includes two T-15 HSS (CCMW21.51) inserts for boring
- Includes two MS-11525 screws, three MS-1153 screws and one T-7 wrench

This Arthur R. Warner Co. kit includes a 3/8" right-hand turning tool, a 3/8" left-hand turning tool, and a 3/8" boring bar. The right hand turning bar has a 0.375" shank, and is 3.50" in overall length. The left hand turning bar has a 0.375" shank, and is 3.50" in overall length. The left hand turning bar has a second insert pocket in opposite end that provides a 50° side cutting edge angle. This provides a way to use the two insert points that are not used in the other tool holders. The boring bar has a 0.375" shank, and is 5.0" in overall length. It has 0.188" flat along length for location, and requires a 0.365" minimum bore.

The Arthur R. Warner Co. is a family-owned American manufacturer of high speed steel products with specialization in cutting, shaping, pre-grinding, heat treating, and finish grinding of premium grades of flat high speed steel. Their quality is excellent and LittleMachineShop.com is proud to carry their products.

5433 Turning & Boring Tools, 3/8" Indexable, Triangle Inserts
- 4 turning tools
- 1 boring tool
- Inserts and torx wrenches
- 3/8" shank
- Uses TCMT-21.51 inserts

Set comes in a fitted aluminum case.

5432 Turning & Boring Tools, 5/16" Indexable, Triangle Inserts
- 4 turning tools
- 1 boring tool
- Inserts and torx wrenches
- 5/16" shank
- Uses TCMT-1.81.51 Inserts

Set comes in a fitted aluminum case.

5434 Turning & Cut-Off Tools, 3/8" Indexable, 7 Piece Set
- 6 turning tools
- 1 cut-off blade
- Inserts and torx wrenches
- 3/8" shank
- Extra inserts and screws available

Seven 3/8" indexable tool set, six turning tools and 1 cut-off blade, torx wrenches and inserts. Set comes in a fitted aluminum case. Turning tools included are: 5DNCN 6-2 holder using a DCMT insert (P/N 5640), an M2.5 x 6 retaining screw (P/N 2696), SDJCR 6-2 holder using a DCMT insert (P/N 5640), and an M2.5 x 6 retaining screw (P/N 2696). SCCLCL 6-2 holder using a CCMT insert (P/N 1781), and an M2.5 x 6 retaining screw (P/N 2696). SWGCR 6-5 holder using a WCXMO50030BR-53 Carbide insert (P/N 5641), and an M3 x 8 retaining screw (P/N 5645). SER 6-11 holder - using an 11ERa60 insert (P/N 5441), and an M2.5 x 6 retaining screw (P/N 2696). Cut-Off Blade: MGEHR06-02 - using a MGAMN-200 insert (P/N 5642), and an M4 x 12 retaining screw (P/N 2687).

5640 Insert, DCMT-21.51 Carbide $5.95
5642 Insert, MRMN-200-M $5.95
5641 Insert, WCXMO50030BR-53 Carbide $9.95

3693 Turning & Boring Tools, 1/4" Indexable, Tools, HSS Inserts, A R Warner Kit #4
- Right and left hand turning tools with 0.250" shank 3.5" long
- Boring bar with 0.250" shank 5.0" overall length
- Includes three T-15 HSS (CCMW21.51) inserts for turning
- Includes two T-15 HSS (CCMW21.51) inserts for boring
- Includes two MS-11525 screws, four MS-1153 screws and one T-7 wrench

This Arthur R. Warner Co. kit includes a 1/4" right-hand turning tool, a 1/4" left-hand turning tool, and a 3/8" boring bar. The right hand turning bar has a 0.250" shank, and is 3.50" in overall length. The left hand turning bar has a second insert pocket in opposite end that provides a 50° side cutting edge angle. This provides a way to use the two insert points that are not used in the other tool holders. The boring bar has a 0.250" shank, and is 5.0" in overall length. It has 0.188" flat along length for location, and requires a 0.365" minimum bore.

The Arthur R. Warner Co. is a family-owned American manufacturer of high speed steel products with specialization in cutting, shaping, pre-grinding, heat treating, and finish grinding of premium grades of flat high speed steel. Their quality is excellent and LittleMachineShop.com is proud to carry their products.

This set of indexable turning tools includes 5 indexable tools (AR, AL, BR, BL, E), inserts, a wrench, and extra screws. It comes in a wooden case.

**Style AR right hand tool**
- Style BR right hand tool with a 15° lead angle
- Style AL left hand tool
- Style BL left hand tool with a 15° lead angle
- Style E Neutral threading tool with 60° included angle
- Style AR right hand tool comes in a wooden case.

</table>

This digital position readout works with most 7x10, 7x12, or 7x14 lathes made by SIEG (C2 and SC2), which includes almost all the mini lathes sold in the US and most of the mini lathes sold worldwide. It also works with HiTorque mini lathes. This kit does not work on 20 TPI mini lathes as sold by Micro Mark. See the Compatibility tab for machines that work with this product.

**5515 Digital Position Readout, 3-Axis Bluetooth Universal**
- Fits milling machines with less than 32" total X-, Y-, and Z-axis travel
- Displays on any Android tablet with Bluetooth capability
- Resolution of 0.0002" (0.005 mm)
- 120-240 VAC Power supply
- Coolant and dust resistant

This magnetic technology digital readout package fits virtually any milling machine with less than 31.8" total X-, Y-, and Z-axis travel. This kit includes 1 meter (3.9") of magnetic scale that you cut to the lengths required for your machine. The instructions tell you how to measure and cut the magnetic scale. This package includes what you need: the display head, 3 magnetic scales 12" x 30" x 16" maximum travel, detailed installation instructions, a detailed full-color operator’s manual, 3-year warranty, display mounting arm, mounting hardware, and universal mounting brackets. Additionally, the display has a USB port on the back, ensuring it won’t become obsolete when new software updates are released.

DROs: DRO Packages

2665 Digital Position Readout, 3-Axis Shooting Star
- Shooting Star BT-3 3-axis digital position readout
- Includes the digital display unit, 3 scales, and mounting hardware
- Resolution: 0.0005", accuracy: 0.001"
- The keypad is a splash-proof membrane with tactile keys in a sturdy metal enclosure
- Guaranteed to fit any mill, lathe, or 3-in-1 machine

5880 Digital Position Readout, 2-Axis Shooting Star for X3 Mill
- This DRO kit is specifically made for the C4/SC4 bench lathe tailstocks
- Mounts right to the back of the tailstock to give you accurate quill depth readings
- Resolution: 0.001", accuracy: 0.001"
- Buttons for on/off, zero, and inch/mm
- Handwheel: 80 mm OD, 8 mm bore, 2 mm key

2664 Digital Position Readout, 2-Axis Shooting Star
- This DRO uses a precision rack and anti-backlash pinion, with an optical encoder on the pinion.
- Power: 120VAC.
- This DRO includes one 48" scale and two 16" scales. The scales are easily shortened to suit your machine. It will fit on the mini mill with a power feed installed.

5879 Digital Position Readout, Mini Lathe Tailstock
- This DRO kit is specifically made for the 7x10, 7x12, 7x14 and 7x16 mini lathe tailstocks
- Mounts right to the back of the tailstock to give you accurate quill depth readings
- Resolution: 0.0001", accuracy: 0.001"
- Buttons for on/off, zero, and inch/mm

5596 Digital Position Readout, 24" (600 mm) With Display
- Precision Travel: 12" (300 mm) with Display
- Includes the digital display unit, 3 scales, and mounting hardware
- Resolution: 0.01mm/0.0005"
- Accuracy: 0.04mm/0.002"
- These units are significantly more robust than other inexpensive scales that are available. There are no batteries in the scale units, and the scale units are permanently wired. No square rubber plugs to cause issues.

Each display unit contains two CR2032 lithium batteries for long life.

5012 DRO Scale, 12" (300 mm) with Display
- 12" travel stainless steel scale
- Stackable display unit
- Mounting arm
- Displays in inches or mm

5000 Bed Extension Kit 16"
- Precision ways are approximately 28-3/8" long
- Rack is approximately 17-3/4" long
- Lead screw is approximately 29-5/16" long

This lathe bed extension kit turns your 7x10, 7x12, or 7x14 lathe into a 7x16 lathe. This lathe conversion kit includes a bed casting, a lead screw, a rack, a motor mount, a chip pan, 2 chip pan braces, several fasteners, and complete instructions. The 7x16 bed is actually 8" longer than the 7x10 bed. It is 4" longer than the 7x12 bed. This is NOT a bolt-together kit. You must drill and tap 9 holes in the new bed casting to match your lathe. You need three metric taps: M3x0.5, M6x1, and M8x1.25. If you don't have metric drills, you can use letter and number drills for tap drills. (The sizes are given in the instructions.)

1928 Bed Extension Kit 14"
- HiTorque Mini Lathes
- Tap & Tap Drill Kit

1617 Tap & Tap Drill Kit
- For 7x10 and 7x12 Mini Lathe
- Incorporates XMT-1125 controller
- 120V 60Hz input

This mini lathe control box kit includes the plastic control box, the motor controller, the emergency stop switch, the F/O/R switch, the potentiometer, the fuse holder and fuse. This is a fully-assembled control box. Simply hook up the power and motor leads and go. Use this box to replace FC250/110V, and FC250BJ/110V, FC250J/110V boards. For 120V 7x10 and 7x12 C2 mini lathes

3200 Control Box Kit, Mini Lathe 230V
- Extended Cross Slide Travel Kit

4450 Extended Cross Slide Travel Kit
- This kit adds one inch to the travel of the lathe cross slide on 7x10 and 7x12 mini lathes. These are SIEG C2 and C3 lathes.
- The increased travel is away from the centerline of the lathe so you can work on larger diameter work pieces.
- This lathe conversion kit replaces the saddle and the cross slide feed screw, and it includes a spacer for the longer screw.

5366 Extended Cross Slide Travel Kit 20 TPI
- (Black Scales)
**Kits: Lathe Conversion Kits**

**2383 Feed Screw Parts, 20 TPI, Mini Lathe** $61.33

These parts change Grizzly, Harbor Freight, Homier, and Cummins mini lathes to 20 thread per inch feed screws on the cross slide and compound rest. Each rotation of the hand wheel will advance 0.050”.

**4047 Feed Screw Parts, Metric, Bench Lathe** $87.42

- Fits HiTorque Bench Lathe
- Fits SIEG C4 and SC4 lathes

These parts change the cross slide and compound feed screws, and the carriage dial to metric.

**3446 Metal Gear Kit, Mini Lathe Complete** $209.95

- Changes every plastic gear on the mini lathe to metal
- Metal change gear set
- Metal 2-speed transmission gears
- Metal lead screw drive gears
- Metal 80-tooth gears

This mini lathe gear kit changes every plastic gear on a mini lathe to steel. You will never break a plastic gear again.

*NOTE* This set is designed for the older SIEG C2 lathes (see compatibility tab). If you own a HiTorque mini lathe, see product 3938 for metal gears.

**3454 Pinion, 25 Teeth, Metal** $11.83

**3493 Gear, 45 Teeth, Mini Lathe, Metal** $19.62

**3450 Gear, 80 Teeth, Mini Lathe, Metal** $25.63

**3455 Pinion, 20 Teeth, Metal** $11.71

**3448 Metal Transmission Gear Kit, Mini Lathe & 3MT Mini Mill** $62.95

- Replaces both plastic transmission gears with metal
- Fits mini lathes and 3MT mini mills
- Small Gear: 12 Teeth / 20 Teeth, 12 mm Bore, 4 mm Keyway
- Large Gear: 21 Teeth / 29 Teeth, 30 mm Bore, 5 mm Keyway

Once this steel gear set is installed on your mini lathe or mini mill, you will no longer have to worry about breaking the hard-to-replace gears inside the headstock. On the mini lathe, the parts are cast and should not break as often. On the mill, the belt drive ensures that expensive parts don’t break from overloads. On the mini mill, the easy-to-replace intermediate gear on top of the headstock is still plastic. This helps to ensure that you don’t break expensive and hard to replace parts. The smaller in this set is smaller of the two transmission gears. It has 12 Teeth on one end and 20 teeth on the other. The larger of the two is the larger of the two transmission gears. It has 21 Teeth on one end and 29 teeth on the other.

**3451 Gear, 2-Speed Intermediate Shaft, Metal** $34.27

**3452 Gear, Intermediate 30 Teeth, Mini Mill, Metal** $18.41

**3456 Gear, R8 Spindle No. 2, Mini Mill, Metal** $17.52

**4967 Gear, Saddle Drive, Bench Lathe** $22.53

**3449 Transmission Gear Kit, R8 Mini Mill, Metal** $59.57

**1690 Metric Threading Kit 12”** $62.00

- Metric threading kit for 7x12 mini lathes
- Fits HiTorque, SIEG, and other 7x12 mini lathes

Metric threading kit for 7x12 mini lathes. This kit replaces the lead screw and half nuts so you can more easily cut metric threads. You cannot use a threading dial with this kit installed. There is no metric threading dial. See the Compatibility tab for machines known to work with this product.

**1691 Metric Threading Kit 10”** $57.63

**2026 Metric Threading Kit 14”** $64.81

**4877 Metric Threading Kit 16”** $66.74

**2592 Power Switch Upgrade Kit** $4.95

- Heavy duty switch
- Five times the rated life of the standard switch
- Switch rated at 16 A at 120/250 VAC
- No soldering required to install

This is an upgrade kit for the illuminated power switch on Harbor Freight mini lathes. The kit includes an upgraded switch, two crimp terminals, and a multi-stack quick disconnect. You have to un-solder the old switch, but the crimp terminals eliminate soldering during installation.

**2018 Tailstock Cam Lock Kit** $29.95

This kit converts a standard mini lathe tailstock to lock by lever action. This camlock action locks the tailstock to the ways by moving a lever about 45 degrees. You must drill one 1/2” hole in the back of the tailstock casting. This lathe cam lock kit is made from heat treated 4140 steel for long life.

**2634 Tweaks & Enhancements Kit, Mini Lathe** $21.97

- Several small items to make your lathe work better and last longer
- Easier gib and saddle retainer adjustment
- Fewer busted knuckles
- Quickier gear cover removal
- Fewer tailstock clamp jams

The Mini Lathe Tweaks & Enhancements Kit™ can make a big difference in the operation of your mini lathe. The kit includes the following:

- Hardened lathe chuck mounting nuts for long life.
- Self-locking set screws for the cross slide and compound rest
- Self-locking cap screws for the carriage retainers
- Button-head cap screws for the cross slide and compound rest crank handles.
- Thumbscrews for the change gear cover.
- A spring for the tailstock clamp.
- A rubber boot to protect the F/O/R switch on 7x10 and 7x12 mini lathes.
- A rubber guard to prevent chips from getting into the motor speed control enclosure.

Complete instructions

**3940 Tweaks & Enhancements Kit, HiTorque Mini Lathe** $19.95

**Kits: Lathe Starter Kits**

**1261 Starter Kit, Mini Lathe, 5/16” Tool Bits** $31.85

- 0-1/2” Capacity Drill Chuck and key
- Drill chuck arbor 2MT short to 33JT
- Five 5/16” M2 high speed steel tool bit blanks
- Four center drills, sizes 1, 2, 3, and 4

Mini Lathe starter kit designed for 7x10, 7x12 and 7x14 mini lathes and includes all the basics you need to get started with a new mini lathe.

Drill Chuck: 0-1/2” Capacity drill chuck. All working parts are hardened. Chuck key is included. Number 33 Jacobs taper mount. Runout of this chuck is 0.008” (0.20 mm) or less.

This mini lathe starter kit is specifically designed for use on the mini lathe tailstock. The rated capacity of the drill chuck is 1 mm (0.039”) to 13 mm (0.512”).

Tool Bits: 5/16” square by 2-1/2” long HSS mini lathe tool bits made of M2 high speed steel. The tool post on most mini lathes are sized to use 5/16” tool bits.

Center Drills: Four sizes combined drills and countersinks made of high speed steel. Sizes 1, 2, 3, and 4 with 60 degree counter sinks.

**1796 Starter Kit, Lathe, 3/8” Tool Bits** $33.82

<td>This package contains all the tooling you need to be productive with your HiTorque deluxe mini lathe. The package does not include a quick change tool post because there is one on the model 4200/5200/7350 lathe. The 1/2” capacity drill chuck is mounted on a short 2 Morse taper shank for the mini lathe. This chuck is specifically designed for the mini lathe tailstock. The rated capacity of the drill chuck is 1 mm (0.039”) to 13 mm (0.512”). The set of indexable turning tools includes 5 tools (TAR, TAL, TBR, TBL, TE), inserts, a wrench, and extra screws. It comes in a wooden case. The carbide inserts are TCM21.5. The carbide tipped 9-piece boring bar set includes three different length boring bars each for minimum bores of 5/16”, 3/8”, and 7/16”. The bore depth ranges from 3/4” to 2-1/4”. The heat treated, alloy steel shanks are held to 0.000 to -0.0005” from the nominal diameter. The P1 parting blade is 1/16” x 1/2” x 4-1/2” and made from M2 HSS. These T-shape parting blades provide great side clearance. This mini lathe tooling package includes 4 different sizes of combined drills and countersinks, commonly called center drills. The center drill set is high speed steel and includes sizes 1, 2, 3, and 4. These are 60 degree center drills. These are the sizes that are most used by bench top machinists.</td>

| **5125 Tooling Package, Deluxe Mini Lathe** Premium $158.78 |
| ● 1/2” professional grade drill chuck |
| ● 2MT standard to 33JT drill chuck arbor |
| ● 3/8”- 6” long indexable boring bar – CCMT inserts |
| ● 3/8” indexable TCMT carbine inserts |
| ● Premium P1 cut-off blade, 5 center drills |
| This package contains our best versions of all the tooling you need to be productive with your HiTorque deluxe mini lathe. The package does not include a quick change tool post because there is one on the model 4200/5200/7350 deluxe lathe. Drill Chuck: The 1/2” capacity professional grade drill chuck is mounted on a short 2MT shank for the mini lathe. Specifically designed for the mini lathe tailstock, the rated capacity is 1 mm (0.039”) to 13 mm (0.512”). All working parts are hardened. Chuck key included. Number 33 Jacobs taper mount. This chuck is comparable to a Jacobs 34-33 heavy duty drill chuck, including the runout specification of 0.004” (0.10 mm) or less. Indexable Inserts: Indexable turning tools are made by AR Warner Co. in the USA. These Warner precision tool holder kits use carbide inserts and include three styles of tools, AR right hand, E Neutral (threading tool - 60” angle), and AL left hand. Kit includes three tool holders, TCMT inserts, one extra turning tool holder kit, one extra TCMT-21.52 carbide insert, one extra CCMT insert, and one wrench. Boring Bar: This 3/8” diameter indexable boring bar uses CCMT inserts and is 6” long. The minimum bore diameter for this is 0.50”. The boring bar takes CCMT 21.51 or CCMT 21.52 inserts. Cut-Off Blade: The premium P1 parting blade is 1/16” x 1/2” x 4-1/2” and made from M2 HSS by Arthur R. Warner Co. in the USA. These T-shape parting blades provide great side clearance. Center Drills: Five sizes combined drills and countersinks made of high speed steel. Sizes 1, 2, 3, 4, and 5 with 60 degree counter sinks. |

| **5680 Tooling Package, Grizzly G0765 Mini Lathe** $225.95 |
| ● Specific items for 7x14 from Grizzly, Real Bull, and Big Dog |
| ● 3/8” indexable TCMT inserts, P1N cut-off blade |
| ● 9-piece carbide boring bar set - 3/8” shank |
| ● 1/2” drill chuck, 2MT standard to 33JT drill chuck arbor |
| ● 4 center drills (sizes 1-4) |
| This mini lathe tooling package contains all the tooling you need to be productive with your 7x14 mini lathe on the first day you own it. The Tormach 0XQ quick change tool post set (QCTP). This mini lathe tooling package includes the tool post and the following tool holders: 2 - #1 Turning & Facing - #2 Boring, Turning & Facing - #4 Heavy Duty Boring - #7 Universal Parting Blade (for 1/2” inch cut-off blade - horizontal) The wedge type quick change tool post is made of all steel and all working parts are hardened and ground. No tools are required to change tools. Additional tool holders are available. The tooling tool holders accept tools with 1/4” to 1/2” shank. The boring tool holder accepts boring bars with 3/8” or 1/2” round shanks. The cut-off tool holder holds 1/2” tail parting blades. The 1/2” capacity drill chuck is mounted on a short 2 Morse taper shank for the mini lathe. This chuck is specifically designed for the mini lathe tailstock. The rated capacity of the drill chuck is 1 mm (0.039”) to 13 mm (0.512”). The set of indexable turning tools includes 5 tools (TAR, TAL, TBR, TBL, TE), inserts, a wrench, and extra screws. It comes in a wooden case. The carbide inserts are TCM21.5. The carbide tipped 9-piece boring bar set includes three different length boring bars each for minimum bores of 5/16”, 3/8”, and 7/16”. The bore depth ranges from 3/4” to 2-1/4”. The heat treated, alloy steel shanks are held to 0.000 to -0.0005” from the nominal diameter. The P1 parting blade is 1/16” x 1/2” x 4-1/2” and made from M2 HSS. These T-shape parting blades provide great side clearance. This mini lathe tooling package includes 4 different sizes of combined drills and countersinks, commonly called center drills. The center drill set is high speed steel and includes sizes 1, 2, 3, and 4. These are 60 degree center drills. These are the sizes that are most used by bench top machinists. |

| **4857 Tooling Package, HiTorque Bench Lathe** $310.95 Premium |
| ● 0XQ QCTP set with post mount for SC4 lathes |
| ● 1/2” professional grade 9-piece drill chuck, 2MT standard to 33JT drill chuck arbor |
| ● 1/2” indexable boring bar - CCMT inserts |
| ● 3/8” indexable TCMT carbine inserts |
| ● Premium P1 cut-off blade, 5 center drills |
| This tooling package contains premium quality tooling for a C4, SC4 or LittleMachineShop.com HiTorque 8.5x16 bench lathes. Includes a 0XQ (Series 000) quick change tool post set (QCTP). This set includes the tool post and the following tool holders: 2 - #1 Turning & Facing - #2 Boring, Turning & Facing - #4 Heavy Duty Boring - #7 Universal Parting Blade (for 1/2” inch cut-off blade - horizontal) QCTP features all steel construction and wedge type tool post for better clamping and repeatability. All working parts are hardened, ground and sealed. Designed for lathes with limited distance from the top of the compound to the center of the lathe. This tool post mounts with an M12/M10 stud for C4 and SC4 lathes, which is included. The 1/2” capacity professional grade tooling package is mounted on a short 2MT shank for the mini lathe. Specifically designed for the mini lathe tailstock, the rated capacity is 1 mm (0.039”) to 13 mm (0.512”). All working parts are hardened. Chuck key included. Number 33 Jacobs taper mount. This chuck is comparable to a Jacobs 34-33 heavy duty drill chuck, including the runout specification of 0.004” (0.10 mm) or less. Indexable Inserts: Indexable turning tools are made by AR Warner Co. in the USA. These Warner precision tool holder kits use carbide inserts and include three styles of tools, AR right hand, E Neutral (threading tool - 60” degree angle), and AL left hand. Kit includes three tool holders, TCMT inserts, one extra turning tool holder kit, one extra TCMT-21.52 carbide insert, one extra CCMT insert, and one wrench. Boring Bar: This 3/8” diameter indexable boring bar uses CCMT inserts and is 6” long. The minimum bore diameter for this is 0.50”. The boring bar takes CCMT 21.51 or CCMT 21.52 inserts. Cut-Off Blade: The premium P1 parting blade is 1/16” x 1/2” x 4-1/2” and made from M2 HSS by Arthur R. Warner Co. in the USA. These T-shape parting blades provide great side clearance. Center Drills: Five sizes combined drills and countersinks made of high speed steel. Sizes 1, 2, 3, 4, and 5 with 60 degree counter sinks. |
Kits: Lathe Starter Kits

3389 Tooling Package, HiTorque Deluxe Bench $156.82

- Premium tooling package for deluxe bench lathe
- 1/2" professional grade drill chuck, 2MT standard to 33JT drill chuck arbor
- 1/2" indexable boring bar - CCMT inserts
- 3/8" indexable TCMT carbide inserts
- Premium P1 cut-off blade, 5 center drills

This tooling package contains premium quality tooling for a C4, SC4 or LittleMachineShop.com HiTorque bench lathes. The 1/2" capacity professional grade drill chuck is mounted on a short 2MT shank for the mini lathe. Specifically designed for the mini lathe tailstock, the rated capacity is 1 mm (0.039") to 13 mm (0.512”). All working parts are hardened. Chuck key included. Number 33 Jacobs taper mount. This chuck is comparable to a Jacobs 34-33 heavy duty drill chuck, including the runout specification of 0.004" (0.10 mm) or less. Indexable turning tools are made by Arthur R. Warner Co. in the USA. These precision tool holder kits use carbide inserts and include three styles of tools, AR right hand, E Neutral (threading tool - 60 degree angle), and AL left hand. Kit includes three tool holders, TCMT inserts, one extra TCMT-21.52 carbide insert, one extra Torx screw, and one wrench.1/2” diameter indexable boring bar uses CCMT inserts and is 7” long. The minimum bore diameter for this is 0.625”. The boring bar takes CCMT 32.51 or CCMT 32.52 inserts. The premium P1 parting blade is 1 1/16” x 1/2” x 4-1/2” and made from M2 HSS by Arthur R. Warner Co. T-shape parting blades provide great side clearance. Five sizes combined drills and countersinks made of high speed steel. Sizes 1, 2, 3, 4, and 5 with 60 degree counter sinks. This tooling package does not include a quick change tool post because the HiTorque Deluxe Bench Lathe is equipped with a QCTP.

4116 Tooling Package, Mini Lathe Premium $299.95

- Tormach 0XA (Series 000) QCTP set
- 1/2" professional grade drill chuck, 2MT standard to 33JT drill chuck arbor
- 3/8"- 6" long Indexable boring bar - CCMT inserts
- 3/8” indexable TCMT carbide inserts
- Premium P1 cut-off blade, 5 center drills

This package contains our best versions of all the tooling you need to be productive with your 7x10, 7x12, 7x14, or 7x16 mini lathe. QCTP: The 0XA (Series 000) quick change tool post features all steel construction and wedge type tool post for better clamping and repeatability. All working parts are hardened and ground. Sealed for maintenance-free operation. Tool holders designed for mini lathes and other lathes with limited distance from the top of the compound to the center of the lathe. This tool post mounts with an M10 stud, which is included. This set includes the tool post and the following tool holders: 2 - #1 Turning & Facing 1 - #2 Boring, Turning & Facing 1 - #4 Heavy Duty Boring will hold both 3/8” and 1/2” boring bars 1 - #7 Universal Parting Blade (for 1/2 inch cut-off blade - horizontal) Drill Chuck: The premium P1 parting blade is 1 1/16” x 1/2” x 4-1/2” and made from M2 HSS by Arthur R. Warner Co. T-shape parting blades provide great side clearance. Five sizes combined drills and countersinks made of high speed steel. Sizes 1, 2, 3, and 4 with 60 degree counter sinks. This mini lathe tool set includes the tool post and the following tool holders:

5207 Tooling Package, Mini Lathe, 0XA QCTP $225.95

- QCTP Set easily mounts to 7x10, 7x12, 7x14, 7x16 lathes
- 3/8” indexable TCMT inserts, P1N cut-off blade
- 9-piece carbide boring bar set - 3/8” shank
- 1/2” drill chuck, 2MT short to 33JT drill chuck arbor
- 4 center drills (sizes 1-4)

This package contains all the tooling you need to be productive with your 7x10, 7x12, 7x14 or 7x16 mini lathe on the first day you own it. The 0XA quick change tool post set (QCTP).

This mini lathe tool set includes the tool post and the following tool holders:

- 2 - #1 Turning & Facing
- 1 - #2 Boring, Turning & Facing
- 1 - #4 Heavy Duty Boring will hold both 3/8” and 1/2” boring bars
- 1 - #7 Universal Parting Blade (for 1/2 inch cut-off blade - horizontal)

The wedge type quick change tool post is made of steel and all working parts are hardened and ground. No tools are required to change tools. Additional tool holders are available. The turning tool holders accept tools with 1/4” to 1/2” shank. The boring tool holder accepts boring bars with 3/8” or 1/2” round shanks. The cut-off tool holder holds 1/2” tall parting blades. The 1/2” capacity drill chuck is mounted on a short 2 Morse taper shank for the mini lathe. This chuck is specifically designed for the mini lathe tailstock. The rated capacity of the drill chuck is 1 mm (0.039") to 13 mm (0.512”).

The set of indexable turning tools includes 5 tools (TAR, TAL, TBR, TBL, TE), inserts, a wrench, and extra screws. It comes in a wooden case. The carbide inserts are TCMT21.51.

The carbide tipped 9-piece boring bar set includes three different length boring bars each for minimum bores of 5/16”, 3/8”, and 7/16”. The bore depth ranges from 3/4” to 2-1/4”. The heat treated, alloy steel shanks are held to 0.000 to -0.0005” from the nominal diameter.

The P1 parting blade is 1 1/16” x 1/2” x 4-1/2” and made from M2 HSS. These T-shape parting blades provide great side clearance. This package includes 4 different sizes of combined drills and countersinks, commonly called center drills. The center drill set is high speed steel and includes sizes 1, 2, 3, and 4. These are 60 degree center drills. These are the sizes that are most used by bench top machinists. Get the right tools for your mini lathe at LittleMachineShop.
Kits: Lathe Starter Kits

3527 Tooling Package, Small Lathe $248.19
- AXA (Series 100) Quick Change Tool Post Set
- 1/2” Indexable TCMM Inserts, P1X Cut-Off Blade
- 1/2” Drill Chuck, 2MT Standard to 33JT Drill Chuck Arbor
- 9-piece carbide Boring Bar Set - 1/2” Shank
- 5 Center Drills (sizes 1-5)
This package contains all the tooling you need to be productive with your lathe on the first day you own it. The AXA (Series 100) quick change tool post set (QCTP) includes the tool post, mounting hardware, a turning & facing tool holder, a boring, turning & facing tool holder, a heavy duty boring bar holder, a universal parting blade holder, and a knurling, facing & turning tool holder. The quick change tool post is made from hardened steel. No tools are required to change tools. Additional tool holders are available. It requires some level of work, tapping a hole, or making a T-slot nut, to mount this QCTP on your lathe. The turning tool holders accept tools with 3/8” to 1/2” Shank. The boring and turning tool holder accepts boring bars with up to 1/2” round shanks. The cut-off tool holder holds 1/2” tall parting blades. The 1/2” capacity drill chuck is mounted on a standard 2 Morse taper shank. The rated capacity of the drill chuck is 1 mm (0.039”) to 13 mm (0.512”). The set of 1/2” Shank indexable turning tools includes 5 tools (TAR, TAL, TBR, TBL, TE), inserts, a wrench, and extra screws. It comes in a fitted case. The carbide inserts are TCMM-321. The carbide tipped 9-piece boring bar set includes three different length boring bars each for minimum bores of 5/16”, 3/8”, and 7/16”. The bore depth ranges from 3/4” to 2-1/4”. The heat treated, alloy steel shanks are held to 0.000 to -0.0005” from the nominal diameter. The P1 parting blade is 1/16” x 1/2” x 4-1/2” and made from M2 HSS. These T-shape parting blades provide great side clearance. This package includes 5 different sizes of combined drills and countersinks, commonly called center drills. The center drill set is high speed steel and includes sizes 1, 2, 3, 4, and 5. These are 60 degree center drills. These are the sizes that are most used by bench top machinists.

Kits: Mill Conversion Kits

2258 Air Spring Conversion Kit $45.85
- Converts torsion spring mini mills to air spring
- Allows travel to the top of the column
- Provides better support for the mill head
Convert torsion spring mini mills to air spring. Most mini mills use a torsion spring mounted on the side of the column to support the head. This air spring conversion kit provides all the parts required to change to a vertical air spring that mounts inside and above the column. With the air spring installed, you can move the mill head up to the casting is always flush to the size of the column. You can move it down until it almost contacts the adjustable z-axis stop set in its lowest position. Besides all the parts required to mount the air spring, this kit also includes a longer Z-axis rack so you can take advantage of the longer head motion.

4005 Air Spring Conversion Kit, HiTorque Mini Mills $64.05

2560 Belt Drive Conversion Kit, Mini Mill $154.95
- No more broken drive gears
- Much quieter operation
- Spindle speed up to 4300 RPM
- Ideal for manual and CNC mini mills
This mini mill belt drive conversion kit provides an easy-to-install alternative to the noisy and fragile factory-installed gears that drive the spindle on the mini mill. This kit is CNC-machined from the highest quality materials. Designed to run full-time, it is built to last. The CNC belt drive conversion kit includes one belt. Change speeds without any tools. Simply remove the guard, loosen the lever locks and move the belt from one pair of pulleys to the other. Low speed range is 0-1700 RPM. High speed range is 0-4300 RPM. The installation is bolt-on and takes about 20 minutes. This CNC belt drive kit fits the mills shown on the Compatibility tab. Don’t expect it to fit other machines. The small pulley has a 9 mm bore with a 3 mm keyway. The large pulley has a 30 mm bore with a 5 mm keyway. If your shafts don’t match these values, then this belt drive will not fit your mill.

Air Spring Conversion Kit

4795 Belt Drive Shield, Mini Mill, Plastic $4.95

2657 Y-Belt, 2L130 for Mini Mill Belt Drive Kit $5.95

4213 CNC Spindle Control Upgrade Kit, Mini Lathe and Mini Mill $125.62
- Converts brushless DC drive to CNC control
- Provides speed, on/off, and direction control
- For 500 watt Brushless DC drive, 120V 60Hz
- Compatible with SEEG SX2 and HiTorque mini mills
- Compatible with SEEG SC2 and HiTorque mini lathes
This CNC spindle control kit consists of a small circuit board that replaces the circuit board with the speed control potentiometer, plus a replacement chip for the motor controller card. This conversion kit works on many SEEG SX2 and HiTorque mini mills as well as SEEG SC2 and HiTorque mini lathes. See the Compatibility tab for machines that work with this product.

4645 CNC Spindle Control Upgrade Kit for Small Mill and Bench Lathe $125.62

Air Spring Conversion Kit

4951 CNC Spindle Control Upgrade Kit for Small Mill and Bench Lathe 230V $125.62

1764 Feed Screw Parts, 20 TPI, Mini Mill $61.20
These parts change Grizzly, Homier, Cummins, and Harbor Freight mini mills to 20 thread per inch feed screws on the X- and Y-axis. Each rotation of the hand wheel will advance the table 0.050”. The mini mill tool kit includes two feed screws, two nuts, two 50 division dials, plus the springs and keys that you are going to lose during disassembly. This mini mill conversion kit has the correct screw to work with the mini mill power feed.

1989 Metric Kit, Mini Mill $71.28

Large Table Solid Column Conversion Kit, Mini Mill $499.95
- Converts a tilting column mini mill to the large table solid column version
- 30% more travel in both directions
- 30% more table area
- Solid column is significantly more rigid
This kit converts a tilting column mini mill to a large table with a solid column. The kit includes the X-Y table and column from the HiTorque Solid Column Mini Mill (part number 3990), the fasteners needed to connect them. This kit contains a complete X-Y table assembly for a mini mill. The table is 120 mm (4.73”) by 460 mm (18.11”). It has three 12 mm T-slots. The X-axis travel is 300 mm (11.8”) and the Y-axis travel is 130 mm (5.1”). The dials are graduated in 0.001” and one turn of the hand wheels moves the table 0.050”. The X-Y table is made of cast iron and steel. There are adjustable gibbs on both axes.

5855 Long Table Kit, Bench Mill $347.53
- Extra long table for Bench Mill, X2.7 and SX2.7 mills
This extra long table mill fits the LittleMachineShop.com 5500 Bench Mill, the SIEG X2.7 and SIEG Super SX2.7 mills. The kit comprises a table and feed screw plus a larger saddle. It includes all the small parts required to install it. The table is 27.5” x 6.25” (595 mm x 140 mm). The kit requires drilling a few holes.
Kits: Mill Conversion Kits

2642 Long Table Kit, Micro Mill
- Table is 400 mm x 145 mm
- X-Axis travel is 330 mm
- Provides 150 mm more X-axis travel
This kit adds a larger table, and increases the X-axis travel to 330 mm on the Harbor Freight 47158 micro mill. The conversion kit includes a new table and 20 TPI X-axis screw.

3492 Long Table Kit, Micro Mill, Metric

3845 Long Table Kit, Super X3L
- Extra long table for X3 S3X mills
This extra long mill table fits both SIEG X3 and SIEG Super X3 mills and comes complete with an extra long feed screw and rule which may be fitted to the front of the table with the rivets supplied.
The table is 700 mm x 160 mm.

1625 Spindle Conversion Kit, R8
- This kit converts a Grizzly or Micro-Mark mini mill to an R8 spindle
The kit includes: R8 spindle-Two spindle gears-Two spacing rings-Two keys-One bearing-One drawbar-Complete instructions

2823 Spindle Conversion Kit, 3MT

2635 Tweaks & Enhancements Kit, Mini Mill
- Several small items to make your mini mill work better and last longer
- Easier gib adjustment
- Fewer stripped locking levers
- Easier backlash adjustment
- Cleaner T-slots
The Mini Mill Tweaks & Enhancements Kit™ can make a big difference in the operation of your mini mill. The kit includes the following: Improved (German-made) locking levers for the X-, Y-, and Z-axes. Self-locking adjustment nuts for the X-, Y-, and Z-axis gibs. Self-locking adjustment nuts for the X-, and Y-axes. A T-slot cleaner. Complete instructions

5069 Upgrade Kit, Mini Mill
- Includes 2258 Air Spring Kit and 2560 Mini Mill Belt Drive Kit
- Much quieter operation
- Spindle speed up to 4300 RPM
- Allows travel to the top of the column while providing better support for the mill head
- No more broken drive gears
Do not buy this milling machine upgrade kit if you have a HiTorque Mini Mill. Most of all these features are already included on the HiTorque mills. This mini mill kit provides an easy-to-install alternative to the noisy and fragile factory-installed gears that drive the spindle on the machine. The kit includes one belt. Change speeds without any tools. Simply remove the guard, loosen the lever locks and move the belt from one pair of pulleys to the other. Low speed range is 0-1700 RPM. High speed range is 0-4300 RPM. This belt drive fits the following mills: Grizzly G0516 Lathe Mill Combo Cummins 7877 Mini Mill Grizzly G8689 Mini Milling Machine Harbor Freight 44991 Central Machinery Mini Mill/Drill Hare & Forbes HM-10 Mini Mill Drill Homier 03947 Speedway Mini Mill Micro-Mark 82573 MicroLux Milling Machine The small pulley has a 9 mm bore with a 3 mm keyway. The large pulley has a 30 mm bore with a 5 mm keyway. If your shafts don't match these values, then this belt drive will not fit your mill. Convert torsion spring mini mills to air spring. This mini mill kit provides all the parts required to change to a vertical air spring that mounts inside and above the column. With the air spring installed, you can move the mill head up until the top of the casting is almost flush with the top of the column. You can move it down until it almost contacts the adjustable Z-axis stop set in its lowest position. This air spring has about 35 pounds of force. This is not enough to totally support the head, but it is a heck of a lot more support than the torsion arm provides.

Kits: Mill Starter Kits

2653 Starter Kit, Micro Mill
- This kit contains the basics you need to start using your new micro mill
- 36-piece clamping kit for 5/16" (8 mm) T-slots
- Thin parallels (3’ long)
- 1-2-3 blocks
- Edge and center finder
This kit contains the basics you need to start using your new micro mill. The clamping kit fits the 8 mm T-slots on the micro mill. The clamping kit includes 10 #6 studs, 4 step block pairs, 6 T-slot nuts, 6 flange nuts, and 6 step clamps. The thin parallels are a set of 10 matched pairs of high grade steel parallels, precision ground and hardened. The parallels are 1/8" thick and 3" long. The heights are 1/2", 5/8", 3/4", 7/8", 1", 1-1/8", 1-1/4", 1-3/8", 1-1/2", and 1-5/8". They are made of high grade alloy steel hardened to 52 to 58 Rc and are parallel within 0.0002" on the top and bottom. The pairs are matched in height within 0.0004". The precision 1-2-3 blocks are ground and case hardened on all sides to 50-60 Rc. The blocks are 1" by 2" by 3". They are parallel within 0.0002", flat within 0.0002" and square within 0.0002". Each set includes two matched blocks. The blocks have 23 holes through them, 5 are threaded 3/8"-16 NC. The 3/8" diameter combination edge and center finder helps you locate work on your mill. The edge finder end has a 0.200" diameter cylinder to quickly find the edge of a work piece. The center finder end tapers to a point to locate holes. The edge and center finder is hardened and ground all over.

1262 Starter Kit, X2/SX2 Mini Mill
- Clamping kit for 7/16" (12 mm) T-slots
- Thin parallels (6’ long)
- 1-2-3 blocks
- Edge and center finder
- T-slot cleaner
This milling machine kit contains the basics you need to start using your new mini mill. This Mini Mill Starter Kit includes:
T-Slot Clamping Kit 7/16" - 58-piece clamping kit 3/8"-16, 7/16 T-Slot. This clamping kit fits the 12 mm T-slots on the mini mill. The clamping kit includes 24 3/8-16 studs, 12 step blocks in pairs, 6 T-slot nuts, 6 flange nuts, 4 coupling nuts, and 6 end hold downs. Clamping kit comes in a wall mount rack. Thin parallels combo set - 10 matched pairs of high grade steel parallels, precision ground and hardened. Parallels are 1/8" thick and 6" long. Heights are 1/2", 5/8", 3/4", 7/8", 1", 1-1/8", 1-1/4", 1-3/8", 1-1/2", and 1-5/8". Made of high grade alloy steel hardened to 52 to 58 Rc. Parallel within 0.0002" on the top and bottom. The pairs are matched in height within 0.0004". Set comes in a durable plastic fitted case. 1-2-3 Blocks - These precision 1-2-3 blocks are ground and case hardened on all sides to 50-60 Rc. The blocks are 1" by 2" by 3". They are parallel within 0.0002", flat within 0.0002" and square within 0.0002". Each set includes two matched blocks. The blocks have 23 holes through them, 5 are threaded 3/8"-16 NC. The 3/8" diameter combination edge and center finder helps you locate work on your mill. The edge finder end has a 0.200" diameter cylinder to quickly find the edge of a work piece. The center finder end tapers to a point to locate holes. The edge and center finder is hardened and ground all over.
Kits: Mill Starter Kits

3491 Tooling Package, 2MT Micro Mill
$324.95

- 3" toolmakers screwless vise and 10 pairs of 3" long thin parallels
- Precision 1-2-3 Blocks and 36-piece Clamping Kit - 8 mm T-slot
- Two 6-piece end mill sets, 2 & 4 flute and 5 center drills
- Seven piece 2MT collet set
- Combination edge and center finder

Tooling package with all the essentials for a 2MT micro mill. Toolmakers Vise: 3" toolmakers screwless vise has a one-piece body. The body and jaws are hardened to Rc 58-62. All sides are flat, square and parallel to 0.0002". There are horizontal and vertical veins on the inside face of the movable jaw to hold round objects. The vise jaws are 1.38" deep and open to 3.78" capacity. The vise is 7.28" long, 2.76" tall and 2.785" wide. Thin Parallels: Set of ten pairs, 1/8" thick x 3" long, in fitted case. Made of high-grade alloy steel hardened to 52-58 Rc, parallel within 0.0002" on top and bottom. Parallel heights: 1/2", 5/8", 3/4", 7/8", 1", 1-1/8", 1-1/4", 1-3/8", 1-1/2", and 1-5/8" (pairs matched within 0.0004"). Clamping Kit: 36-piece kit fits 8 mm T-slots on a micro mill. Includes 10 M6 studs, 4 step block pairs, 6 T-slot nuts, 6 flange nuts, and 6 step clamps. End Mills: 6-piece 4 flute & 6-piece 2 flute, HSS, center cutting end mill sets. Sizes 1/8", 3/16", 1/4", 5/16", 3/8", and 1/2". All with 3/8" shanks. 2MT Collets: Set of seven high-grade tool hardened steel round collets, sizes 1/8", 3/16", 1/4", 5/16", 3/8", 7/16", and 1/2". The drawbar thread is 3/8"-16. This set includes all the sizes required for common end mills. 1-2-3 Blocks: Ground and hardened on all sides to 50-60 Rc, sizes 1" x 2" x 3". Parallel within 0.0002", flat within 0.0002", and square within 0.00021". Set has two matched blocks, 23 holes of which 5 are threaded 3/8"-16 NC. Center Drills: Five sizes combined drills and countersinks made of high speed steel. Sizes 1, 2, 3, 4, and 5 with 60 degree counter sinks.

(800) 981 9663  LittleMachineShop.com  Page 36

4759 Tooling Package, ER-16 Micro Mill
$299.98

- 3" toolmakers screwless vise and 10 pairs of 3" long thin parallels
- Precision 1-2-3 blocks and 36-piece clamping kit - 8 mm T-slot
- Two 6-piece end mill sets, 2 & 4 flute and 5 center drills
- Five piece ER-16 collet set
- Combination edge and center finder

Tooling package with all the essentials for an ER-16 Micro Mill. Toolmakers Vise: 3" toolmakers screwless vise has a one-piece body. The body and jaws are hardened to Rc 58-62. All sides are flat, square and parallel to 0.0002". There are horizontal and vertical veins on the inside face of the movable jaw to hold round objects. The vise jaws are 1.38" deep and open to 3.78" capacity. The vise is 7.28" long, 2.76" tall and 2.785" wide. Thin Parallels: Set of ten pairs, 1/8" thick x 3" long, in fitted case. Made of high-grade tool hardened steel, sizes 1/8", 3/16", 1/4", 5/32", 3/32", and 1/8". All with 3/32" shanks. M42 Collets: Set of seven high-grade tool hardened steel round collets, sizes 1/32", 3/64", 1/16", 5/64", 3/32", 7/64", and 1/8". Parallel within 0.0002", flat within 0.0002", and square within 0.0002". Set has two matched blocks, 23 holes of which 5 are threaded 3/8"-16 NC. Center Drills: Five sizes combined drills and countersinks made of high speed steel. Sizes 1, 2, 3, 4, and 5 with 60 degree counter sinks.

5489 Tooling Package, R8 Bench Mill Premium
$629.95

- 4" Precision milling, professional and 10 pairs of thin parallels
- Thirteen piece R8 collets, Two six-piece M42 8% cobalt end mill set - 2 & 4 flute
- 58 - piece clamping kit - 3/8"-16, 7/16" T-slots
- Premium precision 1-2-3 blocks, five center drills - 60° countersinks
- Combination edge and center finder and a T-slot cleaner

Premium tooling package with all the best products for your R8 mini mill. Milling Vise: 4" Kurt-style professional milling vise with detachable 360° swivel base and easy to read divisions. Top, gib, jaws, swivel base, bottom of vise bed and all plate mounting surfaces are ground. The angle tight positive lock style jaws are interchangeable with industry standard machine vises, are hardened and ground, and can be mounted on either end of the fixed and movable jaw supports for a wide range of clamping distances. Overall length is 11.6" and the height is 3.1" without base, and 4.3" with base. Jaws are 3.15" wide, 0.9" deep, open 3", and are perpendicular to the ways within 0.00014" in 4". The ways are parallel to the base within 0.0003" without the swivel. Thin Parallels: Set of ten pairs, 1/8" thick. Made of high-grade alloy steel hardened to 52-58 Rc, parallel within 0.0003" on top and bottom. Parallel heights: 1/2", 5/8", 3/4", 7/8", 1", 1-1/8", 1-1/4", 1-3/8", 1-1/2", and 1-5/8" (pairs matched within 0.0004"). Clamping Kit: 36-piece kit fits 8 mm T-slots on a micro mill. Includes 16 M6 studs, 4 step block pairs, 6 T-slot nuts, 6 flange nuts, and 6 step clamps. End Mills: 6-piece 4 flute & 6-piece 2 flute, HSS, center cutting end mill sets. Sizes 1/8", 3/16", 1/4", 5/16", 3/8", and 1/2". All with 3/8" shanks. ER-16 Collets: Set of five ER-16 round collets. Sizes: 1/8", 3/16", 1/4", 5/16", 3/8" and 1/2". Made of high-grade tool hardened steel, ground to close tolerance, this set includes the sizes required for most common end mills. 1-2-3 Blocks: Ground and hardened on all sides to 50-60 Rc, sizes 1" x 2" x 3". Parallel within 0.0002", flat within 0.0002", and square within 0.00021". Set has two matched blocks, 23 holes of which 5 are threaded 3/8"-16 NC. Center Drills: Five sizes combined drills and countersinks made of high speed steel. Sizes 1, 2, 3, 4, and 5 with 60 degree counter sinks.

5671 Tooling Package, Grizzly G0758 Mill
$334.95

- 3" precision milling vise (heavy) and 10 pairs of 3" long thin parallels
- Precision 1-2-3 blocks and 20 piece end mill set - 2 & 4 flute (10 each)
- 58 - piece clamping kit - 5/16"-18, 3/8" T-slots
- Seven piece R8 collet set, five center drills - 60° countersinks
- Combination edge and center finder and a T-slot cleaner

Tooling package with all the essentials for an R8 mini mill. Milling Vise: 3" Kurt-style milling vise. Top, gib, jaws, bottom of vise bed and all plate mounting surfaces are ground. The angle tight positive lock style jaws are interchangeable with industry standard machine vises, are hardened and ground, and can be mounted on either end of the fixed and movable jaw supports for a wide range of clamping distances. Overall length is 10.85" and the height is 3.05". Jaws are 3.15" wide, 1.04" deep, open 3", and are perpendicular to the ways within 0.0002" in 4". The ways are parallel to the base within 0.0006" in 4" without the swivel. Thin Parallels: Set of ten pairs, 1/8" thick x 3" long, in fitted case. Made of high-grade alloy steel hardened to 52-58 Rc, parallel within 0.0002" on top and bottom. Parallel heights: 1/2", 5/8", 3/4", 7/8", 1", 1-1/8", 1-1/4", 1-3/8", 1-1/2", and 1-5/8" (pairs matched within 0.0004"). End Mills: 20 piece set included 2 flute and 4 flute center cutting TiN coated HSS end mills sizes 3/16" - 3/4" by 16ths. R8 Collets: Set of seven high-grade tool hardened steel, sizes 1/8", 3/16", 1/4", 3/8", 1/2", 5/8", 3/4", 1-2-3 Blocks: Ground and hardened on all sides to 50-60 Rc, sizes 1" x 2" x 3". Parallel within 0.0002", flat within 0.0002", and square within 0.00021". Set has two matched blocks, 23 holes of which 5 are threaded 3/8"-16 NC. Center Drills: Five sizes combined drills and countersinks made of high speed steel. Sizes 1, 2, 3, 4, and 5 with 60 degree counter sinks.

Kits: Mill Starter Kits

**Kits: Mill Starter Kits**

4212 Tooling Package, R8 CNC Mini Mill

$378.95

- 3" precision milling vise (Heavy) and 10 pairs of 3" long thin parallels
- Five piece R8 end mill holders, 20 piece end mill set - 2 & 4 flute (10 each)
- 58-piece clamping kit - 3/8"-16, 7/16" T-slots
- Precision 1-2-3 blocks, five center drills - 60° countersinks
- Combination Edge and Center Finder and a T-Slot Cleaner

Tooling package with all the essentials for an R8 CNC Mini Mill. Milling Vise: 3" Kurt-style milling vise. Top, gib, jaws, bottom of vise bed and all plate mounting surfaces are ground. The angle tight positive lock style jaws are interchangeable with industry standard machine vises, are hardened and ground, and can be mounted on either end of the fixed and movable jaw supports for a wide range of clamping distances. Overall length is 10.85" and the height is 3.05". Jaws are 3.15" wide, 1.04" deep, open 3", and are perpendicular to the ways within 0.002" in 4". The ways are parallel to the base within 0.0006" in 4". Without the swivel Thin Parallels: Set of ten pairs, 1/8" thick x 3" long, in fitted case. Made of high-grade alloy steel hardened to 52-58 Rc, parallel within 0.0002" on top and bottom. Parallel heights: 1/2", 5/8", 3/4", 7/8", 1", 1-1/8", 1-1/4", 1-3/8", 1-1/2", and 1-5/8" (pairs matched within 0.00045%). End Mills: 20 piece set included 2 flute and 4 flute center cutting TiN coated HSS end mills sizes 3/16" - 3/4" by 16ths. The 5-piece end mill holder set includes adapters for end mills with shank diameters of 3/16", 3/8", 1/2", 5/8", and 3/4" inches. The end mill holders have an R8 shank and use the drawbar that comes with the mini mill. This set includes all the sizes required for common end mills.1-2-3 Blocks: Ground and hardened on all sides to 50-60 Rc, sizes 1" x 2" x 3". Parallel within 0.0002", flat within 0.00002", and square within 0.000021". Set has two matched blocks, 23 holes of which 5 are threaded 3/8"-16 NC. Center Drills: Five sizes combined drills and countersinks made of high speed steel. Sizes 1, 2, 3, 4, and 5 with 60 degree counter sinks.

5535 Tooling Package, R8 Large Bench Mill

$639.95

- 5" Precision milling, professional and 10 pairs of thin parallels
- Thirteen piece R8 collets, six-piece M42 8% cobalt end mill set - 2 & 4 flute
- 58 - piece clamping kit - 3/8"-16, 7/16" T-slots
- Premium precision 1-2-3 blocks, five center drills - 60° countersinks
- Combination edge and center finder and a T-slot cleaner

Premium tooling package with all the best products for your R8 mini mill. Milling Vise: Precision 5" Kurt-style milling vice. The top, bottom of vise bed, gib, jaws, swivel base, and all plate mounting surfaces are ground. The jaws are hardened and ground. The fixed jaw is bolted from the top for enhanced rigidity. The jaws are 5" wide, 1.58" deep and open 5.71". Without the swivel base, the ways of the precision milling vise are parallel to the base of the vise within 0.0006" in 4". The jaws are perpendicular to the ways within 0.0002" in 4". With the swivel base installed, the ways of the vise are parallel to the base of the vise within 0.0008" in 4". Thin Parallels: Set of ten pairs, 1/8" thick. Made of high-grade alloy steel hardened to 52-58 Rc, parallel within 0.0003" on top and bottom. Parallel heights: 1/2", 9/16", 5/8", 11/16", 3/4", 13/16", 7/8", 15/16", 1", 1-1/16" (pairs matched within 0.0003%). End Mills: Two six-piece M42 8% cobalt, center cutting End Mills sets, 2 & 4 flute. Sizes: 1/8", 3/16", 1/4", 5/16", 3/8" and 1/2". The smaller end mills have 3/8" shanks and the 1/2" end mill has a 1/2" shank. R8 Collets: 13 R8 round collets sizes 1/8" to 1" by 16ths. Made of high grade tool steel, hardened and ground to a TIR of 0.0005" or less. This set includes all the sizes required for common end mills.1-2-3 Blocks: Premium precision 1-2-3 blocks, ground and case hardened on all sides to 55-60 Rc. Blocks are 1" x 2" x 3", parallel, flat, and square within 0.0001". Set includes two matched blocks and 5 cap screws. Blocks have 23 holes, five are threaded 3/8"-16 NC. Five piece M42 8% cobalt combined drills and countersinks sizes 1, 2, 3, 4, and 5 with 60 degree counter sinks.

3489 Tooling Package, R8 Mini Mill

$324.95

- 3" precision milling vise (heavy) and 10 pairs of 3" long thin parallels
- Precision 1-2-3 blocks and 20 piece end mill set - 2 & 4 flute (10 each)
- 58-piece clamping kit - 3/8"-16, 7/16" T-slots
- Seven piece R8 collet set, five center drills - 60° countersinks
- Combination edge and center finder and a T-slot cleaner

This mini tooling package comes with all the essentials for an R8 mini mill. Milling Vise: 3" Kurt-style milling vice. Top, gib, jaws, bottom of vise bed and all plate mounting surfaces are ground. The angle tight positive lock style jaws are interchangeable with industry standard machine vises, are hardened and ground, and can be mounted on either end of the fixed and movable jaw supports for a wide range of clamping distances. Overall length is 10.85" and the height is 3.05". Jaws are 3.15" wide, 1.04" deep, open 3", and are perpendicular to the ways within 0.002" in 4". The ways are parallel to the base within 0.0006" in 4". Without the swivel Thin Parallels: Set of ten pairs, 1/8" thick x 3" long, in fitted case. Made of high-grade alloy steel hardened to 52-58 Rc, parallel within 0.0002" on top and bottom. Parallel heights: 1/2", 5/8", 3/4", 7/8", 1", 1-1/8", 1-1/4", 1-3/8", 1-1/2", and 1-5/8" (pairs matched within 0.00045%). End Mills: 20 piece set included 2 flute and 4 flute center cutting TiN coated HSS end mills sizes 3/16" - 3/4" by 16ths. R8 Collets: Set of seven high-grade tool hardened steel, sizes 1/8", 3/16", 1/4", 3/8", 1/2", 5/8", 3/4", 1-2-3 Blocks: Ground and hardened on all sides to 50-60 Rc, sizes 1" x 2" x 3". Parallel within 0.0002", flat within 0.00002", and square within 0.000021". Set has two matched blocks, 23 holes of which 5 are threaded 3/8"-16 NC. Center Drills: Five sizes combined drills and countersinks made of high speed steel. Sizes 1, 2, 3, 4, and 5 with 60 degree counter sinks.

3490 Tooling Package, 3MT Mini Mill

$365.20

3526 Tooling Package, R8 Bench Mill

$349.95

5534 Tooling Package, R8 Large Bench Mill

$449.95

4491 Tooling Package, R8 Mini Mill Essentials

$249.95

- 3" precision milling vise, 4 pairs of 3" parallels
- 58 - piece clamping kit - 3/8"-16, 7/16" T-slots
- Ten piece end mill set - 2 & 4 flute
- Five piece R8 collet set, four center drills - 60° countersinks
- Combination edge and center finder and a T-slot cleaner

Tooling package with the basic tooling for an R8 mini mill. Milling Vise: The precision 3" Kurt-style milling machine vise has a detachable swivel base that features easy to read divisions. The top, bottom of vise bed, gib, jaws, swivel base, and all plate mounting surfaces are ground. The hardened and ground replaceable jaws on this vise are 3.15" wide, 0.93" deep, and open 2.83". The vise is 10.24" long. Without the base, the vise is 2.91" high. With the base, the vise is 3.94" high. The replaceable jaws can be mounted on either end of the fixed and movable jaw supports providing a wide range of clamping distances. The thin parallels are 5/32" thick and 3" long. The heights are 1/2", 5/8", 3/4", and 7/8". They are parallel within 0.0002" on the top and bottom. The pairs are matched in height within 0.0004". End Mills: The 10 piece TiN coated HSS end mill set includes both 2 flute and 4 flute end mills. The center cutting end mills are 1/4" to 3/4" by 8ths. The set comes in a fitted case. R8 Collets: Set of five R8 round collets includes the sizes 3/16", 3/8", 1/2", 5/8", 3/4". They are made of high grade tool steel, hardened and ground to close tolerance. Center Drills: Four sizes combined drills and countersinks made of high speed steel. Sizes 1, 2, 3, and 4 with 60 degree counter sinks.
Kits: Mill Starter Kits

4723 Tooling Package, R8 Mini Mill Precision $319.95
- 3" Toolmakers screwless vise and 10 pairs of 3" long thin parallels
- Precision 1-2-3 blocks and 20 piece end mill set - 2 & 4 flute (10 each)
- 58 - piece clamping kit - 3/8"-16, 7/16" T-slots
- Seven piece R8 collet set, five center drills - 60° countersinks
- Combination edge and center finder and a T-slot cleaner

Tooting package with all the essentials for an R8 mini mill. Toolmakers Vise: 3" toolmakers screwless vise has a one-piece body. The body and jaws are hardened to Rc 58-62. All sides are flat, square and parallel to 0.0002". There are horizontal and vertical vees on the inside face of the movable jaw to hold round objects. The vise jaws are 1.38" deep and open to 3.78" capacity. The vise is 7.28" long, 2.76" tall and 2.785" wide. Thin Parallels: Set of ten pairs, 1/8" thick x 3" long, in fitted case. Made of high-grade alloy steel hardened to 52-56 Rc, parallel within 0.0002" on top and bottom. Parallel heights: 1/2", 5/8", 3/4", 7/8", 1", 1-1/8", 1-1/4", 1-3/8", 1-1/2", and 1-5/8" (pairs matched within 0.0004".) End Mills: 20 piece set included 2 flute and 4 flute center cutting TiN coated HSS end mills sizes 3/16 - 3/4" by 16ths. R8 Collets: Set of seven high-grade tool hardened steel, sizes 1/8", 3/16", 1/4", 3/8", 1/2", 5/8", 3/4", 1-2-3 Blocks: Ground and hardened on all sides to 50-60 Rc, sizes 1" x 2" x 3". Parallel within 0.0002", flat within 0.0002", and square within 0.00021". Set has two matched blocks, 23 holes of which 5 are threaded 3/8"-16 NC. Center Drills: Five sizes combined drills and countersinks made of high speed steel. Sizes 1, 1/2, 3/4, and 5 with 60 degree counter sinks.

4858 Tooling Package, R8 Mini Mill Premium $669.95
- 3" Precision milling, professional and 10 pairs of 3" long, high grade, thin parallels
- Thirteen piece R8 collets, Two piece six-piece M42 8% cobalt end mill set - 2 & 4 flute
- 58 - piece clamping kit - 3/8"-16, 7/16" T-slots
- Premium precision 1-2-3 blocks, five center drills - 60° countersinks
- Combination edge and center finder and a T-slot cleaner

Premium mini mill R8 tooling package with all the best products for your mini mill. Tooling Vise: 3" Kurt-style professional milling vice with detachable 360° swivel base and easy to read divisions. Top, gibs, jaws, swivel base, bottom of vise bed and all plate mounting surfaces are ground. The angle tight positive lock style jaws are interchangeable with industry standard machine vises, are hardened and ground, and can be mounted on either end of the fixed and movable jaw supports for a wide range of clamping distances. Overall length is 11.6” and the height is 3.1” without base, and 4.3” with base. Jaws are 3.15” wide, 0.9” deep, open 3”, and are perpendicular to the ways within 0.0004" in 4”. The ways are parallel to the base within 0.0003” in 4” without the swivel. Thin Parallels: Set of ten pairs, 1/8” thick x 3” long. Made of high-grade alloy steel hardened to 52-58 Rc, parallel within 0.0001” on top and bottom. Parallel heights: 1/2”, 5/8”, 3/4”, 7/8”, 11/16”, 3/4”, 13/16”, 7/8”, 15/16”, 1”, 1-1/16”, pairs matched within 0.0002”. End Mills: Two piece six-piece M42 8% cobalt, center cutting End Mills sizes, 2 & 4 flute. Sizes: 1/8"; 3/16", 1/4", 5/16", 3/8” and 1/2”. The smaller end mills have 3/8” shanks and the 1/2” end mill has a 1/2” shank. R8 Collets: 13 R8 round collets sizes 1/8” to 1” by 16ths. Made of high grade tool steel, hardened and ground to a TIR of 0.0005” or less. This set includes all the sizes required for common end mills, 1-2-3 Blocks: Precision 1-2-3 blocks, ground and case hardened on all sides to 55-60 Rc. Blocks are 1” x 2” x 3”; parallel, flat, and square within 0.0001”. Mini mill tooling package set includes two matched blocks and 5 cap screws. Blocks have 23 holes, five are threaded 3/8"-16 NC. Five piece M42 8% cobalt combined drills and countersinks sizes 1, 2, 3, 4, and 5 with 60 degree counter sinks.

Kits: Spare Parts Kits

2249 Spare Parts Kit, Micro Mill $20.36
- 5 GMA-2 fuses
- 6 different gears

This kit contains the parts that fail most often on the micro mill with a 2 Morse taper spindle.

1223 Spare Parts Kit, Mini Lathe $30.65
This spare parts package contains the parts that fail most often on the mini lathe. This mini lathe spare parts kit contains:
- 5 GMA-5 fuses
- 1 Gear, 2-Speed Intermediate Shaft
- 1 Gear, 2-Speed Spindle
- 1 Belt, Timing
- 1 Pulley, Timing Belt Motor (8 mm shaft)
- 1 Pulley, Timing Belt Intermediate Shaft
- 1 Gear, 80 Tooth

2262 Spare Parts Kit, 7x14 Mini Lathe $25.51

1703 Spare Parts Kit, R8, Mini Mill $35.85
- R8 Mini Mill Spindle Gears
- 5 GMA-5 Fuses
- 1 Motor Gear
- 2 Spindle Gears
- 2 Intermediate Shaft Gears

This kit contains the parts that fail most often on the mini mill with the R8 spindle. The kit contains:
- 5 GMA-5 fuses
- 14-Teeth Motor Gear, Metal 1-2-3 Blocks
- 29-Teeth Spindle Gear, No. 11-21 Teeth Spindle Gear, No. 21-2- Speed Intermediate Shaft Gear, 12 Teeth / 20 Teeth

Lathe: 10x21 Lathe (C6) Accessories

2497 Follower Rest, C6 Lathe $73.49
This follower rest fits the Grizzly G0516 and SIEG C6 lathes. The follower rest can support work up to 1.5" in diameter.

5042 Follower Rest, C8 Lathe $80.16
This follower rest fits the SIEG C8 and SCB lathes.

2894 Milling Attachment, C6 Lathe $265.48
- Milling attachment for 10x21 lathe
- Fits SIEG C6 class of lathes
- Includes mounting bracket
- Graduated in 0.025 mm (approximately 0.001")
- 60 divisions, advance is 1.5 mm (0.059") per revolution

Milling attachment for the SIEG C6 10x21 class of lathes. This milling attachment includes the mounting bracket required to mount it on a SIEG C6 lathe. The vise opening is 1.9". The width of the vise is 2.6" and the depth is 1.4". The travel is 3.6". The dial is graduated in 0.025 mm (approximately 0.001") and there are 60 divisions, so the advance is 1.5 mm (0.059") per revolution. See compatibility tab for reference to machines or other related products that use this product. See Used On tab for reference to machines using this part and the corresponding drawing number.

2496 Steady Rest, C6 Lathe $85.35
This steady rest fits the Grizzly G0516, and SIEG C6 lathes. The steady rest can support work up to 2.5" in diameter.
Lathe: 10x21 Lathe (C6) Accessories

5036 Steady Rest, C8 Lathes $112.00
This steady rest fits the SIEG C8 and SCB lathes.

2498 Wood Turning Tool Rest and Center, C6 $68.49
Wood turning tool rest and center for Grizzly G0516 and SIEG C6 lathe. The tool rest clamps in the standard tool post so you can turn wood on your mini lathe. The driving center fits in the lathe spindle. See the Compatibility tab for machines that work with this product.

Lathe: 4x5 Micro Lathe (CD)/Unimat Accessories

2946 Auto Longitudinal Feed, SIEG C0 Lathes $57.60
- Powers the lead screw
- Clutch disengages when not in use
- Includes drive belt and mounting bolt
- Fits SIEG C0 lathes
- Fits Grizzly G0745 and Central Machinery 95012 micro lathes
- Compound rest assembly for SIEG C0 lathes and Emco Unimat 4 mini lathes as well as Grizzly G0745 and Harbor Freight Central Machinery 95012 micro lathes. 40 mm of travel. The tool post is two sided and holds tools up to a 1/4" shank. Mounts with an M6 bolt which is included.

2947 Compound Rest Assembly SIEG C0 Lathes $56.29
- Top slide for turning tapers
- 40 mm of travel
- Holds tools up to 1/4" shank
- Fits SIEG C0 and Unimat 4 lathes
- Fits Grizzly G0745 and Central Machinery 95012 micro lathes
- Compound rest assembly for SIEG C0 lathes and Emco Unimat 4 mini lathes as well as Grizzly G0745 and Harbor Freight Central Machinery 95012 micro lathes. 40 mm of travel. The tool post is two sided and holds tools up to a 1/4" shank. Mounts with an M6 bolt which is included.

2950 Faceplate, Nano Lathe, Unimat 3 & 4 and SIEG C0 Lathes $22.50
- 70 mm diameter
- Three slots to mount work
- M14x1.0 mounting thread
- Fits Nano Lathe
- Fits SIEG C0 lathes and Unimat 3 & 4
- This is a faceplate with a 70 mm diameter designed to be screwed onto a lathe's spindle in place of a chuck.

2948 Live Center, SIEG C0 Lathes $28.34
- 10 mm straight shank
- Point is a 60° included angle
- Fits SIEG C0 lathes
- The body is 0.91" (23 mm) in diameter.

2945 Steady Rest, SIEG C0 Lathes $34.15
- Supports work up to 40 mm (1.5") in diameter
- Fits SIEG C0 micro lathes
- Fits Grizzly G0745 4x6 Micro Metal Lathe
- Steady rest for SIEG C0 micro lathes, Grizzly G0745 4x6 Micro Metal Lathes, and Harbor Freight Central Machinery 95012 4x5 Micro Lathes. This lathe steady rest supports work up to 40 mm (1.5") in diameter.

2952 Tool Post, Unimat 3 & 4 and SIEG C0 Lathes $22.63
- Two sided tool post
- Holds tools up to 1/4" shank
- Fits Unimat 3 & 4 lathes
- Fits SIEG C0 lathes
- Mounts with an M6 bolt included
- Tool post that fits Unimat 3 and 4 as well as SIEG C0 lathes. The tool post is two sided and holds tools up to a 1/4" shank. Mounts with an M6 bolt which is included.

Lathe: 6x10 Micro Lathe (C1) Accessories

5547 Change Gear Set, Micro Lathe $17.47
- Micro lathe change gear set
- Fits SIEG C1 6x10 micro lathe
- 9 pieces for inch-standard threading
- Change gear set for the SIEG C1 micro lathe. The nine piece set is designed for inch-based thread pitches. Gears include include 36T, 40T, 42T, 45T, 48T, 50T, 54T, 57T, and 60T. See compatibility tab for reference to machines that are compatible with this product.

5548 Chuck Adapter, Micro Lathe $12.99
- Micro lathe chuck adapter
- Fits SIEG C1 6x10 micro lathe
- Drilled for 3-Jaw and 4-Jaw chucks
- Lathe chuck adapter for the SIEG C1 6x10 micro lathe. Drilled for 3-jaw and 4-jaw chucks. See the Compatibility tab for reference to machines that work with this product.

5546 Compound Rest Assembly, Micro Lathe $184.80
- Micro lathe compound rest
- Fits SIEG C1 6x10 micro lathe
- Rotation angle +/- 40 degrees
- Compound rest assembly for the SIEG C1 6x10 micro lathe. Rotation angle +/- 40 degrees. See compatibility tab for reference to machines that are compatible with this product.

5544 Follower Rest, Micro Lathe $36.00
- Micro lathe follower rest
- Fits SIEG C1 6x10 micro lathe
- Drilled for SIEG C1 6x10 micro lathe. See compatibility tab for reference to machines that are compatible with this product.

5545 Milling Attachment, Micro Lathe $160.40
- Micro lathe milling attachment
- Fits SIEG C1 6x10 micro lathe
- Mounts to micro lathe cross slide
- Allows for milling functions using a micro lathe
- Includes mounting hardware
- Micro lathe milling attachment for the SIEG C1 6x10 micro lathe. The attachment mounts to the top of the cross slide and holds the workpiece while milling with a cutting tool that is mounted on the spindle. Vertical movement is 3 3/4”. Handwheel advance is 0.050” per revolution. Made of steel and cast iron. Includes 4 T-slot nuts, 4 bolts, and 4 washers. T-slot nuts are 8 mm. See compatibility tab for machines that are compatible with this product.

5539 Steady Rest, Micro Lathe $48.40
- Micro lathe steady rest
- Fits SIEG C1 6x10 micro lathe
- Micro lathe steady rest for the SIEG C1 6x10 micro lathe. See compatibility tab for reference to machines that are compatible with this product.

### Lathe: 7x10/12/14 Mini Lathe (C2/C3) Accessories

- Complete set of mini lathe accessories
- Fully equip your mini lathe
- Steadies, centers, chucks, locks and dogs
- This package includes all the accessories you could want to fully equip your mini lathe. This accessory package is for lathes that come from the factory with a 3" lathe chuck.

### Lathe: 7x10/12/14 Mini Lathe (C2/C3) Accessories

- Complete set of mini lathe accessories
- Fully equip your mini lathe
- Steadies, centers, chucks, locks and dogs
- This package includes all the accessories you could want to fully equip your mini lathe. This package is for mini lathes that come from the factory with a 4" lathe chuck.

### Lathe: 7x10/12/14 Mini Lathe (C2/C3) Accessories

- Two 8 mm T-slots 25 mm center to center
- Mounts QCTP or standard 4-way tool holder
- This compound rest top fits any mini lathe. It gives you two 8 mm T-slots with which you can mount anything you want.

### Lathe: 7x10/12/14 Mini Lathe (C2/C3) Accessories

- Fits standard 4-way tool posts
- Holds 1/2" tall cut-off blades
- Steel construction
- This cut-off, or parting, tool holder fits in the standard 4-way tool post (and most other tool posts) and holds 1/2" tall cut-off blades. The mini lathe parting tool holder is made of steel and has a 3/8" shank. Use 3mm hex wrench for screws.

### Lathe: 7x10/12/14 Mini Lathe (C2/C3) Accessories

- Includes: tool holder, cut-off blade, 10 inserts, 2 allen wrenches
- Tool holder is a SLTN0375-2
- Uses GTN-2 Inserts
- Cut-off blade NC19-2
- 3/8" Indexable GTN-2 Cut-Off Tool Holder includes a SLTN0375-2 tool holder, NC19-2 cut-off blade, 10 GTN-2 inserts and 2 allen wrenches. Tool holder dimensions (see photo) A1 is 0.472" A is 0.984" H1 is 1.161" H4 is 0.435" M is 0.118" C is 2.2".

### Lathe: 7x10/12/14 Mini Lathe (C2/C3) Accessories

- Mini lathe drawbar
- 3MT x 3/8-16 x 5"
- Hardened
- Fits SIEG C2 and SC2 class of mini lathes
- This is the 3/8-16 drawbar for the 7x10 and 7x12 mini lathe with the Morse Taper spindle. This drawbar is a 3/8-16 x 5" cap screw and a flat washer. They are both hardened for long life. See the Compatibility tab for machines that work with this product.

### Lathe: 7x10/12/14 Mini Lathe (C2/C3) Accessories

- 160 mm Diameter
- 8 Slots to Mount Work
- 72 mm registration recess
- Requires 3 M8 x 25 studs
- compatible with lathes with 100 mm Flange Chuck Mount
- Faceplate is 6.29" (160 mm) in diameter and has 8 slots for mounting work. The faceplate is made of cast iron.

This faceplate has a 72 mm registration recess. It requires 3 M8 x 25 studs. It mounts in place of a 100 mm (4") 3-jaw lathe chuck.
Lathe: 7x10/12/14 Mini Lathe (C2/C3) Accessories

1199 Faceplate, Mini Lathe, 80 mm Flange $37.04
- 160 mm diameter
- 8 slots to mount work
- 55 mm registration recess
- Requires 3 M6 x 30 studs
- Compatible with lathes with 80 mm flange chuck mount. The faceplate is 6.29" (160 mm) in diameter and has 8 slots for mounting work. The lathe face plate is made of cast iron. This mini lathe faceplate has a 55 mm registration recess. It requires 3 M6 x 30 studs.

2644 Clamping Kit for Faceplate $19.44
3400 Faceplate, Bench Lathe $43.60
2499 Faceplate, G0516 Combo Lathe Mill $59.46

1198 Follower Rest, Mini Lathe $48.95
This follower rest mounts on the lathe saddle and moves with the carriage. The follower rest can support work up to 1" in diameter.

2419 Follower Rest, Mini Lathe, Ball Bearing $70.49

1137 Gear Set, Fine Feed, Mini Lathe $39.95
- 80/15 and 90 teeth
- Module 1 Metric gears
- Bore 12 mm
- Keyway 3 mm
- Width 8 mm
A 21 tooth change gear allows you to cut more accurate metric threads with a mini lathe. These gears are made from metal for durability. This gear fits most current production mini lathes. Measure the width of the keyway in your change gears to be sure.

3937 Knob and Hand Wheel Kit, Mini Lathe $85.97
- Anodized hand wheels for apron and tailstock
- Chrome levers for half-nuts, tool post and tailstock
- Handwheels: 90 mm OD, 8 mm bore
- Levers: M8 threading
- Acron Nuts: M8 threading
The attractive hand wheels are all metal, and the levers are chrome. Designed for SIEG C2, SC2 and C3 class of mini lathes as well as HiTorque mini lathes. Kit contains two handwheels with handles and posts; three levers, acorn nuts and a 24 tooth drive gear. The saddle drive gear in this kit is an upgraded version with a threaded end. This allows the hand wheel to hold to the gear shaft using one of the chrome acron nuts. In the factory version of the lathe, the hand wheel was held to the gear using a cone point set screw. The lathe handwheel also has an acron nut for attachment to the tailstock screw. In this application, the chrome acorn nut simply replaces a standard M8 nut. See the Compatibility tab for machines that work with this product.

3967 Lathe Cover, Mini Lathe $19.95
- Fits 7x10, 7x12, 7x14 and 7x16 lathes
This denim lathe cover provides protection for your lathe when you are not using it. The denim cloth breathes preventing moisture build-up under the cover.

4464 Lathe Dog Set $35.95
- Set of 5 lathe dogs for material up to 1.5" (40 mm)
- M6 and M8 drivers
This lathe dog set will handle material sizes from very small up to 1.5" diameter.

4476 Driver, Lathe Dog, M6 $1.95
4477 Driver, Lathe Dog, M8 $1.95
4471 Lathe Dog, 10 mm $4.95
4472 Lathe Dog, 15 mm $5.95
4473 Lathe Dog, 20 mm $6.95
4474 Lathe Dog, 30 mm $7.95
4475 Lathe Dog, 40 mm $8.95

3766 Milling Attachment Package, Mini Lathe $278.48
- Milling attachment that bolts on to the mini lathe
- Set of 6 two-flute end mills, 1/8" to 1/2" diameter

1956 Milling Attachment, Taig $72.95
- Small milling attachment for mini lathe
- Fits most small SIEG class mini lathes
- Mounting block not included

Milling Attachment, Mini Lathe $199.95
- Standard milling attachment for mini lathes
- Mounting block included
- Use with 3MT chuck

4968 Revolving Tailstock Chuck Adapter, 3" $159.95
Chuck, 2MT
- CHUCK NOT INCLUDED: Mounts a 3" 3-jaw chuck in the tailstock
- Three ball bearings provide support for heavy duty load and high speed.
- Max Load: 1100 lbs.
- Maximum Rated RPM: 4000
- 2MT standard shank
Use this in conjunction with a 3" 3-jaw chuck in place of a live center. No more center drilling. This works great for long, large diameter work pieces where a live center or steady rest just won't cut it. Three ball bearings for heavy duty loads and relatively high speed."**NOTE** Chuck is not included, but it works great with our 1187 lathe chuck.

4969 Revolving Tailstock Chuck Adapter, 3" $166.95
Chuck, 3MT

5965 Revolving Tailstock Chuck Adapter, 4" $199.95
Chuck, 3MT

1136 Spider, Mini Lathe Spindle $69.95
- Spider for back of mini lathe spindle
- Replaces 2nd spindle nut
- 3/4" (20 mm) diameter capacity
Use this spider to support long stock extending out the back of the spindle. The spider has a 3/4" (20 mm) diameter capacity with four adjustment screws.

Great for threading, this allows you to turn your spindle by hand as slowly as you like. Tighten the bolt to engage the crank. Loosen to remove it.

This lathe steady rest can support work up to 1” in diameter. If this product is out of stock, you may want to try our part number 2418 Steady Rest, Ball Bearing as a substitute! It is the same Steady Rest just with the added ball bearing feature. This steady rest comes with the fasteners to lock it to the lathe bed.

This spindle tachometer mounts on the top of the mini lathe headstock and displays the speed, to the nearest 20 RPM, of the spindle. The spindle tachometer includes the interrupter wheel and the sensor and cable.

This spindle tachometer mounts on the top of the mini lathe headstock and displays the speed, to the nearest 20 RPM, of the spindle. The spindle speed readout plugs into the jack on the control panel.

This is the tailstock from the HiTorque mini lathe. It has a 2MT Quill. This is a kit of all the parts required to make a complete tailstock for the mini lathe. The center height of this tailstock is approximately 90 mm. The quill is 2 Morse taper.
Mounting requires that you drill and tap several holes in your lathe. The installation tools hold the mounting brackets in place as you mark the hole locations.

Purchase this telescoping lead screw cover and other mini lathe machine parts today.

This compound clamp improves rigidity and improves the rigidity of your G0602 lathe with the Belfanti Machine Works G0602 compound clamp. The increased rigidity improves part-off capability and surface finishing, and it reduces chatter issues commonly found with the stock compound clamping system. All the hardware needed to install your new compound kit (metric studs, tap, drill bit, nuts, and washers) is included, along with instructions. You’ll need the following tools to complete the installation: * Center punch* Hammer* Tap handle* Metric open end wrench set* Metric allen wrench set* Drill or drill press

Lathe: Tool Post Grinders

**2001 Tool Post Grinder, Mini Lathe** $185.01
- 6,000 RPM
- This tool post grinder is designed specifically for the mini lathe. To install it, you simply replace the compound rest. The bottom of the mounting foot is approximately 50 mm (2”) below the centerline of the grinding wheel. The grinder comes with 2 different grit grinding wheels (60 and 80 grit), and the tools needed to change them. Motor 150 watts, 120V, 60 Hz. This mini lathe tool post grinder is approximately 8” tall, 9” long and 3.5” thick. Get the right tools for your mini lathe and order this tool post grinder for sale today.

**2195 Arbor, Grinding Wheel** $9.91
**2584 Grinding Wheel, 120 Grit** $12.63
**1767 Grinding Wheel, 80 Grit** $12.57
**2585 Grinding Wheel, 180 Grit** $12.63
**2586 Grinding Wheel, 240 Grit** $12.63
**2184 Grinding Wheel, 60 Grit** $12.71
**2194 Poly-V Belt, Tool Post Grinder** $5.37

**4670 Tool Post Grinder, Bench Lathe** $195.01
**4671 Tool Post Grinder, C6 Lathe** $195.01

---

**Lathe: Tooling**

**2568 Ball and Radius Turning Tool, Large, OMW** $139.95
- Turn round shapes or curves on metal mini lathe
- For brass, aluminum, steel, plastic
- Cut convex curves up to 1 3/4” in diameter
The OMW Large Radius Ball Tool like its smaller counterpart is designed to cut round shapes or curves in brass, aluminum, steel, wood or plastic on your own lathe. Balls in the ends of rods, shafts, or handles are easily turned with the tool. You can also make ball joints, governor weights, railing knobs, round contact points for tools, nose cones, and many other useful and decorative objects. The OMW lathe radius turning tool is sized for lathes of 5” or greater swing, and the 1/2” shank size will fit most standard tool holders. The tool will cut convex curves up to 1 3/4” in diameter. This lathe ball turning attachment is manufactured from the highest quality materials. Frames are machined from high strength aluminum alloy. The handle is tool steel, the pivot pins are hardened and ground and rotate in custom bronze bearings. The tool is completely machined from solid metal stock, there are no stamped, cast or pressed parts. A pre-ground High Speed steel tool bit is included. Each lathe radius turning tool is manufactured in the USA by OMW Corporation and is carefully inspected and checked before shipment. This lathe ball turning attachment is designed so that the center height is 3/8” from the bottom of the shank. The tool comes with a pre-ground HSS tool bit which may be easily resharpened or modified.

**2569 Ball and Radius Turning Tool, Small, OMW** $89.95
**2963 Tool Bit, Large Ball and Radius Turning Tool** $21.95
**2964 Tool Bit, Small Ball and Radius Turning Tool** $18.95

**1970 Ball Turning Attachment** $59.85
- Turn balls on metal mini lathe
- Cut convex curves up to 2” in diameter
- Includes one presharpened 5/16” tool bit
- Fits most SIEG and LittleMachineShop.com HiTorque mini lathes
- Mounting block not included

This attachment allows you to turn balls on the mini lathe. This radius turning tool will cut convex curves up to 2” in diameter. Includes one presharpened 5/16” tool bit. You must make a mounting block for the ball turning attachment. See Chris’ tips for plans for the mounting block. See the Compatibility tab for machines and other products that work with this product.

---

**Dead Centers**

Morse taper solid dead centers. These dead centers have a 60 degree included point angle. Half-notched dead centers have about half the point cut away so you can work closer to the end of the work piece.

**5187 Dead Center, 1MT** $5.95
**5475 Dead Center, 1MT, Carbide Tip** $9.95
**5471 Dead Center, 1MT, Carbide Tip, Half-Notched** $13.95
**5473 Dead Center, 2MT** $7.95
**1890 Dead Center, 2MT** $6.80
**5476 Dead Center, 2MT, Carbide Tip** $10.95
**5186 Dead Center, 2MT, Carbide Tip, Half-Notched** $12.95

**5474 Dead Center, 3MT** $8.95
**1188 Dead Center, 3MT** $8.22
**5477 Dead Center, 3MT, Carbide Tip** $16.95
**5472 Dead Center, 3MT, Carbide Tip, Half-Notched** $16.95

---

**1911 Knurler, Large Capacity** $49.95
- 0 to 2” (50 mm) diameter capacity
- Fits standard 4-way and quick change tool posts
- Includes three sets of knurls

These scissors knurling tool is made to our design, specifically for the mini lathe. This knurler fits in the standard tool post of the mini lathe without any modification. This knurling tool also works with any of the quick change tool posts we sell. The mounting bar is 3 1/8” (9.5 mm) tall so it replaces a 3/8” tool bit. It comes with fine (33 lines per inch, 0.8 mm pitch), medium (21 lines per inch, 1.2 mm pitch), and coarse (14 lines per inch, 1.8 mm pitch) diamond knurls.

**3770 Knurler, Large Capacity with 6 sets of Knurls** $63.95
**1733 Knurls, Coarse Diamond** $5.95
**2974 Knurls, Coarse Straight** $5.95
**1731 Knurls, Fine Diamond** $5.95
**2972 Knurls, Fine Straight** $5.95
**1732 Knurls, Medium Diamond** $5.95
**2973 Knurls, Medium Straight** $5.95

**Lathe Mandrels, Individual Sizes**
- Standard taper: .0005” per 1”
- Smaller end is .0005” undersized
- Made of tool steel hardened and ground

Lathe and OD grinder mandrels. Designed for setting-up accurately bored or reamed blanks and castings.

**5459 Lathe Mandrel, 1/8” x 2-1/2”** $9.95
**5460 Lathe Mandrel, 3/16” x 3”** $9.95
**5461 Lathe Mandrel, 1/4” x 3-3/4”** $9.95
**5462 Lathe Mandrel, 5/16” x 4”** $9.95
**5463 Lathe Mandrel, 3/8” x 4-1/4”** $9.95
**5464 Lathe Mandrel, 7/16” x 4-1/4”** $9.95
**5465 Lathe Mandrel, 1/2” x 5”** $9.95

**1189 Live Center, 2MT Short** $23.18
- Point is a 60° included angle
- Short 2 Morse taper for the mini lathe
- Fits Jet 1014 mini wood lathe
- 1.495” diameter body

This mini lathe live center fits the tailstock of the mini lathe. The point is a 60° included angle and is 0.71” in diameter.

**3154 Live Center, 2MT Standard Bull Nose** $119.95
- For tubing and other hollow work
- Point is a 70° included angle
- Standard bull nose 2 Morse taper
- 5.31” total length

This bull nose live center is made from hardened steel and ground for accuracy. It has precision high quality bearings. The nose is a 70° included angle. The diameter of the nose is 2.45”. The diameter of the flat on the front of the nose is 0.46”.

---

(800) 981 9663 LittleMachineShop.com
Lathe: Tooling

1592 Live Center, 2MT Standard Heavy Duty $24.95
- Point is a 60º included angle
- Standard 2 Morse taper for the mini lathe
- 1.77” diameter body
This center is made from hardened steel and ground for accuracy. It has precision high quality bearings. The point is a 60º included angle. The maximum diameter of the point is 0.98”. The 0D of the body is 1.77”. The distance from the tip to the front of the body is 1.66”. The rated radial load is 90 lbs. The maximum speed is 5000 RPM.
- Fits 3” to 5” 3-Jaw chucks
- 7 live center points
- Precision needle and thrust bearings
- Bull nose and conical tips
- In a fitted wood case
This live center set gives you lots of options to support large and small parts.
- Body is 1.7” (45 mm) in diameter.
- The “bull nose” is 0.98” (25 mm) in diameter.
- The 7 live center points
- Precision needle and thrust bearings
- Bull nose and conical tips
- In a fitted wood case
This live center set gives you lots of options to support large and small parts. There are five 60 degree live center tips of four different diameters. There are two of the largest "standard" center. The 60 degree centers range in diameter from 0.22 to 0.53” (5.5 to 13.5 mm). The 60 degree conical center is for pointed work pieces. The "bull nose" center is 1.22” (31 mm) in diameter. The body is 1.57” (40 mm) in diameter. There is a tapered pin to pop the tips out of the live center.
- 692 Live Center, 2MT Standard Multi Point Precision $64.95
- Cast Iron
- 7 live center points
- Precision needle and thrust bearings
- Bull nose and conical tips
- In a fitted wood case
This live center set gives you lots of options to support large and small parts. There are five 60 degree live center tips of four different diameters. There are two of the largest "standard" center. The 60 degree centers range in diameter from 0.22 to 0.53” (5.5 to 13.5 mm). The 60 degree conical center is for pointed work pieces. The "bull nose" center is 1.22” (31 mm) in diameter. The body is 1.57” (40 mm) in diameter. There is a tapered pin to pop the tips out of the live center.
- 4915 Live Center, 3MT Multi Point $134.95
- 2504 Rotating Tailstock Chuck $59.95
This is a "live" drill chuck for the tailstock. Use it to support small diameter work where a live center is not practical. The shank is 2 Morse taper. The drill chuck is 1/2” capacity.
- 1877 Tailstock Turret Tool Holder, 2MT $115.95
This tailstock turret tool holder has positions for 6 tools. The tool positions are 5/8” diameter holes with a set screw to retain the tool holder. The shank is a 2 Morse taper.
- 3053 Tailstock Turret Tool Holder, 3MT $139.95
- 1382 Chuck Stop, 3-Jaw, 3 Piece Set $124.99
- Set of three 3-Jaw Chuck Stops
- Fits 3” to 5” 3-Jaw lathe chucks
- Thicknesses include 8.5 mm, 11.5 mm, and 14.5 mm
- Magnetic mounting on chuck face
- Made from blue anodized aluminum
The chuck stops mount magnetically to the face of any 3” to 5” 3-jaw lathe chuck. The front and back surfaces are parallel within ±0.002” (±0.05 mm). The design allows short and small parts to project a consistent distance past the chuck jaws without falling inside the bore.
- 1688 Jaws, Inside for 3-Jaw 3” Chuck $40.00
Inside jaws for 3” 3-jaw chuck. These are replacement jaws for the 3” 3-jaw chuck that comes on the mini lathe. Look carefully at the jaws before you decide to purchase inside or outside jaws.
- 1973 Jaws, Inside for 3-Jaw 4” Chuck $41.95
- 5027 Jaws, Inside for 3-Jaw 5” Chuck $57.65
- 5793 Jaws, Inside for 3-Jaw 6” Chuck $49.95
- 1689 Jaws, Outside for 3-Jaw 3” Chuck $40.00
- 1974 Jaws, Outside for 3-Jaw 4” Chuck $41.95
- 5028 Jaws, Outside for 3-Jaw 5” Chuck $57.65
- 5932 Jaws, Outside for 3-Jaw 6” Chuck $33.95
- 5029 Jaws, Reversible for 4-Jaw 3” Chuck $45.65
- 3408 Jaws, Reversible for 4-Jaw 4” Chuck $53.57
- 5030 Jaws, Reversible for 4-Jaw 5” Chuck $56.50
- 1768 Key, Lathe Chuck, 8 mm Square $10.26
- 8mm (5/16”) Square Head
- Fits 3” 3-Jaw Lathe Chuck
- Fits 4” 3-Jaw Lathe Chuck
This chuck key fits 3” 3-Jaw lathe chucks, as well as 4” 3-jaw lathe chucks.
This key will also fit any other chuck that requires a 8mm (5/16”) key.
- 5483 Key, Lathe Chuck, 11 mm Square $10.95
- 5484 Key, Lathe Chuck, 12.5 mm Square $10.95
- 3409 Key, Lathe Chuck, 6 mm Square $10.34
- 5480 Key, Lathe Chuck, 6.5 mm Square $8.95
- 5481 Key, Lathe Chuck, 8 mm Square, Long Handle $8.95
- 5482 Key, Lathe Chuck, 9.5 mm Square $10.95
- 1692 Adapter, 4” Lathe Chuck $21.63
- Compatible with 4” 3- or 4-Jaw Lathe Chucks on Mini Lathes
- Use with Chucks with a 72 mm Registration Recess Diameter
- Cast Iron
- Net Thickness of 0.66”
This adapter lets you mount 4” 3- or 4-jaw lathe chucks on your mini lathe.
Use this adapter with chucks that have a 72 mm registration recess diameter. The adapter mounts to the 3-hole pattern on the spindle so it works on spindles with only three holes. This adapter is cast iron and has a net thickness of 0.66”. The net thickness is the distance from the rim of the lathe spindle to the back of the chuck.
- 2426 Adapter, 4” Lathe Chuck, 3-Jaw $21.63
- 3782 Adapter, 4” Lathe Chuck on 4” Rotary Table $89.95
- Mounts a 4” 3- or 4-jaw chuck on 1810 and 2420 rotary tables
- Maximum diameter matches chuck diameter
This adapter attaches to the rotary table with some special tapered T-slot nuts that are tightened by the 4 cap screws around the outside. You mount the adapter to the chuck with cap screws using the holes around the periphery. It will mount either 3-Jaw or 4-Jaw 4” (100 mm) chucks. Remove the 4 cap screws around the outside. Slide the special T-slot nuts into the T-slots on the rotary table. Set the chuck and adapter over the T-slot nuts and reinsert the cap screws. The adapter is registered by the boss that extends from the bottom of the adapter. Tighten the 4 cap screws evenly. This adapter will only mount a 4” (100 mm) lathe chuck on a model 1810 or 2420 rotary table. It will not fit any other rotary table.
Lathe Chucks: Adapters

2358 Adapter, 5" Lathe Chuck $31.18
- Compatible with 5" 3-Jaw Lathe Chucks
- Can Use on Mini Lathe with 5" Chuck in Place of 3" Chuck
- 92 mm Diameter Registration Boss
- 3 Chuck Mounting Holes

This adapter lets you mount 5" 3-jaw lathe chucks on your mini lathe in place of a 3" (80 mm) chuck. The adapter mounts to the 3-hole pattern on the spindle so it works on spindles with only three holes. This adapter has a 92 mm diameter registration boss, and has 3 chuck mounting holes.

2347 Adapter, 5" Lathe Chuck $31.18

2961 Adapter, 5" Lathe Chuck $31.01
- Compatible with 5" 3- or 4-Jaw Lathe Chuck with 95 mm Registration Recess
- Can Use on a Flange for 4" Chuck with 72 mm Registration Boss
- Works on 8x12 and 8x14 Lathes

This adapter mounts a 5" 3- or 4-jaw lathe chuck with a 95 mm registration recess on a flange for a 4" chuck with a 72 mm registration boss. It works on 8x12 and 8x14 lathes as well as the Harbor Freight 5980 multipurpose machine. It also fits the SIEG C4 lathe.

5050 Adapter, 5" Lathe Chuck to C8 Spindle $38.37
- Fits 5" lathe chucks with a 95 mm registration recess

This adapter mounts a 5" lathe chuck with a 95 mm registration recess to the C8 and SC8 spindle. It works on all variants of the SIEG C8 lathe.

4913 Adapter, 6" Lathe Chuck $38.64
- Fits 6" 4-Jaw Lathe Chucks with 65 mm Registration Recess
- DO NOT BUY THIS FOR LHS CHUCKS 2038 and 2028
- Can Use with 6" Chuck on Flange for 4" Chuck with 72 mm Registration Boss
- Works on 8x12 and 8x14 Lathes

This adapter mounts a 6" 4-jaw lathe chuck with a 65 mm registration recess on a flange for a 4" chuck with a 72 mm registration boss. It works on 8x12 and 8x14 lathes as well as the Harbor Freight 5980 multipurpose machine. It also fits the SIEG C4 and SC4 lathes.

4912 Adapter, 6" Lathe Chuck $38.64
- Fits 6" 3-Jaw Lathe Chucks with 130 mm Registration Recess
- Can Use with 6" Chuck on a Flange for 4" Chuck with 72 mm Registration Boss
- Works on 8x12 and 8x14 Lathes

This adapter mounts a 6" 3-jaw lathe chuck with a 130 mm registration recess on a flange for a 4" chuck with a 72 mm registration boss. It works on 8x12 and 8x14 lathes as well as the Harbor Freight 5980 multipurpose machine. It also fits the SIEG C4 and SC4 lathes.

"NOTE" If using with 2038 4-jaw chuck, additional mounting holes will need to be drilled.

Backplate Lathe Chuck Adapters, Semi Machined
- Lathe side is fully machined
- Chuck side must be machined to suit
- Use for European style chucks

These are a semi-machined adapter plate. The side that attaches to the lathe flange is fully machined. The side on which the lathe chuck mounts is not finished.

Mount the backplate adapter on your lathe and complete machining of the chuck-mounting side. This ensures two things: that it will fit your chuck, and that it is concentric on your lathe.

4768 Backplate Lathe Chuck Adapter, 3" to 3" $22.11
4769 Backplate Lathe Chuck Adapter, 4" to 3" $27.72
4770 Backplate Lathe Chuck Adapter, 5" to 3" $33.53
4771 Backplate Lathe Chuck Adapter, 5" to 4" $36.53
4772 Backplate Lathe Chuck Adapter, 6" to 4" $44.88

Lathe Chuck Adapters

We stock a wide range of cast iron threaded lathe chuck adapters. These adapters are used to mount flat back lathe chucks on lathes with threaded spindles.

1791 Chuck Adapter, 1-10 Thread 4" Diameter $23.95
1917 Chuck Adapter, 1-10 Thread 4" Diameter, 3 Holes $24.95
2333 Chuck Adapter, 1-10 Thread 5" Diameter $43.95
2334 Chuck Adapter, 1-10 Thread 6" Diameter $49.95
1790 Chuck Adapter, 1-8 Thread 4" Diameter $23.95
1916 Chuck Adapter, 1-8 Thread 4" Diameter, 3 Holes $24.95
2331 Chuck Adapter, 1-8 Thread 5" Diameter $39.95
2332 Chuck Adapter, 1-8 Thread 6" Diameter $49.95
1792 Chuck Adapter, 1-1/2-8 Thread 4" Diameter $23.95
1918 Chuck Adapter, 1-1/2-8 Thread 4" Diameter, 3 Holes $24.95
1919 Chuck Adapter, 1-1/2-8 Thread 6" Diameter $44.95
5126 Chuck Adapter, 1-3/4-8 Thread 6" Diameter $39.95
2022 Chuck Adapter, 1/2-20 Thread 3" Diameter, 3 Holes $23.95
1923 Chuck Adapter, 2-1/4-8 Thread 6" Diameter $44.95
1920 Chuck Adapter, 3/4-16 Thread 3" Diameter, 6 Holes $23.95
1921 Chuck Adapter, M39 x 4 Thread 4" Diameter $24.95
1922 Chuck Adapter, M39 x 4 Thread 6" Diameter $44.95
2335 Chuck Adapter, Unthreaded 4" Diameter $24.95
2336 Chuck Adapter, Unthreaded 6" Diameter $44.95

Lathe Chuck Capacities

See the lathe chuck capacity chart at www.littlemachineshop.com/chuck.

1187 Lathe Chuck, 3-Jaw 3" $100.57
- Self-centering 3-Jaw lathe chuck.
- 3" (80 mm) diameter
- Includes chuck key, inside and outside jaws
- Plain back mounting
- High quality steel, hardened and ground

This 3 inch 3-Jaw self-centering lathe chuck is the one that comes on the mini lathe. It includes a chuck key and inside and outside jaws. This three jaw chuck has a 0.63" (16 mm) through hole. It holds work up to 2.48" (63 mm) in diameter. The radial runout of a test bar held in this chuck, when the chuck is mounted true, is 0.003" maximum.

2916 Lathe Chuck, 3-Jaw 2", Self-Centering $53.95
1698 Lathe Chuck, 3-Jaw 4" $120.04
2337 Lathe Chuck, 3-Jaw 5" $133.70
2028 Lathe Chuck, 3-Jaw 6" $183.90

**Machines: Drill Presses**

- **5540 Drill Press, 13” Bench Top, 16-Speed**
  - Bench top drill press
  - 13” Swing
  - 16 Speeds from 220 to 3600
  - #2 Morse taper spindle
  - 5/8” Drill chuck

This is a versatile drill press for the home shop. With 13” swing and 16 speeds it can handle materials from wood, plastic, and most metals, including stainless steel. The 3/4 horsepower motor lets you drill up to 1/2” holes in steel at one pass. The 16 spindle speeds are 220, 290, 360, 430, 500, 570, 630, 760, 830, 920, 1430, 1620, 1850, 2260, 2580, and 3600 RPM. The large round table tilts 45 degrees either way and raises and lowers with a rack and pinion. There is an adjustable depth quill stop with a gage included and the drill chuck with key, a drill chuck arbor, and a drift key for chuck removal from the spindle.

**Machines: Lathes**

- **7350 HiTorque 7x16 Deluxe Mini Lathe**
  - Features of $100 (most powerful, most low-speed torque, gearless spindle, cam-lock TS, 4” chuck)
  - Extended bed (16’ between centers) for more workshop
  - Includes DRO readouts on compound rest, cross slide, and tailstock
  - Metal hand wheels and chrome levers
  - Includes OXA wedge-type quick change tool post and five tool holders

The LittleMachineShop.com HiTorque Mini Lathe for sale is the best in its class. It has the most power, most torque, and a longer center distance than other lathes in its class. This lathe comes equipped with digital readouts on the cross slide, compound rest, and tailstock quill. The attractive hand wheels are all metal, and the levers are chrome. The 500 Watt brushless spindle drive motor provides tremendous low-end torque. And you can vary the speed from 50 RPM to 2500 rpm continuously in both directions. There are no gears to shift. The all steel, wedge-type quick change tool posts accept turning tools up to 1/2” shank. It comes with five toolholders (for details, see part number 3112). Top real and bottom half-nuts and a reversible 16 TPI lead screw provide extended threading capability. You can create every American Standard Unified class 2A inch screw thread from 4 to 80 threads per inch, and you can create every American Standard Metric class 6 thread from 0.3 to 8 mm pitch with the extra 21 tooth change gear that is included. Cutting inch threads is made even easier with the factory-installed threading dial. The 7x16 lathe includes a chip tray, a backspash guard, and spreaders to give the feet a broader stance. The LittleMachineShop.com model 7350 HiTorque Mini Lathe is a version of the SIEG SC2. *NOTE* We ship machines only to the US and Canada.

- **5100 HiTorque 7x16 Mini Lathe**
  - Extended bed (16’ between centers) provides more working room
  - Most powerful lathe with most low-speed torque in its class
  - 4” 3-jaw lathe chuck
  - No gears in spindle drive
  - Cam lock tailstock

The LittleMachineShop.com HiTorque 7x16 Mini Lathe for sale is the best in its class. It has the most power, most torque, and a longer center distance than other lathes in its class. The 500 Watt brushless spindle drive motor provides tremendous low-end torque. And you can vary the speed from 50 rpm to 2500 rpm continuously in both directions. There are no gears to shift. The cross feed and compound rest dials are graduated in 0.001” and 0.025 mm. A 4” 3-jaw self centering lathe chuck is included. Cutting inch threads is made even easier with the factory-installed threading dial. This HiTorque 7x16 Mini Lathe for sale includes a chip tray, a backspash guard, and spreaders to give the feet a broader stance. The LittleMachineShop.com model 5100 HiTorque Mini Lathe is a longer version of the SIEG SC3. *NOTE* We ship machines only to the US and Canada.

- **7500 HiTorque 8.5x20 Deluxe Bench Lathe**
  - Inch dials, inch and metric threading
  - 120VAC 60 Hz
  - 1000 Watt (1.34 HP) brushless DC drive
  - Power longitudinal feed and power crossfeed
  - 4” (100 mm) 3-jaw self centering lathe chuck

The LittleMachineShop.com model 7500 HiTorque 8.5x20 Bench Lathe is the best in its class. No other lathe this size offers power cross feed. The updated control panel allows you to stop and then restart the lathe at a pre-selected speed. The cross feed and compound rest dials are graduated in 0.001” and 0.025 mm. The tailstock is equipped with a 4-way indexing tool post set for 10 mm tools. A reversible 2 mm pitch lead screw provides extended threading capability. You can create every American Standard Unified class 2A inch screw thread from 4 to 80 threads per inch, and you can create every American Standard Metric class 6 thread from 0.2 to 8 mm pitch with the change gears that are included. All the gears on this lathe are metal. The LittleMachineShop.com model 7500 HiTorque 8.5x20 Bench Lathe is a version of the SIEG SC4 bench lathe. *NOTE* We ship machines only to the US and Canada.

- **7500 HiTorque 8.5x20 Deluxe Bench Lathe**
  - DRO and digital dials, inch and metric threading
  - 120VAC 60 Hz
  - 1000 Watt (1.34 HP) brushless DC drive
  - Power longitudinal feed and power crossfeed
  - 4” (100 mm) 3-jaw self centering lathe chuck

The LittleMachineShop.com HiTorque 8.5x20 Bench Lathe for sale is the best in its class. No other lathe this size offers power cross feed. The updated control panel allows you to stop and then restart the lathe at a pre-selected speed. The Deluxe model includes digital readouts (DRO) on the compound rest, cross slide, carriage, and tailstock (cross slide and carriage DROs feed data via magnetic scales to a Bluetooth equipped tablet display). All DROs read equally accurately in inches and mm. The Deluxe model also includes an AXA quick change tool post set with five tool holders; anodized aluminum hand wheels with black anodizing in the centers; chrome knobs and levers; and a heavy duty splash guard that covers the full bed length. In addition, the compound rest is modified to better accommodate the quick change tool post. The 1000 Watt brushless spindle drive motor provides tremendous low-end torque. And you can vary the speed from 100 rpm to 2000 rpm continuously in both directions. There are no gears to shift. The updated control panel allows you to stop and then restart the lathe at a pre-selected speed. A reversible 2 mm pitch lead screw provides extended threading capability. With our lathe machinery, you can create every American Standard Unified class 2A inch screw thread from 4 to 80 threads per inch, and you can create every American Standard Metric class 6 thread from 0.2 to 8 mm pitch with the change gears that are included. All the gears on this lathe are metal. The LittleMachineShop.com model 7500 HiTorque 8.5x20 Bench Lathe for sale is a version of the SIEG SC4 bench lathe. *NOTE* We ship machines only to the US and Canada.

- **4959 SIEG C3 7x14 Mini Lathe**
  - Full featured miniature lathe at an incredible price
  - Includes 3” 3-jaw chuck, 2 sets of jaws, and chuck key
  - Variable speed with two speed ranges for low speed torque
  - Digital spindle speed readout
  - Cam-lock tailstock

The SIEG C3 7x14 Mini Lathe has all the features you want at an incredibly low price. Full 14” bed length with a cam-lock tailstock for your longer work pieces. Real top and bottom half-nuts and a reversible 16 TPI lead screw provide extended threading capability. You can create every American Standard Unified class 2A inch screw thread from 4 to 80 threads per inch, and you can create every American Standard Metric class 6 thread from 0.3 to 8 mm pitch. The cross feed and compound rest dials are graduated in 0.001” and 0.025 mm. The miniature lathe is equipped with a 4-way indexing tool post set for 5/16” (8 mm) tools. The SIEG C3 7x14 Mini Lathe includes a chip tray, a backspash guard, and a threading dial.

Note: Photo above shows the predecessor model 5500. We’ll update it soon! The LittleMachineShop.com HiTorque Bench Mill 6500 is an enhancement on our popular 5500 Bench mill and a step up in size, rigidity, and power compared to a mini mill. This benchtop mill provides a larger table, more travel, and more horsepower. A 750 watt (1 hp) brushless DC motor provides abundant spindle power and tremendous low-end torque. Controls on the straightforward control panel reverse direction, enable tapping mode, and allow you to resume running at the previously used spindle speed. The 23.4" x 5.5" (595 mm x 140 mm) table provides a large work area. The HiTorque Bench Mill incorporates a true quill and drill press-style handles for easy drilling. A button on the end of each handle reverses the spindle to make tapping easy. The new control panel design includes a digital spindle speed display, is easier to use and allows you to quickly spin up to the same spindle speed as you last used. This mill is a version of the SIEG Model 6500 Deluxe HiTorque Benchtop Milling Machine has all the features of popular HiTorque Bench Mill 6500, plus:

- 3-axis digital readout (DRO) with Bluetooth and 7" tablet display
- Larger table
- Electrically interlocked spindle lock
- Machined aluminum handwheels

The LittleMachineShop.com HiTorque Bench Mill is a step up in size, rigidity, and power compared to a mini mill. This HiTorque benchtop milling machine for sale provides a larger table, more travel, and more horsepower. A 750 watt (1 hp) brushless DC motor provides abundant spindle power and tremendous low-end torque. Controls on the straightforward control panel reverse direction, enable tapping mode, and allow you to resume running at the previously used spindle speed. The 23.4" x 5.5" (595 mm x 140 mm) table provides a large work area. The HiTorque Bench Mill incorporates a true quill and drill press-style handles for easy drilling. A button on the end of each handle reverses the spindle to make tapping easy. The control panel includes a digital spindle speed display. A simple belt change switches between low range and high range, giving you continuously variable spindle speeds from 80-5000 rpm.

The model 6500 Deluxe HiTorque Benchtop Milling Machine has all the features of popular HiTorque Bench Mill 6500, plus:

- 3-axis digital readout (DRO) with Bluetooth and 7" tablet display
- Larger table
- Electrically interlocked spindle lock
- Machined aluminum handwheels

The LittleMachineShop.com HiTorque Bench Mill is a step up in size, rigidity, and power compared to a mini mill. This HiTorque benchtop milling machine for sale provides a larger table, more travel, and more horsepower. A 750 watt (1 hp) brushless DC motor provides abundant spindle power and tremendous low-end torque. A simple belt change switches between low range and high range, giving you continuously variable spindle speeds from 80-5000 rpm.

The HiTorque Bench Mill incorporates a true quill and drill press-style handles for easy drilling. A button on the end of each handle reverses the spindle to make tapping easy. Like our smaller mills, the 6700 HiTorque Large Bench Mill has an R8 spindle for wide tool availability. The control panel includes a digital spindle speed display. A separate display provides digital position readout for the quill. A handy magnetic "tool box" on the side of the column provides a convenient place for the spindle wrench and drawbar wrench. This mill is a version of the SIEG SX3.5.

WARNING: At over 350 pounds, you and your buddies can't lift this onto your bench. You will need an engine hoist, fork lift, or other mechanical assist to move this machine.

Machines: Mills

4700 HiTorque Micro Mill, 2MT Spindle $849.95
- Most powerful micro milling machine in its class & most low-speed torque in its class
- No gears in spindle drive
- R8 Morse taper spindle
- Digital spindle speed readout
The LittleMachineShop.com HiTorque Micro Mill is the best in its class. It has the most power, most torque, and a larger table than other mills in its class. The 250 Watt brushless spindle drive motor provides tremendous low-end torque. And you can vary the speed from 100 rpm to 5000 rpm continuously. There are no gears or belts to shift. And, with no gears, the HiTorque Micro Mill is the quietest in its class. The large mill table provides 50% more width than other micro mills. The resettable feed dials allow you to zero them at any point. The HiTorque Micro Mill has a drill press handle for drilling. It also has Z-axis fine feed with 0.001" resolution for milling operations. This is a version of the SIEG X1XP micro milling machine for sale.

3990 HiTorque Mini Mill $1,149.95
- Most powerful mini mill machine in its class
- Most low-speed torque in its class
- No gears in spindle drive
- Largest table and X-Y travel in its class
- R8 spindle and drill chuck
The LittleMachineShop.com HiTorque Mini Mill is the best in its class. It has the most power, most torque, and a larger table than other mills in its class. This mill has a solid column. It does not tilt from side to side. This construction is significantly stiffer than the tilting column on other mini mills. This model also includes the air spring head support for even support through the Z-axis range of travel. The 500 Watt brushless spindle drive motor provides tremendous low-end torque. And you can vary the speed from 50 rpm to 2500 rpm continuously. There are no gears to shift. And, with no gears, the HiTorque Mini Mill machine is the quietest in its class. The large mill table provides 50% more table area than other mini mills. It also has 30% more travel in each direction. The resettable feed dials allow you to zero them at any point. The HiTorque Mini Mill has drill press handles for drilling and fast motion of the mill's head. It also has Z-axis fine feed with 0.001" resolution for milling operations. "NOTE" We ship machines only to the US and Canada.

4190 HiTorque Mini Mill, Deluxe $1,799.95
- Includes 3-axis DRO and interlocked spindle lock
- Most powerful mini mill in its class with the most low speed torque
- No gears in spindle drive
- Largest table and X-Y travel in its class
- R8 spindle and drill chuck
The Model 4190 Deluxe HiTorque Mini Mill for sale has all the features of our popular Model 3990 HiTorque Mini Mill, plus: 3-axis digital readout (DRO) with Bluetooth and 7" tablet display. The DRO is completely installed on the mill. It has an interlocked spindle lock. The LittleMachineShop.com HiTorque Mini Mill for sale is the best in its class. It has the most power, most torque, and a larger table than other mills in its class. This mini milling machine has a solid column. It does not tilt from side to side. This construction is significantly stiffer than the tilting column on other mini mills. This model also includes the air spring head support for even support through the Z-axis range of travel. The 500 Watt brushless spindle drive motor provides tremendous low-end torque. And you can vary the speed from 50 rpm to 2500 rpm continuously. There are no gears to shift. And, with no gears, the HiTorque Mini Mill is the quietest in its class. The large mill table provides 50% more table area than other mini mills. It also has 30% more travel in each direction. The resettable feed dials allow you to zero them at any point. The HiTorque mini milling machine for sale has drill press handles for drilling and fast motion of the mill's head. It also has Z-axis fine feed with 0.001" resolution for milling operations. "NOTE" We ship machines only to the US and Canada.

Machines: Stands/Cabinets

5626 Stand Cabinet, 7x16 Mini Lathe $195.37
- Metal stand and chip tray for mini lathe
- Single column two door design
- 34.9" x 13.9" x 34.9" (886 mm x 354 mm x 886 mm)
- Cabinet for storage with locking door
- Fits SIEG SC2 and HiTorque 7x16 mini lathes
This single column two door design black stand comes with a built-in cabinet and is suitable for all SIEG SC2 7x16 and HiTorque 7x16 mini lathes. The cabinet has one shelf. The tray dimensions are 34.9" x 13.9" x 0.4" (886 mm x 354 mm x 11 mm). Predrilled holes in the tray are sized for securing compatible 7x16 mini lathes. This chip tray has been upgraded to be more robust than the trays that ship with most mini lathes. The stand has bolting slots for securing the stand to a floor for additional stability and safety. See the Compatibility tab for machines that work with this product.

5503 Chip Tray, 7x10 Mini Lathe $19.41
- Fits SIEG C4 & SC4 and HiTorque 8.5x20 bench lathes
- Holes align for securing compatible bench lathe
- Also available as a single tray
This double column two door design black stand comes with two built-in cabinets and a chip tray, and is suitable for all SIEG C4 & SC4 and HiTorque 8.5x20 bench lathes. The cabinet has one shelf. The tray dimensions are 39.8" x 19.9" x 0.98" (1010 mm x 505 mm x 25 mm) and the overall height is 30.7" (780 mm). Positioning blocks are predrilled for securing a compatible bench lathe. This chip tray has been upgraded to be more robust than the trays that ship with most lathes. The stand has bolting slots for securing the stand to a floor for additional stability and safety. See the Compatibility tab for machines that work with this product.
This single column black stand comes with a built-in metal storage cabinet and is sized for micro mills. The cabinet has one shelf. The tray dimensions are 20.78" x 23.94" x 1.38" (527 mm x 608 mm x 35 mm) and the unit stands 33.66" (855 mm) high. The chip tray has been upgraded to provide years of service. The tray has predrilled holes for securing HiTorque and SIEG SX2.7 bench mills.

The cabinet base has bolting slots for securing the stand to a floor for additional stability and safety. See the Compatibility tab for machines that work with this product.

5581 Stand Cabinet, HiTorque Bench Mill $263.37

5629 Stand Cabinet, HiTorque Mini Mill $161.24

5627 Stand Cabinet, Micro Mill $158.24

5846 Deluxe Productivity Upgrade Package, HiTorque Bench Mill $429.00

To operate, flip the Spindle Brake fork down over the spindle while the spindle is at rest. Then rotate the spindle by hand until the set screws in the Spindle Brake fork mesh with a spindle spline. Once the tool change is complete, lift the Spindle Brake fork up into the retracted position and you are ready to go.

The Quill Stop provides a quick and accurate way to set the quill depth of cut. It is great for drilling multiple holes to the same depth. The Quill Stop is also very handy in performing single or repeated chamfering of parts. To set up the chamfer for the first time on a part, turn the mill off and simply lower the cutter to the top of the part, lock the fine feed knob, and back-off one full turn (turn the Button Nut clockwise as viewed from the top). Then start the mill and turn the Button Nut on the Quill Stop clockwise in small increments until the cutter contacts the part. Then continue turning the Button Nut counterclockwise and alternately lowering the quill until the desired chamfer is achieved.

The Quill Stop works equally well performing inside chamfers using typical chamfering mills, and outside chamfers using, for example, a hollow mill.

The Power Lift system for the Little Machine Shop 5500 mill functionally replaces the Z-Axis manual hand wheel that is used to raise and lower the mill head. Using the Power Lift system is much faster than using the hand wheel, and really easy, just press the switch up or down and release, and you are done. It is much faster than using the hand wheel, and much easier on your shoulder.

5657 Power Lift System, HiTorque Bench Mill $269.00

5842 Productivity Upgrade Package, HiTorque Bench Mill $224.95

4327 Drawbar, Bench Mill, Quick Release $33.31

Eliminates need for spindle wrench
Quick release drawbar designed to easy tightening and release for R8 spindle without a spindle lock. This drawbar is compatible with SIEG SX2.7 class bench mills including the HiTorque Bench Mills. To use, hold drawbar securely with one wrench and tighten/loosen secondary nut. The use of two wrenches at the top of the drawbar eliminates the need to use a spindle wrench to hold the spindle stationary with one hand while working with the drawbar. This drawbar is not necessary for bench mills that have a spindle lock. The overall length of the drawbar is 12 7/16" in length (316 mm) when measured like a bolt. The bushing that centers the drawbar in the spindle has three steps with the diameter of each being 13 mm (0.512) 20 mm (0.787) 25 mm (0.984). This drawbar can be used in place of the standard drawbar provided with any HiTorque Bench Mill (SX2.7, #50 in the SIEG SX2.7 drawings.

5655 Spindle Lock, HiTorque Bench Mill, Flip Style $119.00

**Descriptions**

- **5835** Power Drawbar, Bench Mill
  - Activation with the flip of a switch
  - Provides a consistent holding force of approximately 40 pounds at 90 psi.
  - Safety activation/lockout feature.
  - Does not place a load on the spindle bearings.
  - System easily swivels out of the way for manual drawbar operations.

- **5113** Power Feed, 5500 Bench Mill
  - Fits 5500 HiTorque Bench Mills and SIEG SX2.7 Mills
  - Clutch disengages power feed when not in use
  - Adjustable limit switches restrict travel
  - 120-240V 50-60Hz

- **5876** Quill Lock Knob Deluxe, HiTorque Bench Mill
  - Easily loosen or tighten the quill
  - Knurled steel for easy of grip and turning
  - Designed to replace factory cap screw
  - Saves time and effort
  - Custom made for the HiTorque Bench Mill

- **5586** Tramming Set, Bench Mill
  - Everything you need to tram a bench mill
  - Dial test indicator
  - Universal arm locks with one knob
  - Shim assortment

- **3954** Feed Screw Parts, 20 TPI, HiTorque Mini Mill
  - These parts change HiTorque mini mills to 20 thread per inch feed screws on the X- and Y-axis.
  - Each rotation of the hand wheel will advance the table 0.050".
  - The kit includes two feed screws, two nuts, two 50 division dials, plus the springs and keys that you are going to lose during disassembly.

- **1178** Feed Screw Parts, Metric, HiTorque Bench Mill
  - For models 5500, 6500
  - This kit changes the HiTorque bench mill to metric feed screws on the X- and Y-axis. It also changes the Z-axis to read in mm.
  - The kit includes two feed screws, two nuts, two dials, two scales, the Z-axis feed knob, plus the springs, pins and keys that you are going to lose during disassembly.

- **4249** Feed Screw Parts, Metric, HiTorque Mini Mill
  - This kit changes the HiTorque mini mill to metric feed screws on the X- and Y-axis. It also changes the Z-axis to read in mm.
  - The kit includes two feed screws, two nuts, two dials, two scales, the Z-axis feed knob, plus the springs, pins and keys that you are going to lose during disassembly.

- **4151** High Speed Spindle Kit, HiTorque Mini Mill
  - Fits HiTorque mini mills
  - 5000 rpm top speed
  - Includes two pulleys and a belt
  - Belt is 350-SM15, 70 teeth

- **4483** Solid Column Conversion Kit, HiTorque Mini Mill
  - Converts a HiTorque Tilting Column Mini Mill to the solid column version.
  - Can be used on other Mini Mills (See Chris’ Tips)
  - This mini mill conversion kit converts a HiTorque Tilting Column Mini Mill (part number 3900) to solid column.
  - The kit includes the base and column from the HiTorque Solid Column Mini Mill (part number 3960), the fasteners needed to connect them, and complete instructions.

- **4762** Spindle Lock, Interlocked, HiTorque Mini Mill
  - Makes tool changes easier, faster, and safer
  - When engaged, the plunger automatically drops into the locking hole as the spindle is rotated
  - An electro-magnetic interlock disables power to the motor when the spring plunger is engaged
  - Frees both hands for changing tools
  - Loosen and tighten keyless chucks with one hand
  - The spindle brake provides a semi-automatic method of locking the spindle freeing both hands to complete a tool change. A safety switch disables power to the motor when the spring plunger is engaged. Fits SIEG SX2 mills

**Mill: Mini Mill (X2) Assemblies**

- Rigid stop for small milling machines
- Made of hardened steel
- Column is 0.47" diameter and 3.94" tall
- Base is 1.57" wide, 2.76" long and 0.47" thick
- Rod is 0.375" diameter and 6' long
- Use this work stop with vises, angle plates, jigs, and so on.
- It is the perfect size for 3" and 4" vises.

- 30% more travel in both directions
- 50% more table area
- Unbolt the column from your existing X-Y table and bolt it to this one.
- Great for the Grizzly G0516

This is a complete X-Y table assembly for a mini mill. The table is 120 mm (4.73") by 460 mm (18.11”). It has three 12 mm T-slots. The X-axis travel is 300 mm (11.8”) and the Y-axis travel is 130 mm (5.1”). The dials are graduated in 0.001” and one turn of the hand wheels moves the table 0.050". The X-Y table is made of cast iron and steel. There are adjustable gibs on both axes. This is all you need to make a mini mill using the milling column from a Grizzly G0516 Combo Lathe with Milling Attachment.

- Bolt pattern for solid column attachment (P/N 4307)
- Rigid stop for small milling machines
- 50% more table area
- Includes the motor, motor controls, spindle housing and spindle. In short, it includes everything that travels up and down the column.

This is the complete head assembly for the mini mill. It includes the motor, motor controls, spindle housing and spindle. In short, it includes everything that travels up and down the column. This mini mill head assembly has an R8 spindle. The motor controller is a PWM variable speed controller with overload protection and a zero-speed start interlock. Motor: 350 Watt (0.47 HP) Low speed: 0-1100 RPM High speed: 0-2500 RPM full-speed RPM Drilling capacity: 1/2” End milling capacity: 5/8” Face milling capacity: 5/8”

- High/low speed shifting mechanism
- Most powerful mill in its class
- Most low-speed torque in its class
- No gears in spindle drive
- No gears in spindle drive
- Most powerful mill in its class

This is the complete head assembly for the HiTorque mini mill. It includes the motor, motor controls, spindle housing and spindle. In short, it includes everything that travels up and down the column. This mini mill head assembly has an R8 spindle. The 500 Watt brushless spindle drive motor provides tremendous low-end torque. And you can vary the speed from 50 rpm to 2500 rpm continuously. There are no gears to shift. And, with no gears, the HiTorque Mini Mill is the quietest in its class.

- Drilling capacity: 1/2"
- End milling capacity: 5/8”
- Face milling capacity: 1-1/8”
- Power: 120V, 60 Hz

**Variable Speed Drive Package**

- Complete 250 W (1/3 HP) variable speed drive
- 120 V 60 Hz power
- 0-5000 RPM
- Forward and Reverse

This is a complete variable speed motor and controller. Hook up the motor leads, plug it in and you have a 1/3 HP variable speed drive system.

The motor is 83 mm in diameter. The body of the motor is 145 mm long. The motor shaft is 8 mm diameter with a 3 mm keyway and extends out 21.5 mm. There is a retaining ring groove near the end of the shaft.

There are two M6 threaded holes in the side of the motor for mounting, our it can be end mounted with a motor mounting flange.
Mill: Mini Mill (X2) Assemblies

2008 X-Y Table Assembly $172.92

This small precision X-Y table can be used on a drill press or other machine to precisely locate your workpiece. The table is 90 mm (3.54”) by 200 mm (7.87”). It has three 8 mm T-slots. The complete X-Y assembly is 10.15” wide, 8.5” deep and 2.5” high. The X-axis travel is 135 mm (5.31”) and the Y-axis travel is 70 mm (2.76”). The height of the table is 60 mm (2.36”). The base is 100 mm (3.94”) by 75 mm (6.89”). The dials are graduated in 0.001” and one turn of the hand wheels moves the table 0.050”. The X-Y table is made of cast iron and steel. There are adjustable gibs on both axes.

Mill: Quick Change Tooling

About the Tormach Tooling System

Tool switching with the Tormach Tooling System (TTS) is extremely easy: Simply loosen the drawbar, slide out the current tool holder, then slip in the next and retighten. The unique geometry of the TTS tool holder ensures that, as the drawbar is tightened, the tool holder moves into an exact Z height while increasing rigidity.

Each TTS holder has a shoulder that is undercut so it contacts the spindle itself, not the end of the collet. As the drawbar is tightened the collet will simultaneously squeeze the shank and be pulled upward into the spindle taper. This simultaneous action, grasping while moving up, pulls the tool holder tightly against the spindle face. The high-pressure contact between the shoulder of the tool holder and the spindle is the equivalent of a zero tolerance fit; the vertical location (Z-height) of the tool is exact. The initial placement, created by simply sliding the tool holder up until it stops, is normally within a few thousandths of an inch. The final location, after tightening the collet, is exact, highly repeatable, and not affected by the variable tension of the drawbar or wear on the collet.

4910 Tool Conversion Kit, Tormach TTS $24.95
4295 Tool Height Setting Package, Tormach $365.00

2436 Arbor, Drill Chuck, Tormach TTS to 33JT $13.99

- Quick change arbor for 1/2” drill chucks
- Minimal clearance height for tool change
- Repeateable tool positioning
- Hardened and precision ground

Part of the Tormach Tooling System (TTS) this 33JT arbor is used for mounting standard keyway and keyless drill chucks.

2456 Boring Head Arbor, Tormach TTS $48.95

- Quick change boring head shank with 7/8-20 thread
- Minimal clearance height for tool change
- Repeateable tool positioning
- Hardened and precision ground

Part of the Tormach Tooling System (TTS) this boring head arbor fits to 7/8-20 UNF mounted hears or other tooling with the 7/8-20 thread.

2454 Collet Holder, Tormach TTS, R8, 3/4” $39.95

- Special shortened R8 collet for TTS system
- Precision ground

This precision ground R8 collet is shorter than a normal R8 collet to ensure that the TTS tool holder contacts the spindle.

2455 Collet, Tormach TTS, 3MT, 3/4” $31.95

3588 Drill Chuck, Tormach TTS, 1/4” $44.95

- 0-1/4” Capacity drill chuck
- Mounted on Tormach Tooling System Arbor
- Minimal clearance height for tool change
- Repeateable tool positioning
- Hardened and precision ground

0-1/4” Capacity drill chuck and Tormach Tooling System Arbor. All working parts are hardened. Chuck key is included. Number 1 Jacobs taper mount.

2434 End Mill Holder, Tormach TTS, 3/8” $21.99

- Quick change adapter for 3/8” shank end mills
- Minimal clearance height for tool change
- Repeateable tool positioning
- Hardened and precision ground

Part of the Tormach Tooling System (TTS) this set screw hold is intended to be used with end mills that have a Weldon shank. The tool holder has a set screw on one side and a balancing dimple on the other side. The balancing dimple reduces vibrations at speeds above 8000 RPM.

2698 Blank Tool Holder, Tormach TTS $29.95
2438 End Mill Holder, Tormach TTS, 1/2” $21.99
3026 End Mill Holder, Tormach TTS, 1/4” $21.99
4125 End Mill Holder, Tormach TTS, 10 mm $21.99
4126 End Mill Holder, Tormach TTS, 12 mm $21.99
3025 End Mill Holder, Tormach TTS, 5/16” $21.99
4124 End Mill Holder, Tormach TTS, 6 mm $21.99

4581 Passive Probe, Tormach $395.00

- For edge finding and digitizing

The passive probe is an affordable option for occasional and hobby use. This probe uses a normally closed sensing logic and is suitable for edge finding, digitizing, and other basic probing procedures. Stylius is ground steel ball. It interfaces with the PCNC mill using a 5 pin DIN connector. Includes 10mm TTS low-profile mount.

4805 Shell Mill Arbor, 1/2”, Tormach Quick Change $79.95

- Compatible with shell mills designed for 1/2” R8 arbors
- Works with 4121 Face Mill
- 1/4-28 thread

This is the TTS arbor used for the 4121 face mill.

2440 Starter Set, CNC, Tormach TTS $995.00

- Complete set for CNC operations includes 13 tool holders
- Minimal clearance height for tool change
- Repeateable tool positioning
- All tool holders are hardened and precision ground
- Tool height presetting set included

CNC operations work best with one holder for each tool in order to make use of the tool length compensation table in the CNC controller. This function also requires a system for measuring the mounted tools. The CNC set includes a total of 13 tool holders plus a tool measuring set. The Tormach Tool Assistant Set includes 8” digital height gauge (measurement accuracy +/-0.0005”), USB interface cable with touch trigger, manual, and Tool Assistant software. This is an outstanding value and a great way to get started with a CNC that has been retrofitted from a manual machine. If your CNC machine supports a tool offset table but you’re not using it, then you’re not realizing the full benefit of CNC machining.

4608 Starter Set, CNC, Tormach TTS, Metric $995.00

2441 Starter Set, Manual, Tormach TTS (inch) $245.00

- Complete set for manual operations includes 4 tool holders
- Minimal clearance height for tool change
- Repeateable tool positioning
- All tool holders are hardened and precision ground

You don’t need a CNC to take advantage of the Tormach Tooling System. Manual operations benefit from quick change, reduced clearance, and increased rigidity. This is a basic set that will introduce users to all of those features. The manual mill operators set will improve productivity in manual milling.
Mill: Quick Change Tooling

4663 SuperFly Cutter, Tormach TTS $145.00
- Adjustable to 3” (75mm) Cutting Diameter
- Includes tool bar for SEHT Insert
- 1.8” (46mm) Height
- TTS Fly Cutter Body with ATC Geometry

The Tormach SuperFly cutter kit has modern insert geometries and is specially designed for maximum performance on spindles with less than 3hp.

Kit includes the fly cutter body, tool bar, two general purpose carbide inserts, two polished carbide inserts for aluminum machining, insert screw, wrench and anti-seize.

Like all Tormach TTS tools, the SuperFly Cutter has a 3/4” straight shank. Use it with the TTS system, or use it in any 3/4” collet.

Tormach part number 38258.

4688 Insert, SEHT43AFFN-X83, Tormach $17.95
4689 Insert, SEHT43AFSN-X45, Tormach $16.95
4799 Screw, Insert Retaining, SEHT Inserts $6.95

4905 Tool Tightening Fixture, Tormach TTS $39.95
- Single handed operation
- One-way bearing design: insert tool on left side to loosen and right side to tighten
- Black anodized aluminum body
- Hardened and precision ground
- Do not use with with TTS-ER Tension/Compression Tapping Heads

The Compact tool tightening fixture for the Tormach Tooling System uses a one-way bearing for easy one-handed tightening and loosening of TTS-ER tools or TTS Modular Insert tools. It is also handy for loosening and tightening Tormach setscrew holders and other TTS tools.

5037 Wrench, ER-16 & ER-20, Deluxe Tormach Set $34.95
- Includes (1) Box End wrench for retention nuts and (1) open-end wrench for TTS arbors.
- Anodized Aluminum Alloy
- Slim Profile
- High Visibility Blue Color
- Laser Size Marking

This set works for both ER-16 and ER-20 TTS holders as well as other ER-16 and ER-20 collet nuts and chucks.

5041 Wrench, ER-32, Deluxe Tormach Set $34.95

Mill: Small Mill (X3/SX3) Accessories

5877 Power Lift System, G0704 Bench Mill $219.00
- For Grizzly G0704 Mills
- Controlled by motor control toggle switch
- Switch is mounted to the system plate and has three momentary positions: up, off, and down.
- 120V AC powered reversible gear motor
- Made in precision machining centers in the U.S.A

The Power Lift system for the Grizzly G0704 mill functionally replaces the Z-Axis manual hand wheel that is used to raise and lower the mill head. Using the Power Lift system is really easy, just press the switch up or down and release, and you are done. It is much faster than using the hand wheel, and much easier on your shoulder.

4672 Quill Stop, X3 and SX3 Mills $125.95
- Quick and accurate way to set quill depth of cut
- Press the button and the nut disengages from the thread
- Slide to desired position and release the button to engage threads
- Turn the nut for micro-adjustments
- Set accurate and consistent depth of cut for repeated machining operations

The Quill Stop provides a quick and accurate way to set the quill depth of cut. It is great for drilling multiple holes to the same depth. The Quill Stop is also very handy in performing single or repeated chamfering of parts. To set up the chamfer the first time on a part, turn the mill off and simply lower the cutter to the top of the part, lock the fine feed knob, and back-off one full turn (turn the Button Nut clockwise as viewed from the top). Then start the mill and turn the Button Nut on the Quill Stop counter clockwise in small increments until the cutter contacts the part. Then continue turning the Button Nut counterclockwise and alternately lowering the quill until the desired chamfer is achieved.

The Quill Stop works equally well performing inside chamfers using typical chamfering mills, and outside chamfers using, for example, a hollow mill. Requires a slight modification to the mill (drill & tap 1/4-20 holes in the side of the machine head).

This quill stop works well on the Grizzly G0619 and G0463 mills.

4803 Spindle Spline Wrench $22.95
- Manufactured from a single forged piece of steel
- Black oxide finish
- Fits X3 mills
- 25mm and 28mm splines

This steel spindle wrench perfectly engages the spindle spline enabling full control of spindle rotation during drawbar loosening or tightening operations. The spindle spline wrench solves the no spindle lock problem for many mills. The wrench has a black oxide finish and is 8.5 inches (216 mm) long. The Spindle Spline Wrench is a must-have tool for anyone who owns or operates an X3 milling machine or other large round column or square column mill.

Mill: Tooling

1626 Boring Head Shank, R8 $34.95
- R8 Boring Head Shank
- 7/8”-20 Mounting Thread
- Tapped for 7/16”-20 Drawbar
- Made of high grade tool steel
- Hardened and ground

This boring head shank has an R8 taper on one end and a 7/8”-20 thread on the other. The mill boring head shank adapts our boring head to mills with an R8 spindle.

4824 Boring Head Shank, 1/2” Straight $21.95
1630 Boring Head Shank, 2MT $24.95
1265 Boring Head Shank, 3MT $29.95
5402 Boring Head Shank, 3MT Professional Grade $36.95
5401 Boring Head Shank, R8 Professional Grade $31.95

1266 Boring Head, 2” $52.95
- 2” boring head holds 1/2” shank boring bars
- The mill boring head offsets up to 5/8”
- Mounts on a shank with a 7/8”-20 thread
- Dial is graduated in 0.001”
- Bar holder moves freely and smoothly

Two inch round boring head designed with superior rigidity for chatter-free boring and precise hole size accuracy. Ground and hardened adjusting screw is designed for long lasting, trouble free use.

4764 Boring Head, 2” Professional $109.95
- 2” diameter boring head holds 1/2” shank boring bars
- The boring head offsets up to 5/8”
- Mounts on a shank with a 7/8”-20 thread
- Dial is graduated in 0.001”
- Boring bar holder moves freely and smoothly

The design of this boring head assures superior rigidity for chatter free boring and precise hole accuracy. The adjusting screw is hardened and ground for long lasting trouble free use.
Mill: Tooling

1978 End Mill Holder Set, 2MT, 4-Piece $81.68
- Set of four 2 Morse taper end mill holders
- 2 Morse Taper Shanks
- Drawbar thread is 3/8-16
- Compatible with Mills with 3 Morse Taper Spindle
- For end mills with shanks 3/16", 3/8", 1/2", and 5/8"

The 4-Piece end mill holder set includes adapters for end mills with shank diameters of 3/16, 3/8, 1/2, and 5/8 inches. This end mill holder set works with the Harbor Freight micro mill and other mills with a 2 Morse taper spindle. The drawbar thread is 3/8-16 NC.

1706 End Mill Holder, 2MT, 1/2" $18.95
1976 End Mill Holder, 2MT, 3/16" $18.95
1705 End Mill Holder, 2MT, 3/8" $21.90
1977 End Mill Holder, 2MT, 5/8" $24.10

1636 End Mill Holder Set, 3MT, 5-Piece $122.11
- Set of five R8 end mill holders from 3/16" to 3/4"
- R8 Shanks
- Drawbar End Thread is 7/16"-20
- Compatible with Mills with R8 Spindle
- For end mills with shanks 3/16", 3/8", 1/2", 5/8", and 3/4"

The 5-Piece end mill holder set includes adapters for end mills with shank diameters of 3/16, 3/8, 1/2, 5/8, and 3/4 inches. This end mill holder works with the mini mill and bench mill. Made for mini mill and bench mill.

1633 End Mill Holder, 3MT, 1/2" $24.95
1631 End Mill Holder, 3MT, 3/16" $28.35
1635 End Mill Holder, 3MT, 3/4" $31.04
1632 End Mill Holder, 3MT, 3/8" $24.95
1634 End Mill Holder, 3MT, 5/8" $29.66

1258 End Mill Holder Set, R8, 5-Piece $108.29
- Set of five R8 end mill holders from 3/16" to 3/4"
- R8 Shanks
- Drawbar End Thread is 7/16"-20
- Compatible with Mills with R8 Spindle
- For end mills with shanks 3/16", 3/8", 1/2", 5/8", and 3/4"

The 5-Piece end mill holder set includes adapters for end mills with shank diameters of 3/16, 3/8, 1/2, 5/8, and 3/4 inches. This end mill holder works with the mini mill and bench mill. Made for mini mill and bench mill.

1255 End Mill Holder, R8, 1/2" $20.24
1253 End Mill Holder, R8, 3/16" $20.24
1256 End Mill Holder, R8, 3/8" $22.58
1254 End Mill Holder, R8, 3/4" $20.24
1256 End Mill Holder, R8, 5/8" $22.24

1231 Fly Cutter Set $15.95
- A set of three 1/2" shank fly cutters. The 3/4" body fly cutter uses a 3/16" tool bit. The 1-1/8" body fly cutter uses a 1/4" tool bit. The 1-3/8" body fly cutter uses a 5/16" tool bit. Fly cutter sets allow you to make fine finishes on large areas.

3094 Fly Cutter Set with Tool Bits $18.95

5925 Fly Cutter, 2 1/2" Head R8 Shank $26.95
- R8 Shank Fly Cutter with 2-1/2" Head
- Utilizes standard 5/16" tool bits
- Counter Balanced
- Made of Durable Hardened Steel

R8 Shank fly cutter with a 2 1/2" head. The cutter utilizes a standard 5/16" tool bit and is counter balanced. Made of durable hardened steel, cuts a flat and smooth surface with a single cut. Like every R8 tool, the R8 drawbar thread is 7/16-20.

4882 Fly Cutter, Adjustable 1.25"-2.5", 3/8" Shank $22.95
- Adjustable from 1-1/4" to 2-1/2" inch cutting diameter
- Allen key for set screws
- 1-1/8" Height
- 3/8" Shank
- Includes presharpened 1/4" Left Hand tool bit

This adjustable fly cutter has a 3/8" diameter and short profile making it ideal for ER-16 or 2MT spindles, but will also work wonderfully well on larger mills with R8 or 3MT spindles.

1664 Mill Table $34.06
- This is the mill table from a 3-in-1 machine. It is approximately 9.5" long, 4.25" wide and 1" thick. The mill table has 12 mm T-slots so it uses 7/16" T-slot nuts.

1709 Spin Jig, SC Precision Indexing $64.95
- ER-32 Indexing Spin Jig With Wrench
- 10 vernier holes for 1° indexing
- 2" spindle travel for flute grinding
- Spindle lock for tightening collet
- Base footprint is 4.5" x 4.5".

This indexing spin jig is used on milling machines, grinders, and inspection equipment. The spindle is hardened and ground. The spindle accuracy is 0.0004 TIR. The indexing plate is precision ground. The SC spin indexer directly indexes in 10 degree steps. The vernier provides 1 degree increments. The centerline of the milling machine indexer spin jig is about 2.75 above the base.

1132 Spin Jig, ER-32 Precision Indexing $112.95
- ER-32 Indexing Spin Jig With Wrench
- 10 vernier holes for 1° indexing
- 2" spindle travel for flute grinding
- Spindle lock for tightening collet
- Base footprint is 4.5" x 4.5".

This indexing & grinding fixture uses ER-32 collets (range 1/16-13/16") for better gripping and accuracy. Extends the capabilities of drill presses, surface grinders, gear cutters and milling machines. Spindle hardened and ground with a .0005" T.I.R. 10 vernier holes for 1° indexing. 2" spindle travel for flute grinding. 5" diameter index plate has a 36 hole circle and is graduated by 0 to 35 for direct indexing in 1° steps and is marked in 5° increments. Spindle lock for tightening collet. Center height is 2.75". Base footprint is 4.5" x 4.5". Ground parallel to spindle.

3878 Tilting Table, 7" x 5" $148.95
- Tilts 40-0-40 degrees with worm drive
- Graduated in degrees for quick setting
- Heavy duty casting with three 1/2" T-slots
- Overall height 3.75"
- Locks in any position

4084 Tooling Plate, 6 x 12" $139.95
- Made from aluminum plate 3/4" thick
- Plate 6" x 12"
- 220 Holes tapped 1/4-20, 72 holes for locating pins
- Includes clamping kit
- Designed for small work pieces

Solid 6" x 12" aluminum tooling plate with 1/4-20 tapped holes, clamping kit, and locating pins. Taps 220 1/4"-20 tapped holes. There are 55 diamond patterns of 4 holes that are 3/8" C to C. The diamond patterns are on a 1" x 1" grid. There are 72 1/4" holes for locating pins on a 1" x 1" grid. At each end there is a counterbored hole for a 3/8" socket head cap screw.

4991 T-Slot Cleaner, 7/16" T-Slot $1.95
- Use this T-slot cleaner to clear the swarf from the T-slots on your mini mill and bench mill. Made for LittleMachineShop.com specifically to fit the Mini Mill and Bench Mill.

1263 T-Slot Cleaner, 5/8" T-Slot $1.49

<tbody>
<tr>
<td>● Cast iron and bronze flywheels</td>
</tr>
<tr>
<td>● Highest quality made by Martin Model &amp; Pattern</td>
</tr>
<tr>
<td>● Cast iron flywheels are fully annealed</td>
</tr>
<tr>
<td>● Castings are oversize to allow turning to the specified diameter</td>
</tr>
<tr>
<td>All Martin Model &amp; Pattern iron castings are fully annealed for easier machining. When molten iron is poured into a sand mold, it cools very quickly where it contacts the cold sand. Quick cooling being the formula for hardening iron, this results in a very hard surface, or skin, on the casting. It's commonly known that you must address this hard skin when you start machining a casting. But Martin Model castings go through another heat treat process. After the castings have cooled, they are once again heated to a high temperature, but this time they are cooled slowly. This ensures that the castings are evenly soft throughout, and that there is no hard skin on the surface.</td>

### Precision: Calipers

- **Dial Caliper, 6”, Starrett** $209.00
  - Starrett 6” white dial caliper and fitted case
  - Direct reading, reliable and accurate.
  - American Made
  - This is one of the handiest measuring tools available, used by mechanics and toolmakers everywhere. It is direct reading, reliable, and accurate. The Starrett 120 Series dial calipers are the only American made dial calipers on the market. Starrett catalog number 120A-6.

- **Dial Caliper, 6”, Starrett** $120.00
  - Starrett 6” white dial caliper and fitted case
  - Starrett catalog number 3202-6
  - Sharp, clear dial graduations of .001” with .100” per revolution
  - Sharp, black graduations on the satin finished bar, every .100”
  - This is one of the handiest measuring tools available, used by mechanics and toolmakers everywhere. It is direct reading, reliable, and accurate. With the ability to provide quick, accurate measurement of O.D., I.D. and depth, the dial caliper is the most versatile precision hand tool on the market. Imported.

- **Electronic Digital Caliper 6”, 4 Buttons** $32.95
  - 6” (150 mm) range
  - 0.0005” (0.01 mm) resolution
  - 0.001” (0.02 mm) accuracy
  - Reads inches or mm
  - Four button model has display lock
  - This 6” electronic digital caliper has manual power on and off. It won’t go off and lose your measurement. There are four buttons (one more than most digital calipers). OFF/ON: Turns the power on and off. ZERO: Sets the readout to zero at any position. MM/INCH: Switches between inch and metric display. HOLD: Locks the display. Use this button when you take a measurement where you cannot easily see the display. Press HOLD again to unlock the display. You can make absolute or relative inside, outside, depth, and step measurements.
  - Furnished with a fitted case.

- **Electronic Digital Caliper, 6”** $29.95
  - 0-6” (0-150 mm) range
  - 0.0005” (0.01 mm) resolution
  - 0.001” (0.02 mm) accuracy
  - Reads inches or mm
  - This 6” electronic digital caliper has manual power on and off. There are three buttons. OFF: Turns the power off.
  - ON/ZERO: Turns the power on and sets the readout to zero at any position. MM/INCH: Switches between inch and metric display. You can make absolute or relative inside, outside, depth, and step measurements. Furnished with a fitted case.

- **Electronic Digital Caliper, 4”** $29.95
  - 0-4” (0-100 mm) range
  - 0.0005” (0.01 mm) resolution
  - 0.001” (0.02 mm) accuracy
  - Reads inches or mm
  - This 4” electronic digital caliper has manual power on and off. The three buttons perform the following: OFF/ON: Turns the power on and off. ZERO: Sets the readout to zero at any position.
  - MM/INCH: Switches between inch and metric display. You can make absolute or relative inside, outside, depth, and step measurements. Furnished with a fitted case.

- **Electronic Digital Caliper, 6” Fractions** $34.95
  - Range: 0-6” (0-150 mm)
  - Accuracy: 0.001”/6”
  - Resolution: 0.0005” / 0.01mm / 1/128”
  - Easy to Read Super Large Display LCD
  - IP54: Splash water, oil and dust resistance
  - This 6” electronic digital caliper has a large display and easily switches from inches (decimal) to fractions to metric measurements. The caliper has an easy to read large display LCD. The hardened stainless steel construction allow for smooth movement and a high measure speed. The three buttons perform the following: OFF/ON: Turns the power on and off. ZERO: Sets the readout to zero at any position. MM/INCH: Switches between inch and metric display. Furnished with a fitted case.

- **Electronic Digital Caliper, 6” Fractions** $59.99
  - Range: 0-6” (0-150 mm)
  - Accuracy: 0.001”/6”
  - Resolution: 0.0005” / 0.01mm / 64th
  - IP67: Dust tight, temporarily impermeable
  - Operating Environment: 0-40° C
  - This 6” electronic digital caliper has a large display and easily switches from inches (decimal) to fractions to metric measurements. The caliper has an easy to read large display LCD. The hardened stainless steel construction allow for smooth movement and a high measure speed. The International Protection Rating of this caliper is IP67 (protected from immersion between 15 centimetres and 1 metre in depth, limited ingress protection). The caliper has an auto shut-off and comes with a fitted case.

- **Electronic Digital Caliper, 8” Fractions** $69.99
  - Grade
  - Z Limit brand guarantees professional quality
  - Large, easy-to-read LCD display can be zeroed at any position
  - Automatic shut-off after 5 minutes of non-use, last measuring position retained when shut off
  - Hardened stainless steel measuring surface for long life, with fine adjustment thumb wheel
  - Resolution is 0.0005” (0.01mm) and linear accuracy meets DIN 862 standard
  - Starrett catalog number 120A-6.
  - This 6” electronic digital caliper is made and inspected in the same factory as some of America’s best-known brands. The 6” digital vernier caliper measures four ways: outside, inside, depth, and step. The three keys are on/off, inch/mm, and zero.
  - Jaw Depths: 1/2” outside, 5/8” inside. The CR-2032 battery is included. Includes a durable plastic case.

- **Electronic Digital Caliper, 6”, IP67, Starrett** $244.00
  - Large, easy-to-read LCD display
  - IP67 level of protection against coolant, water, dirt and dust
  - Fine adjustment for precision measurements
  - Resolution is 0.0005” (0.01 mm)
  - Starrett 6” electronic digital caliper resists coolant, water, dirt and dust. Starrett catalog number 798A-6/150. The Starrett 798 electronic caliper provides an IP67 level of protection against foreign matter in hostile shop environments. In addition to being coolant and water resistant, the 798 also offers excellent protection against chips, dirt, dust, and other contaminants. The extra large LCD (character height, .310”) makes the 798 exceptionally easy to read. All 798 models also include an output port for RS232 equipped devices. While there are other IP67 electronic calipers available, only the 798 is a Starrett - for a century and a quarter, the tool of choice for the most experienced toolmakers and machinists when the measurements are most critical. According to IEC529, in IP67 the first number “6” identifies protection against ingress of dust and the second number “7” identifies submersion in water under standardized conditions of pressure for 30 minutes. With this caliper you can set zero at any position, read inches or millimeters, and lock the slide in position. There is a manual on/off button, plus the caliper turns itself off after thirty minutes of inactivity.
### Precision: Calipers

**2752** Electronic Digital Caliper, 6", Starrett 799  
- $161.00
- Large, easy-to-read LCD display can be zeroed at any position
- Automatic shut-off after 5 minutes of nonuse, last measuring position retained when shut off
- Fine adjustment thumb wheel
- Resolution is .0005" (0.01mm) and linear accuracy meets DIN 862 standard
- Starrett 6" electronic digital caliper Starrett catalog number 799A-6/150 Starrett's 799 series electronic calipers are light, comfortable, easy to use, and constructed with features that have made Starrett slide calipers the machinist's first choice for many years. They have a slim, streamlined profile, function buttons for zero and inch/mm, a large, clear, easy-to-read LCD display, and long battery life. The 799 Calipers are furnished in a fitted, protective case. Jaw Depths: 1 1/2" outside, 5/8" inside.

**5446** Edge and Center Finder Set, 4 Piece  
- $29.95
- 4 piece Edge and Center Finder Set
- Accurately locates the starting point for all types of machine work and jig boring
- Hardened and ground all over
- Accuracy .0002"
- The edge finder end has a 0.200" diameter cylinder to quickly find the edge of a work piece. The center finder end tapers to a point to locate holes. Set includes: 1 double ended edge finder: Shank: 1/2", Tip diameter: .20/.50 single ended edge finder: Shank: 3/8", Tip diameter: .200" single ended edge finder: Shank: 1/2", Tip diameter: .500" double ended edge finder: Shank: 1/2", Tip diameter: .200"

**1822** Edge and Center Finder, 1/2" Shank, Starrett  
- $33.50
- 10 mm Shank, Starrett
- $34.00
- 3/8" Shank  
- $7.95
- 3/8" Shank Audible, Fisher  
- $14.50
- 3/8" Shank, Fisher  
- $16.50
- 1/4" Shank Audible, Fisher  
- $16.50
- 3/8" Shank Starrett  
- $27.50

**2604** Edge and Center Finder, 3/8" Shank Laser  
- $124.50
- 3/8" shank fits collets and end mill holders
- 3.375" overall length
- Uses common SR44 batteries (included)
- Accuracy to 0.001"
- Includes polarizing attachment to adjust dot size
- The model 2604 3/8" shank Laser Edge and Center Finder is a new tool for your mill that saves setup time. It eliminates the frustrations and doubts of using the century-old indirect method with a conventional edge finder or wiggler. The Laser Center/Edge Finder projects a fine laser beam that directly indicates the edge of the workpiece. Move the beam to the edge of the work and set your dial to zero. It is that easy. No more calculating half the diameter of the edge finder. You can also use this laser edge finder to locate scribed or center-punched locations. Simply move the laser beam to the location on the workpiece and the spindle is aligned. Our laser edge finder is easy to align so you can be sure it is always accurate. The batteries for the model 2604 3/8" shank Laser Edge and Center Finder last for over 3 months of continuous operation. That's 3 months to a year of normal use.

**2886** Polarizing Attachment for Laser Edge Finder  
- $29.95
- 3/8" Shank, Starrett
- $27.50
- 3/8" Shank, Fisher
- $16.50
- 3/8" Shank Starrett
- $27.50

### Precision: Edge and Center Finders

**2747** Center Finder, Drill Press  
- $15.95
- Accurately and quickly locates center on cylindrical workpieces
- Satin chrome finish
- Place tool in drill chuck or collet and line up pointer with line scribed on shaft
- 3/8" diameter shank
- The drill press center finder is a quick way to find the approximate center of cylindrical objects. Line the pointer up with the mark and the drill chuck is centered over the work.

**2060** Coaxial Centering Indicator  
- $79.95
- Use this indicator to quickly center work pieces or fixtures on your mill
- This coaxial centering indicator remains stationary while the spindle rotates
- Can be used to center internal and external diameters
- The locating accuracy is 0.0005" of center
- Furnished in a fitted case
- Use this indicator to quickly center work pieces or fixtures on your mill. The measuring range is 0.25". The shank is 0.375" diameter and 0.75" long. The indicator is 5.5" long from the top of the shank to the bottom of the tip holder (the black part). Can measure internal diameters from 0.12" to 4.25" and external diameters from zero to 4.25". This set includes: Indicator body, restraining rod (prevents rotation), spring-loaded center point feeler, three straight feelers (for IDs), three curved feelers (for ODs). Buy this and other precision tools for sale online at LittleMachineShop.

**2652** Collet Adapter for Edge Finders, Starrett  
- $27.00
- Starrett Catalog Number PT28314
- Compatible with Any Attachment with a 3/8" Post
- Eliminates Need to Change Collet to Use Edge Finder
- This is a time saving accessory for edge finders with a 3/8" shank.
- The collet adapter allows quick installation and removal of the edge finder, eliminating the need for collet changes on Bridgeports and similar machines. It can be used with any attachment with a 3/8" shank.
- The progressive steps are 1/4", 5/16", 3/8", 1/2", 5/8", 3/4" and 1". Step depths vary from .100" to .200".

**3965** Edge and Center Finder, 3/8" Shank Laser AC Powered  
- $178.50
- 3/8" shank fits collets and end mill holders
- 3.375" overall length
- AC Powered 110 to 240 VAC
- Accuracy to 0.001"
- Includes polarizing attachment to adjust dot size
- The Laser Center/Edge Finder is a new tool for your mill that saves setup time. It eliminates the frustrations and doubts of using the century-old indirect method with a conventional edge finder or wiggler. The Laser Center/Edge Finder projects a fine laser beam that directly indicates the edge of the workpiece. Move the beam to the edge of the work and set your dial to zero. It is that easy. No more calculating half the diameter of the edge finder. You can also use the Laser Center/Edge Finder to locate scribed or center-punched locations. Simply move the laser beam to the location on the workpiece and the spindle is aligned. The Laser Center/Edge Finder is easy to align so you can be sure it is always accurate.
Precision: Edge and Center Finders

3966 Edge and Center Finder, 3/8” Shank Laser
- $178.50
- Concentric Circles
- 3/8” shank fits collets and end mill holders
- 3.375” overall length
- Uses common SR44 batteries (included)
- Accuracy to 0.001”
- Includes polarizing attachment to adjust line width

The Laser Center/Edge Finder™ is a tool for your mill that saves setup time. It eliminates the frustrations and doubts of using the century-old indirect method with a conventional edge finder or wiggler. This Laser Center/Edge Finder projects a series of concentric rings, making it easy to center over an existing hole. See the pattern on the Chris’ Tips tab. The Laser Center/Edge Finder projects a fine laser beam that directly indicates the edge of the workpiece. Move the beam to the edge of the work and set your dial to zero. It is that easy. No more calculating half the diameter of the edge finder. You can also use the Laser Center/Edge Finder to locate scribed or center-punched locations. Simply move the laser beam to the location on the workpiece and the spindle is aligned. The Laser Center/Edge Finder is easy to align so you can be sure it is always accurate. The batteries last for over 3 hours of continuous operation. That’s 6 months to a year of normal use.

4792 Edge and Center Finder, 1/4” Shank Laser
- $164.50
- Concentric Circles

4629 Edge and Center Finder, 3/8” Shank Laser Crosshair
- $164.50
- Concentric Circles
- 3/8” shank fits collets and end mill holders
- 3.375” overall length
- Uses common SR44 batteries (included)
- Accuracy to 0.001”
- Includes polarizing attachment to adjust to normal dot

The Laser Center/Edge Finder™ is a tool for your mill that saves setup time. It eliminates the frustrations and doubts of using the century-old indirect method with a conventional edge finder or wiggler. This Laser Center/Edge Finder projects a crosshair, making it easy to align a workpiece on the table. The Laser Center/Edge Finder projects a fine laser beam that directly indicates the edge of the workpiece. Move the beam to the edge of the work and set your dial to zero. It is that easy. No more calculating half the diameter of the edge finder. You can also use the Laser Center/Edge Finder to locate scribed or center-punched locations. Simply move the laser beam to the location on the workpiece and the spindle is aligned. The Laser Center/Edge Finder is easy to align so you can be sure it is always accurate. The batteries last for over 3 hours of continuous operation. That’s 6 months to a year of normal use.

3188 Edge Finder, 1/2” Shank Electronic
- $32.95
- Lights up when it contacts the edge of the work
- Repeatable to 0.0002”
- Works on any conductive metal
- Includes LED light and battery
- Made in USA

This electronic edge finder has a 1/2” shank. It is 4” long overall.

2294 Wiggler Center Finder Set, PEC
- $23.95
- Collet chuck and 4 probes
- Includes needle point, 0.250” ball, 0.100” disk, and 0.250”-shank indicator holder
- Made in USA

This wiggler center finder set comes with a collet chuck and 4 probes for finding centers, edges, and indicating. Each probe snaps into the body without removing the collet nut. The wiggler shank is 0.375” diameter.

1603 Wiggler Center Finder Set
- $14.95

Precision: Indicators

3716 Dial Indicator, 0.25” x 0.001”, Small Face
- $14.95
- 0.25” dial indicator with 0.001” resolution
- AGD Group I for tight locations
- 1.5” Diameter face, 0.375” shank, #4-48 tip thread
- Jeweled movement

This 1/4” stroke dial small face dial indicator features large, easy to read numbers and crisp graduations. Each revolution is 0.001”, indicated by the revolution counter. The resolution is 0.001”. There is a mounting lug on the back of the case.

1236 Dial Indicator, 1” x 0.001”
- $14.95
- 0-1” dial indicator with 0.001” resolution
- AGD Group 2
- 2.25” Diameter face, 0.375” shank, #4-48 tip thread
- Lug back mounting screws: #3-56 thread

This 1” stroke dial indicator features large, easy to read numbers and crisp graduations. Each revolution is 0.001”, indicated by the revolution counter. The resolution is 0.001”. There is a mounting lug on the back of the case.

2726 Dial Indicator, 2” x 0.001”
- $25.95

2873 Dial Indicator, 1” x 0.0005”
- $16.95

4467 Indicator Back, Dial Indicator, with Lug
- $4.95

2531 Magnetic Back for Dial Indicator
- $4.95

1783 Point Set, Dial Indicator
- $4.95
Precision: Indicators

5918 Dial Indicator, 1” x 0.001” with Lifting Lever
- 0-1” Dial Indicator with 0.001” Resolution
- ADG Group 2 - 2” Diameter Dial Face
- Lifting Lever, 0.375” Shank, #4-48 Tip Thread
- Lug Back
- Jeweled Movement
This 1” stroke dial indicator features large, easy to read numbers and crisp graduations. Each revolution is 0.100”, indicated by the revolution counter. The resolution is 0.001”. There is a mounting lug on the back of the case. The indicator comes with an equipped lifting lever attached to the top end of the spindle. This improves inspection efficiency and accuracy when using the indicator on a mounted stand. With a lifting lever, the spindle can easily be raised in small increments as material is moved under the spindle.

5517 Dial Indicator, 1” x 0.001”, Magnetic Back
- 0-1” dial indicator with 0.001” resolution
- 0.375” Shank, #4-48 Tip Thread of Hardened Stainless
- AGD Group 2, 2” Diameter Face
- Magnetic Back Screws On/Off
- Magnetic Back is 2 1/4” in Diameter and Coated
This 1” stroke dial indicator features large, easy to read numbers and crisp graduations. Each revolution is 0.100”, indicated by the revolution counter. The resolution is 0.001”. There is a screw on/off magnetic back which has a protective coating. The indicator shank is 3/8” (0.375”) in diameter, made of hardened stainless steel and has a #4-48 tip thread.

4281 Dial Indicator, 1” x 0.001”, Professional Grade, Shock Resistant
- Z-Limit brand guarantees professional quality
- 0-1” dial indicator with 0.001” resolution
- 6 jewel shock resistant movement
- 2.25” diameter AGD Group 2 with 0.375” shank and flat back
- Calibration certificate included
This 1” stroke dial indicator features large, easy to read numbers and crisp graduations. Each revolution is 0.100”, indicated by the revolution counter. The resolution is 0.001”. The thread for the tip is #4-48. Includes a durable plastic case. This indicator is made and inspected in the same factory as some of Europe’s best-known brands.

4285 Dial Indicator, 0.25” x 0.001”, Professional Grade, Shock Resistant
- 0-1” dial indicator with 0.001” resolution
- 6 jewel shock resistant movement
- 2.25” diameter AGD Group 2 with 0.375” shank and flat back
- Calibration certificate included

4282 Dial Indicator, 0.5” x 0.0005”, Professional Grade, Shock Resistant

4112 Dial Indicator, 1” x 0.001”, Professional Grade

4283 Dial Indicator, 10 mm x 0.01 mm, Professional Grade, Shock Resistant

4284 Dial Indicator, 5 mm x 0.01 mm, Professional Grade, Shock Resistant

1835 Dial Indicator, 1”, Starrett
- Range: 1.000”
- Face diameter: 2-1/4”
- Graduations: 0.001”
- Shockless, hardened steel gear train and jewel bearings
- Lug on center of the back

Starrett catalog number 25-441J. These indicators have a shockless, hardened steel gear train and jewel bearings. They are furnished with a lug on the center of the back. This is an AGD Group 2 indicator with a 2.25” Diameter face, 0.375” shank, and #4-48 tip thread.

5379 Dial Test Indicator Set, 0.3” x 0.0005”
- 0-0.03” Dial Test Indicator Set with .0005” Graduation
- Three dovetail positioning mounts work with most existing test indicator accessories
- Precision gear-driven design with smooth jeweled movement
- Frictionally adjustable contacts
- High contrast easy to read dials with a white background

Includes 2 contact points, 2 dovetail clamps, 1 swivel post holder, 1 tool post holder and 1 contact wrench in a fitted case. Manufactured and inspected at world class factory that produces highest quality European brands. Contact point reverses automatically to maintain clockwise hand rotation. Meets or exceeds ANSI/ASME accuracy specifications. Narrow body for in reach ability, and a satin chrome finish for durability. Interchangeable with 3808AC.

1249 Dial Test Indicator, 0-15-0 x 0.0005”
- Dial test indicator with 0.0005” graduations
- Range is 0 - 0.030” in either direction
- Reading 0-15-0
- Includes 5/32” and 3/8” diameter posts, dovetails on the back and end, and an 0.080” diameter point
- 7 Jewel movement, Comes in a fitted case

Test Dial Indicator for sale with 0.0005” graduations and reading from 0 – 15 – 0. Comes in a fitted case.

3522 Dial Test Indicator, 0-15-0 x 0.0005” and Universal Magnetic Base

2875 Dial Test Indicator, 0-4-0 x 0.0001”

4633 Replacement Point, Dial Test Indicator

3709 Dial Test Indicator, 0-15-0 x 0.0005”, Interapid Style
- Dial test indicator with 0.0005” graduations
- Range is 0.030” in either direction
- Includes 5/32” and 3/8” diameter posts, dovetails on the back and end, and an 0.080” diameter point
- Dial test indicator comes in a fitted case
- Jeweled movement

This Swiss-type horizontal dial indicator has a large 1.5” dial. 210 degree swivel arc with .080 steel contact point.

**Starrett dial test indicator with dovetail mount**
- Starrett catalog number 708AZ
- Dial test indicator with 0.0001" graduations
- Range is 0.010"  

These precision test indicators were designed to be positioned for easy and accurate readability. The versatility of the angled head, combined with the three dovetail mounts eliminates the need for having both vertical and horizontal style test indicators. These are the features that make this series of test indicators superior to ordinary types. Angled head for better reading positionLarge 1 3/8" (35mm) dial diameter

- Precision gear-driven design with smooth, jeweled movement
- Dial test indicator in a fitted case

#### Dial Test Indicator, 0-5-0 x 0.0001, Starrett

- Range is 0.005" in either direction
- Precision gear-driven design with smooth, jeweled movement
- Dial test indicator comes in a fitted case

These precision test indicators were designed to be positioned for easy and accurate readability. The versatility of the angled head, combined with the three dovetail mounts eliminates the need for having both vertical and horizontal style test indicators. Includes a dovetail body clamp, tool post holder, swivel plunger.

- For extreme accuracy we recommend positioning the lever so that it is approximately 15° from being horizontal with the workpiece.
- Three dovetail positioning mounts work with existing test indicator accessories
- Inch reading indicators are available with ease-to-read, shaded white, solid red, or solid black dials
- Millimeter reading indicators with solid yellow dials

**Contact point reverses automatically, always maintaining clockwise hand rotation**

Narrow body for inreach ability

**Satin chrome finish for durability**

- Long carbide contacts 13/16" (20mm) are furnished as standard.
- Contacts are frictionally adjustable and replaceable.

**Electronic Digital Indicator, 0.5"**

- Measurement range is 0-0.5"  
- Resolution is 0.0005", accuracy is 0.0012"  
- Measures in inches or mm  
- Set to zero at any position  
- There are three buttons; OFF for power, ZERO/ON to zero the display, and IN/MM to switch between inches and millimeters.
- Digital display indicator turns on automatically when the plunger moves.
- Pressing ZERO/ON zeros the electronic digital indicator at any position so you can make comparative readings between two parts.

**Electronic Digital Indicator, 1"**

- Measurement range is 0-1"  
- Resolution is 0.0005", accuracy is 0.0012"  
- Measures in inches or mm  
- Set to zero at any position

- Absolute zero reset button. Lug Back and ON/Off button:
- Comes with a fitted case.

**Electronic Digital Indicator, 0.5"**, **Starrett Style**

- 0.5" digital electronic AGD Group 2 indicator  
- Range .500" (12.7mm)  
- Resolution .0005" (.01mm)  
- Reverse travel (+ control indicates direction)  
- True Inch/MM conversion

This electronic digital indicator features a large, easy-to-read LCD display. You can set zero at any position and change the direction that shows positive dimensions. The indicator has a 3/8" Shank and the tip thread is 8-48. The case has a mounting lug on the back. Front battery cover allows easy access to change battery. Extra large LCD display. Absolute zero reset button. Zero at any point. Off/On button.

**Combination Square Set, 12" 4R**

- 12" stainless steel blade  
- Includes square head, center head, and protractor head  
- 4R Graduation - 8ths, 16ths, 32nds, 64ths

This 4-Piece combination square set features a stainless steel blade, and includes a square head, a center head, and a protractor.
The Starrett scriber has been the industry standard for many years. The Sharpie Metallic marker can be used on dark materials where contrast is needed. It is also great for identifying weldments. It is important that you lay out carefully to make machining especially when working with castings, forgings and materials in your steel rack.

Not to mention that it avoids all the hassle and limitations of layout dye. It marks on virtually any surface, provides an opaque covering to scribe, and doesn’t dry out in the can. To use, simply spread to an extremely thin layer easily and evenly. It is typically used to show high spots on bearings and when making close fitting parts. The film remains pliable and transferable for months. WARNING: This product can expose you to chemicals such as Michler’s ketone, which is known to the State of California to cause cancer. For more information go to www.P65Warnings.ca.gov/product.

The Starrett 12” combination square set has reversible lock bolts, scriber, spirit level in both square head and protractor head, direct reading double 180° protractor scale, hardened steel, photoengraved blade. Cast iron heads with black wrinkle finish. The blade is 1” wide and 3/32” thick and has a satin chrome finish.

The combination square set has reversible lock bolts, scriber, spirit level in both square head and protractor head. The faces of the head are ground square. Starrett catalog number 12A.

This kit includes the layout tools you need for machine shop use. Layout is the process of transferring measurements from a drawing to a workpiece. Layout is an important part of machining especially when working with castings, forgings and weldments. It is important that you lay out carefully to make sure you have enough material to “clean up” all important surfaces.
Precision: Layout

Machinist Square Set  
- Machinist square set includes 2", 3", 4" and 6" squares  
- Made from fully seasoned and hardened tool steel  
- Accurate right angles both inside and outside  
- Beams are ground and lapped  
- Class H accuracy: 0.0008" + 0.0001" per inch  
Set of four machinist squares made of hardened tool steel in sizes 2", 3", 4", and 6". Length of blade is measured from inner edge of beam to end of blade. The small notch at the inside corner prevents small particles from accumulating at the juncture and impacting the squares reading. Typical use involves aligning the beam along one edge of an object with the blade across the body of the work. Using a strong light source behind the square will reveal any gaps showing the squareness of the work.

Machinist Square Set, 2" 4" and 6"  
- Grade 1 DIN Standard 875  
- Accurate on inside and outside angles  
- All surfaces and edges ground  
- Perfect set-up tool for machining, table saws, and more  
- Comes in heavy-duty case  
Set of three engineer's squares, sizes 2", 4", and 6". This set is ideal for set-up work with machine tools, table saw blades, and many other shop tools. The surfaces and edges are ground for high tolerances of straightness and squareness. Squares are accurate on both inside and outside angles and meet German DIN standard 875, Grade 1. Length of blade is measured from inner edge of beam to end of blade. The small notch at the inside corner prevents small particles from accumulating at the juncture and impacting the squares reading. Typical use involves aligning the beam along one edge of an object with the blade across the body of the work. Using a strong light source behind the square will reveal any gaps showing the squareness of the work.

Machinist Square Set, PEC  
- Includes 2", 3", 4" and 6" squares  
- Made from high quality tool steel  
- True right angles inside and outside  
- Beams and blades are precision ground  
- Hardened Blade  
Set of four machinist squares made of high quality tool steel in sizes 2", 3", 4", and 6". These squares are made in the US by Products Engineering Corporation (PEC). These squares are square within 0.0005" over the length of the blade. The two sides of the blades and beams are parallel within 0.0005" over their length. Length of blade is measured from inner edge of beam to end of blade. The small notch at the inside corner prevents small particles from accumulating at the juncture and impacting the squares reading. Typical use involves aligning the beam along one edge of an object with the blade across the body of the work. Using a strong light source behind the square will reveal any gaps showing the squareness of the work.

Machinists Center Square, 1 1/2"  
- Rapidly locate exact center  
- Range up to 1 1/2" diameter  
- Features 90 degree V angle  
- Made from precision ground tool steel  
- Hardened and tempered blade  
To find the center, insert work piece into the V of the square and mark a line For round stock, rotate the piece 90 degrees and mark again. The intersection of the lines is true center.

**Scribers**
- Tempered well-finished steel
- Points are finely tapered
- Nickel plated knurled handle

Scribers are steel, properly tempered and well finished. The points are finely tapered so that the scriber point can be easily seen on the work. The handle, as well as the points, has a knurled grip.

The length of the scriber is 9" (225mm). Points screw into the handle and fit either end. The knurled handle is nickel-plated.

**Transfer Punch Sets**
- Sizes: 1/4-20, 5/16-18, 3/8-16, 7/16-14
- Works with blind holes
- Transfer exact location of threaded holes to mating parts and are great for tool & die work, and in layouts. This set includes 4 sizes of transfer screws (6 screws each) and the wrench/holders. Sizes: 1/4-20, 5/16-18, 3/8-16, 7/16-14

**Surface Gage**
- For scribing lines, use on a surface plate
- Includes 4" and 7" spindles
- Bottom V-groove ground for cylindrical work
- Retractable pins in base for working on flat surfaces
- Fine adjustment

These surface plates are checked with an auto-collimator for overall accuracy. All points on the surface are between two parallel planes 0.0002" apart.

**Toolmakers Square**
- Blade is 6" (150 mm) long
- Wide variety of adjustment and angle settings
- Made in USA

This high-accuracy T-bevel features both straight slots and offset slots in the blade and straight slots in the stock. This combination allows for the widest possible variety of adjustments. Align the T-bevel with the angle you want to duplicate, then tighten the knurled locking nut.

**Precision: Measuring**

- Set of 18 metal angle gages
- 5° to 90° by 5° increments
- Satin chrome finish
- Eight gaging surfaces on each gage
- Check primary angle, 1/2 primary and complementary angles
- The angle gage set is furnished in a vinyl case for storage.

- +/-180 Degree Range
- Auto Off conserves battery life
- 0.1 Degree Resolution
- Compact and Lightweight design with ±0.1 Degree repeatability
- Mounting magnets on 3 sides to ensure accurate measurements
- This small device is great for setup or checking angles. It is accurate and reliable and the magnetic base makes for easy angle checking on a work piece, angle vise or vise vise, and whatever else you can dream up.

- Sizes bolts, nuts, and screws
- Sorts coarse threads, fine threads, and metric threads
- Measures inches and millimeters
- Length: 8-5/8", Width: 4-1/4"
- Size bolt diameter by pushing bolt through sizing holes Gauges hex nuts and washers (US, SAE) Gauges metric hex nuts and washers by holding under metric holes Measure US and metric thread pitch Special notched gauges flat headed metal and wood screw ruler marked with inches and millimeters Sturdy and lightweight plastic resists water, alcohol, oil, and grease
- Fits in shirt pocket (8-5/8" x 3-1/4"

- Measure ID of holes from 2" to 6" in diameter
- Close tolerance measurement of ID, taper and roundness
- Furnished with AGD Group II dial indicator
- Accuracy: ±0.0005"
- Includes fitted case and interchangeable anvils
- This dial bore gage is easy to calibrate with a ring gage or micrometer.

- Max. measurement 6" (150 mm)
- Flat leg type
- Quick adjustment nut
- Easy adjustment over entire range
- Polished natural steel finish
- 6" outside spring caliper used to measure the external size of an object. Outside calipers are useful for transferring measurements from a workpiece to a rule. They are a flexible solution when the work has complex shapes or when measuring round stock. These calipers have a flat leg design and open to a maximum of 6" (150 mm). The polished steel legs are easily adjusted over the entire range and adjustments can be easily fixed with a quick nut.

- Made of high quality steel
- Satin chrome finish
- Use for grinding and setting thread cutting tools
- Gaging surfaces are precision ground
- Center gage made in the US by Products Engineering Corporation (PEC). Used for grinding and setting screw cutting tools. Scales with 14ths and 20ths graduations provided on one side, 24ths and 32nds on reverse side. Scales are used to determine number of threads per inch. Gage also features a table of double depths of thread for selecting size of tap drills. Made of hardened spring tempered steel, with a protective satin chrome finish. All gaging surfaces are precision ground.

- Starrett 60 degree center gage
- Starrett catalog number C391
- Extremely handy for use in grinding and setting thread cutting tools
- Spring tempered steel
- These gages meet the following standards: American National or U.S. 60°, Whitworth or English 55°, and Metric 60°. They also have a very useful scale for finding the number of threads per inch through graduations in 14ths, 20ths, 24ths, 32nds and 32nds of an inch. The gage also has a table of double depths of threads for determining size of tap drills.

- Fine vertical adjustment with lock
- 6" x 6" granite base flat within 0.0005"
- 1" Diameter column, 8" tall
- Includes a 0.01" x 0.001" dial indicator
- This granite dial gage comparator stand will accept any AGD 1, 2, 3, or 4 dial indicator.

- Slot Width: .64"  
  1.5 x 4 x 1.5 inches  
- J-Limit Brand Guarantees Professional Quality  
- 3" Base
- This depth base attaches to the blade of a 6" caliper for depth measurement. It has a locking nut to secure along the blade. The precise measurement instrument is used to determine the depth of any shape with a step, slot, or groove.

Precision: Measuring

3460 Drill Gage
- 1/16" to 1/2" fractional size drill gage
- Quickly check drill sizes
- 32 holes marked with drill sizes
- Measurement marked in inches and decimal equivalents
Sturdy and lightweight plastic resists water, alcohol, oil, and grease.
Fits in shirt pocket (3-3/8" x 7-9/16" or 86 mm x 193 mm)

5870 Height Gage, 6", Digital, iGaging
- Resolution: 0.0005"  
- Accuracy +/-0.001"  
- Repeatability: 0.0005"  
- Solid aluminum base, stainless steel beam  
- Large LCD Display, Inch, Metric and Fractions  
- iGaging’s MiniMag 6” Height Gauge makes vertical and horizontal measuring easy. The large LCD display gives measurements in inches, millimeters and fractions and unit has ABS and hold functions. Mounted on a solid aluminum base with magnets, the gage has a stainless steel beam for smooth travel with no play.IP54 rated for splash water, oil & dust resistance, the resolution is 0.0005" (0.01mm) with an accuracy of +/-0.001" (+/-0.03mm). Controls are Zero reset, On/Off, inch/mm/fraction conversion, Hold, Absolute.

3552 Drill Gage, A-Z Drill Sizes, Starrett
- Starrett Standard Letter Size Drill Gage, A-Z range  
- Starrett catalog number 198  
- Hardened Steel  
- Drill sizes .234" to .413"  
Letter size drills can be quickly and conveniently checked with this gage. Twenty-six holes are provided, giving corresponding drill sizes from "A" through "Z" with decimal equivalents from .234" diameter through .413" diameter.
The gage is approximately 5/64" thick by 2 5/16" wide and 6 1/4" long, is hardened and has a satin finish. Thoroughly tested after hardening.

3551 Drill Gage, Jobbers, 1/16-1/2", Starrett
- Starrett Jobbers' Drill Gage, 1/16-1/2" Range  
- Starrett catalog number 187  
- Hardened Steel  
- Marked with inches and decimal equivalents
Using this gage, the size of any twist drill from 1/16-1/2" by 64ths can be quickly determined. The gage has a total of 29 holes, each marked with the drill size in inches and the decimal equivalent. Gage is rigidly tested after hardening and has a black matte finish. Gage Information is steel stamped on one side and white marked on the reverse side for quick, clear reading. Approximately 5/64" thick by 2 5/16" by 6 1/4" long.

3557 Drill Point Gage, Starrett
- Starrett Drill Point Gage, 59° bevel, 32nds graduations  
- Starrett catalog number 22C  
- The head is beveled to 59° (the correct drill point angle)  
- Graduated in 32nds along the 59° face for measuring the drill lips
This gage was designed specifically for use in drill grinding. It provides a quick, accurate way for determining the correct drill point angle of 59° and the correct length of drill lips necessary for clean-cut drilling at maximum feeds and speeds. The sliding head may be adjusted to any position along the rule and locked by a thumb nut. The head is beveled to 59° (the correct drill point angle), and is also graduated in 32nds along the 59° face for measuring the drill lips which should be of equal lengths. The hook rule has accurate, machine-divided graduations in 8ths, 16ths, quick-reading 32nds and 64ths. Hook is adjustable and can be shortened or extended on either side of the rule, and may also be removed if desired. Tool can also be used as a plain rule, hook rule, depth gage, and slide caliper. The No. 22D Head-only will fit all steel rules 3/4" wide by 3/64" thick.

3092 Height Gage, 12", Dial
- Stainless steel with satin chrome finish  
- Carbide tipped scriber for longer life  
- Fine feed adjustment  
- Positive lock screw  
- 0.001" Graduations
This magnetic indicator holder locks all its joints when the knob is tightened. The on/off switch makes it easy to position. The v-groove base allows you to mount it on cylindrical surfaces. This magnetic indicator holder locks all its joints when the knob is tightened. The on/off switch makes it easy to position. The v-groove base allows you to mount it on cylindrical surfaces. The permanent magnet has an 80 kg (176 lb) holding force. On/off switch makes it easy to position. The V-groove base allows you to mount it on cylindrical surfaces. The permanent magnet has an 80 kg (176 lb) holding force. The lower arm is 110 mm long, the upper arm is 100 mm long.

5794 Scribe, Height Gage
- 0.001" Graduations

4642 Height Gage, Digital, 8", Tormach
- 8" Digital Height Gauge  
- 0.001" graduations  
- Easy to read LCD screen
This is a stainless steel dial height gauge with 0.001" graduations.

4653 Indicator Arm, Universal, 6"
- 8 mm indicator stem hole  
- 11" arm length  
- Fine adjustment knob  
- 8 mm x 40 mm rod
This magnetic indicator holder locks all its joints when the knob is tightened. The on/off switch makes it easy to position. The V-groove base allows you to mount it on cylindrical surfaces. This magnetic indicator holder locks all its joints when the knob is tightened. The on/off switch makes it easy to position. The V-groove base allows you to mount it on cylindrical surfaces. This magnetic indicator holder locks all its joints when the knob is tightened. The on/off switch makes it easy to position. The V-groove base allows you to mount it on cylindrical surfaces. This magnetic indicator holder locks all its joints when the knob is tightened. The on/off switch makes it easy to position. The V-groove base allows you to mount it on cylindrical surfaces. This magnetic indicator holder locks all its joints when the knob is tightened. The on/off switch makes it easy to position. The V-groove base allows you to mount it on cylindrical surfaces. This magnetic indicator holder locks all its joints when the knob is tightened. The on/off switch makes it easy to position. The V-groove base allows you to mount it on cylindrical surfaces. This magnetic indicator holder locks all its joints when the knob is tightened. The on/off switch makes it easy to position. The V-groove base allows you to mount it on cylindrical surfaces. This magnetic indicator holder locks all its joints when the knob is tightened. The on/off switch makes it easy to position. The V-groove base allows you to mount it on cylindrical surfaces. This magnetic indicator holder locks all its joints when the knob is tightened.

4948 Indicator Holder, 1/4" Round Shank
- 1/4" Straight  
- 3" overall length  
- For use with test indicators and probes with dovetails  
- Locks in 90° increments
Great for aligning a vise or setting up a work piece.

2880 Magnetic Base Indicator Holder
- Magnetic base indicator holder with one-knob lock  
- Permanent magnet has an 80 kg (176 lb) holding force  
- On/off switch makes it easy to position  
- V-groove base allows you to mount it on cylindrical surfaces
This magnetic indicator holder locks all its joints when the knob is tightened. The on/off switch makes it easy to position. The V-groove base allows you to mount it on cylindrical surfaces. This magnetic indicator holder locks all its joints when the knob is tightened. The on/off switch makes it easy to position. The V-groove base allows you to mount it on cylindrical surfaces. This magnetic indicator holder locks all its joints when the knob is tightened. The on/off switch makes it easy to position. The V-groove base allows you to mount it on cylindrical surfaces. This magnetic indicator holder locks all its joints when the knob is tightened.

2029 Magnetic Base Indicator Holder, Mini
Precision: Measuring

1237 Magnetic Base Indicator Holder $13.95
- Magnetic base indicator holder with fine adjustment
- Permanent magnet has an 60 kg (130 lb) holding force
- On/off switch makes it easy to position
- V-groove base allows you to mount it on cylindrical surfaces
- Works with most AGD dial and test indicators

This magnetic base indicator holder has a fine adjustment feature. The on/off switch makes it easy to position. The V-groove base allows you to mount it on cylindrical surfaces. The permanent magnet has an 60 kg (130 lb) holding force.

5374 Magnetic Base Indicator Holder, Fine Adjustment $69.95
- Unique top fine adjustment mechanism
- 3-D rigid aluminum arm movement
- Dovetail groove for test indicator
- Maximum reach is 10.7"
- On/Off switch

Magnetic base indicator holder with fine adjustment mechanism on the top of the base. Magnet has 176 lbs of pull. Base is 60 x 50 x 55mm.

5373 Magnetic Base Indicator Holder, Fine Adjustment, Mini $56.95

5938 Magnetic Base Indicator Holder, Fine Adjustment, Strong Pull $67.95
- Extra strong pull magnetic base
- One knob tightens everything

Strong magnetic base with fine adjustment on top of base. The magnet is rated at 176 lb of pull, but we've never figured out how this is measured.

Unique top fine adjustment mechanism.

On/Off switch.

3-D rigid aluminum arm movement.

Dovetail groove for test indicator.

Base is 60 X 50 X 55mm.

Maximum reach is 10.7".

Length of arm is 10.3".

Length from the bottom of the base to the dovetail is 12.8".

Holds 3/8" stem indicators or dovetails.

3714 Magnetic Base Indicator Holder, Professional Grade $26.95
- Z-Limit brand guarantees professional quality
- Magnetic base indicator holder with fine adjustment
- Permanent magnet has an 65 kg (145 lb) holding force
- On/off switch makes it easy to position
- V-groove base allows you to mount it on cylindrical surfaces

This magnetic base indicator holder has a fine adjustment feature. The on/off switch makes it easy to position. The V-groove base allows you to mount it on cylindrical surfaces. The permanent magnet has an 66 kg (145 lb) holding force.

3549 Magnetic Base Indicator Holder, Starrett $198.00
- Starrett Magnetic Base with Attachments
- Starrett catalog number 6574A
- Powerfull magnetic base holds firmly to steel and iron surfaces
- Push button turns magnet on or off for quick, one-hand set-up

For use with all Starrett Test, Back-Plunger, AGD, Dial and Miniature-Dial indicators. Also accommodates similar indicators of other manufacturers.

3170 Magnetic Base Indicator Holder, Starrett $132.00
- Magnetic base with triple-jointed arm and fine adjustment
- Starrett catalog number 660
- Positive On/Off switch
- Very sensitive fine-adjustment thumb screw

The compact and versatile No. 660 Magnetic Base Indicator Holder has three adjustable pivots controlled by a single knob for fast, easy indicator positioning. Small but powerful magnetic base, with 70 lbs. (320 N) holding force. Base Dimensions: 1 3/16 x 1 9/16 x 1 3/8" (30 x 40 x 35mm) Vertical and horizontal positioning will hold any indicator with a 3/8" (9.5mm) stem or standard dovetail mount. Articulating arm with powerful central locking knob provides full 360° horizontal positioning and over 180° vertical positioning. Maximum horizontal reach: 4.750" (120mm) Maximum vertical reach: 7.500" (190mm)

3072 Magnetic Test Indicator Holder, Fisher $73.95
- Overall height 3.75"
- Powerful permanent magnet
- Clamps on dovetail, 5/32", or 1/4" diameter stems
- Includes stem adapter and mill adapter

5867 Micrometer Set, 0-3" $62.99
- Measuring range 0 to 3"
- Accuracy: +/- 0.0001" per inch
- Graduation interval 0.0001"
- Thimble style: friction or ratchet
- Hardened and ground carbide anvil

Three micrometer set manufactured in the style of Mitutoyo micrometers have a measuring range of 0-1", 1-2", and 2-3". The Vernier scale has 0.0001" graduations and an accuracy of +/-0.0001" per inch. Hardened and ground measuring faces are wear resistance and the hardened, ground, and lapped spindle thread provides smooth movement and accuracy. Micrometer have friction thimbles with ratchet stops. Baked enamel frame, thimble and sleeve have a satin chrome finish. Set includes three micrometers range of 0-1", 1-2", and 2-3", 1" standard, 2" standard and a fitted case.

3663 Micrometer Set, 0-6" $239.95
- Solid metal C-shape frame for all sizes
- Graduation: 0.001"
- Hardened and precision ground anvil spindle thread with microlap finish on ends

Three micrometer set manufactured in the style of Mitutoyo micrometers have a measuring range of 0 to 3" and 0 to 6". The measurement range is 0 to 3" and 0 to 6". These micrometers have a ratchet stop for effect repetitive readings and a lock lever to lock the barrel. The micrometers come in a fitted case.

2520 Micrometer, 0-1" Digital $129.95
- Measurement range is 0-1"
- Resolution is 0.0005"
- Protected from dust and water to IP54 per IEC529 standard
- Large LCD display
- Rugged plastic case

This digital electronic micrometer with carbide measuring faces has a resolution of 0.0005". There are three buttons; ON/OFF, SET to zero the display, and ABS/INC to switch between absolute and incremental measurement. The micrometer turns itself off after about 5 minutes of inactivity. Pressing ABS/INC zeros the micrometer at any position so you can make comparative readings between two parts. The absolute measurement is not lost, and is displayed by pressing ABS/INC again. The IP54 code says that dust shall not penetrate in a quantity to interfere with satisfactory operation of the device or to impair safety, and water splashed against the device from any direction shall have no harmful effects.

**Starrett 0-1” Electronic Digital Micrometer**

- Micrometer Action Features: ON/OFF button - also automatic OFF after 30 minutes of nonuse.
- One-piece spindle, micro-lapped carbide measuring faces.
- Starrett 0-1” Electronic Digital Micrometer.
- Starrett catalog number T230XRL.
- Five gaging surfaces on each gage for both concave and convex radii.
- Satin chrome finish.
- 9/32” to 1/2” by 64ths.
- Measures from 0 to 180°.
- Semi-circular head is 3.3” x 2”.
- 6 arm can be locked in any position with knurled lock nut.
- Made of tempered steel with satin chrome finish.
- Protractor made in the US by Products Engineering Corporation (PEC).
- Protractors are used for drawing radial lines, transferring angles, setting bevels, and setting tapers.
- This set includes 25 radius gages and holder.
- Radius gage set is furnished in a vinyl case for storage.

**Starrett 0-1” Micrometer**

- Measurement range: 0-1”
- Resolution: 0.00005”/0.001mm
- Accuracy: 0.00015”/0.003mm
- IP65 Water, Oil & Dust Resistance
- Large LCD display

Easy to read digital electronic micrometer with a large LCD digital display + Vernier scale reading in the spindle. The digital display has two measuring modes Metric/Standard as well as with absolute and incremental modes for each. The spindle has carbide measuring faces and the resolution of 0.00005”/0.001mm. Measurement range is 0-1” and the unit is rated as IP65 (water, oil and dust resistance). There are three buttons; ON/OFF Zero, ABS in/mm to switch between inches and mm with absolute and incremental measurement options for each. The micrometer has an auto shut-off. Comes with an adjustment wrench and a 3V CR 2032 lithium battery and a ball adapter.

**Starrett 0-1” Micrometer, Starrett**

- ON/OFF button with auto off after 30 minutes of nonuse.
- Ability to zero tool at any position.
- Inch or millimeter graduations.
- Balanced frame design.
- One-piece spindle, micro-lapped carbide measuring faces.
- Starrett catalog number C183.
- Starrett steel protractor (0-180°), 6” blade, rectangular head.
- Double graduations from 0-180° in two directions.
- Satin chrome finish for ease of reading and resistance to rust.
- Measures angles from 0 to 180°.
- Semi-circular head is 3.3” x 2”.

**Protractor, Semi-Circle Head, Stainless, PEC**

- Measures angles from 0 to 180°.
- Semi-circular head is 3.3” x 2”.
- 6” arm can be locked in any position with knurled lock nut.
- Made of tempered steel with satin chrome finish.
- Protractor made in the US by Products Engineering Corporation (PEC).
- Protractors are used for drawing radial lines, transferring angles, setting bevels, and setting tapers.
- This is a highly useful and accurate tool for setting bevels, transferring angles, small squaring tasks, checking cutter clearances within certain limits, and many other applications.
- Double graduations from 0-180° in opposite directions permit the direct reading of angles and supplementary angles.
- The back of the tool is flat for ease of use.

**Protractor, Semi-Circle Head, Starrett**

- Starrett protractor (0-180°), 6” blade, rectangular head.
- Starrett catalog number C183.
- Double graduations from 0-180° in two directions.
- The blade can be locked firmly at any angle by the lock nut.
- Satin chrome finish for ease of reading and resistance to rust.
- Measures angles from 0 to 180°.
- Semi-circular head is 3.3” x 2”.
- 6” arm can be locked in any position with knurled lock nut.
- Made of tempered steel with satin chrome finish.
- Protractor made in the US by Products Engineering Corporation (PEC).
- Protractors are used for drawing radial lines, transferring angles, setting bevels, and setting tapers.

**Protractor, Rectangular Head, Starrett**

- Starrett catalog number C183.
- Double graduations from 0-180° in two directions.
- The blade can be locked firmly at any angle by the lock nut.
- Satin chrome finish for ease of reading and resistance to rust.
- Measures angles from 0 to 180°.
- Semi-circular head is 3.3” x 2”.
- 6” arm can be locked in any position with knurled lock nut.
- Made of tempered steel with satin chrome finish.
- Protractor made in the US by Products Engineering Corporation (PEC).
- Protractors are used for drawing radial lines, transferring angles, setting bevels, and setting tapers.

**Protractor, Semi-Circle Head, Starrett**

- Starrett catalog number C183.
- Double graduations from 0-180° in two directions.
- The blade can be locked firmly at any angle by the lock nut.
- Satin chrome finish for ease of reading and resistance to rust.
- Measures angles from 0 to 180°.
- Semi-circular head is 3.3” x 2”.
- 6” arm can be locked in any position with knurled lock nut.
- Made of tempered steel with satin chrome finish.
- Protractor made in the US by Products Engineering Corporation (PEC).
- Protractors are used for drawing radial lines, transferring angles, setting bevels, and setting tapers.

**Protractor, Rectangular Head, PEC**

- Measures angles from 0 to 180°.
- Semi-circular head is 3.3” x 2”.
- 6” arm can be locked in any position with knurled lock nut.
- Made of tempered steel with satin chrome finish.
- Protractor made in the US by Products Engineering Corporation (PEC).
- Protractors are used for drawing radial lines, transferring angles, setting bevels, and setting tapers.
Precision: Measuring

1842 Radius Gage Set, Starrett

- Starrett 25 piece radius gage set
- Starrett catalog number S167CHZ
- Radii Range: 1/64-17/64" 9/32-1/2"
- Increments: 64ths, 32nds
- Rust and stain resistant satin finish stainless steel
- Radii or fillets can be checked or laid out easier, faster, and more accurately with Starrett radius gages.
- Each radius gage set is furnished in an attractive case which provides complete protection and easy, instant selection of the right gage size for the job.
- Starrett Radius Gage Features: Made of satin finish stainless steel - rust and stain resistant. Each gage is clearly marked with its radius. Each gage has five different gaging surfaces for both convex and concave radii. All gages have precision finished radii with extra smooth, accurate edges.

Gage Holder Features: Any gage can be used with the Starrett No. 110 holder which is especially useful for checking radii in confined or hard-to-reach locations. Two slots are provided in the holder permitting gages to be held at 30° or 45°, either square in the slot or tipped to one side. The holder is 4" (100 mm) long, providing good reach and balance.

Starrett screw pitch gages are among the most useful tools in any mechanic's toolbox. They quickly determine the pitch of various threads. These gages consist of a substantial steel case with a number of folding leaves at both ends, each leaf having teeth corresponding to a definite pitch, marked on each leaf.

The screw pitch gage features a locking device at both ends of the case, so leaves can be securely locked in position for use.

Leaves have a special narrow design, permitting checking internal threads in nuts, etc., as well as external threads. Measures 60° threads from 4 threads per inch to 84 threads per inch. Leave Sizes: 4, 5, 5.5, 6, 7, 8, 9, 10, 11, 11.5, 12, 13, 14, 15, 16, 18 threads per inch (TPI). Leave Sizes: 20, 22, 24, 26, 27, 28, 30, 32, 34, 36, 38, 40, 42, 44, 46, 48, 50 threads per inch (TPI). Leave Sizes: 52, 43, 56, 58, 60, 62, 64, 66, 68, 70, 72, 74, 76, 78, 80, 82, 84 threads per inch (TPI). Starrett catalog number 472

1834 Screw Pitch Gage, Inch 30 Leaves, Starrett | $42.00
2617 Screw Pitch Gage, Metric 28 Leaves, Starrett | $48.30

3093 Small Hole Gage Set, 4-Piece | $12.95
- 4 small hole gages with 0.125" to 0.500" range
- Full spherical ball for very accurate measurements
- Hardened, satin-chrome plated measuring faces
- Furnished in plastic pouch

Screw pitch gages provide a quick way to measure standard threads. They provide all the information you need for screws; diameter, length, threads per inch, hole size and even tap drill sizes.

Accurately and quickly gages small holes, grooves and slots. Insert the appropriate gage (smaller but closest to bore diameter) into the hole. Rotate the knurled base to expand the end until a slight pressure is felt when the gage is moved in the bore. Remove the gage and measure with a caliper or micrometer.

4492 Small Hole Gage Set, 4-Piece, PEC | $62.95
- 4 small hole gages with 0.125" to 0.500" range
- Extra long for gaging deep holes and slots
- Hardened, satin-chrome finish
- Furnished in fitted vinyl case
- Size adjustment by knurled knob

3545 Small Hole Gage Set, 4-Piece, Starrett | $173.00
- Starrett 4-piece small hole gage set
- Starrett catalog number 5829EZ
- Range of 0.125-0.500" (3.2-12.7 mm)
- Hardened-ball measuring surface with two-point contact
- Smooth, sensitive adjustment for better feel, giving more accurate measurements

These small hole gages are well balanced tools that are ideal for accurately measuring small holes, slots, grooves, and recesses in all kinds of work. The radius on each gage is less than the minimum diameter to be measured, which provides the two-point contact necessary for maximum accuracy. They have smooth, sensitive adjustment for better feel, giving more accurate measurements.

The adjustment of the gage beyond their range is restricted by a safety stop that prevents breakage. Accurate measurements are obtained by slightly "rocking" these gages in the hole to be measured. This will guarantee contact at the true diameter. The final size is then obtained by measuring over the ball contacts with a micrometer. Furnished in a vinyl pouch.

1234 Steel Rule, 6" 4R Rigid | $5.95
- 4R graduations, 8ths & 16ths, 32nds & 64ths
- Hardened stainless steel
- Rule is 3/4" wide and 0.032" thick

This precision, 6" long steel rule is flexible to fit into tight spots. The etched black graduations are easy to read against the non-glare finish.
Steel Rules, Starrett

Starrett precision steel rules are machine-divided, not photoengraved. They are inspected to Starrett Master Standards, which are traceable to the National Institute of Standards and Technology.

- Graduation No. 4R are 8ths, 16ths, quick-reading 32nds and 64ths.
- Graduation No. 5R are quick-reading 10ths, aircraft quick-reading 50ths and 100ths.
- Graduation No. 31 are 32nds and 64ths on one side; mm and 1/2 mm on reverse.
- Flexible rules are 1/2" wide and 1/64" thick.
- Rigid rules are 3/4" wide and 3/64" thick.

Steel Rule, 12" 4R Flexible, Starrett $51.00
Steel Rule, 12" 5R Flexible, Starrett $24.00
Steel Rule, 12" 4R Rigid, Starrett $25.50
Steel Rule, 150 mm 31 (in/mm) Flexible, Starrett $31.95
Steel Rule, Hook 12" (32nds/ 0.5 mm), PEC $27.00
Steel Rule, 12" 4R Flexible, PEC $24.95
Steel Rule, 150 mm 31 (in/mm) Rigid, PEC $12.50
Steel Rule, 300 mm 30 (1.0 mm/.05 mm) Flexible, PEC $22.95
Steel Rule, 300 mm 30 (1.0 mm/.05 mm) Rigid, PEC $24.95

Steel Rules, PEC

- Made from the finest quality steel available
- Fully hardened and tempered with stain chrome finish
- Precisely etched, then black filled for readability
- Flexible rules are 1/2" wide and 0.015" thick
- Rigid rules are 3/4" wide and 0.040" thick

2730 Steel Rule, 12" 4R Flexible, PEC $22.95
2735 Steel Rule, 12" 4R Rigid, PEC $24.95
2732 Steel Rule, 12" 5R Flexible, PEC $22.95
2733 Steel Rule, 150 mm 31 (in/mm) Flexible, PEC $11.95
2736 Steel Rule, 150 mm 31 (in/mm) Rigid, PEC $12.50
5092 Steel Rule, 300 mm 30 (1.0 mm/.05 mm) Flexible, PEC $22.95
4796 Steel Rule, 300 mm 30 (1.0 mm/.05 mm) Rigid, PEC $24.95
4277 Steel Rule, 6" 4R Black Flexible, PEC $8.95
2729 Steel Rule, 6" 4R Flexible, PEC $11.95
2734 Steel Rule, 6" 4R Rigid, PEC $12.50
2731 Steel Rule, 6" 5R Flexible, PEC $11.95
4610 Steel Rule, Hook 12" (32nds/ 0.5 mm), PEC $31.95

Telescoping Gage Set, 4-Piece 5/16 - 2-1/8", Starrett $160.00

- Starrett telescoping gage set
- Starrett catalog number 5579GZ
- Range: Four gages, 5/16" to 2-1/8" handles are approximately 2-1/8" long
- Contains two telescoping contacts

Starrett telescoping gages are used for determining the true size of holes, slots, and recesses up to 2-1/8" (54 mm). The ends of both contacts are hardened and ground to a radius to allow proper clearance on the smallest hole the gage will enter. These tools must be slightly "rocked" in the hole being measured to ensure that the tool is on the proper diameter before it is locked and withdrawn. The final hole size is obtained by measuring over the gage contacts with a micrometer.

The No. 579 Series telescoping gages have handles that are rigidly attached to the contact plungers and are automatically self-centering. Also, the No. 579 gages have two telescoping contacts.

The handles are approximately 2-3/8" (60 mm) long.
Constant spring tension gives uniform contact pressure and both plungers are easily locked at any desired setting.

Telescoping Gage Set, 6-Piece 5/16 - 6", Starrett $272.00

- For measuring holes, slots and recesses
- Measures holes from 5/16" to 6" diameter
- Double action is self-centering
- Satin chrome finish
- Contact ends are hardened and ground to the radius of the smallest diameter

Use telescoping gages to measure ID, deep holes, recesses, slots, grooves, and other hard to reach places. Measure the actual size or lock the self-centering plungers to a known size for a go-no go gage.

Test Indicator Holder, Professional Grade $19.95

- Z-Limit brand guarantees professional quality
- Clamping diameter range of 1-3/8" to 2½"
- Length from the center of the clamp to the indicator can be up to 6-1/2"
- Clamps to the outside of an end mill holder and does not disturb the working tool

This test indicator holder has a clamping diameter of 1-3/8". The length from the center of the clamp to the indicator can be up to 6-1/2". The test indicator clamps to the outside of an end mill holder and does not disturb the working tool.

Telescoping Gage Set, 6-Piece 5/16 - 6", $16.95

- For measuring holes, slots and recesses
- Measures holes from 5/16" to 6" diameter
- Double action is self-centering
- Satin chrome finish
- Contact ends are hardened and ground

Use telescoping gages to measure ID, deep holes, recesses, slots, grooves, and other hard to reach places. Measure the actual size or lock the self-centering plungers to a known size for a go-no go gage.

Test Indicator Holder, Professional Grade $39.95

- For measuring holes, slots and recesses
- Measures holes from 5/16" to 6" diameter
- Double action is self-centering
- Satin chrome finish
- Contact ends are hardened and ground

Use telescoping gages to measure ID, deep holes, recesses, slots, grooves, and other hard to reach places. Measure the actual size or lock the self-centering plungers to a known size for a go-no go gage.

Test Indicator Holder, Universal $29.95

- Designed to hold dovetailed test indicators or 1/4" straight shanks
- 3 different clamping dimensions: 1/4", 3/8" & 1/2" for various collet sizes
- Reaches anywhere within an 8" diameter and fine-adjusts approximately 3/8"
- Setting up a workpiece before machining, aligning the center of a round workpiece in relation to the cutting head, or aligning vise jaws to the spindle takes virtually no time with this test indicator holder.

### Precision: Setup

- 0-1" dial indicator with 0.001" resolution
- Magnetic base indicator holder with fine adjustment
- 22 piece indicator point set
- All in a plastic case

### Precison: Sets

- 6 electronic digital caliper
- 6" steel rule
- 1" x 0.001" stroke dial indicator
- Magnetic base indicator holder
- Starrett Tools & Rules for Precision Measuring booklet

### Inspection Kit, 6-Piece

- Starrett Tools & Rules for Precision Measuring booklet
- Magnetic base indicator holder
- 6" electronic digital caliper
- 6" steel rule
- 1" x 0.001" stroke dial indicator
- Magnetic base indicator holder

### Starrett Tools & Rules for Precision Measuring

- 6 electronic digital caliper
- 6" steel rule
- 1" x 0.001" stroke dial indicator
- Magnetic base indicator holder

### Dial Indicator, Magnetic Base & Point Set

- 0-1" dial indicator with 0.001" resolution
- Magnetic base indicator holder with fine adjustment
- 22 piece indicator point set
- All in a plastic case

### Dial Indicator, Test Indicator, Magnetic Base & Point Set

- 0-1" dial indicator with 0.001" resolution
- 0-15-0 dial test indicator with 0.0005" resolution
- Magnetic base indicator holder with fine adjustment
- 22 piece indicator point set
- All in a plastic case

### Adjustable Parallel Set

- Made of precision ground tool steel
- Easily expanded to size in openings for quick reference measurements
- Lock desired size by set screws provided
- Exact size can be set with micrometer
- Furnished in fitted plastic case with size range markings

### Angle Block Set

- Simple, quick angle set ups
- Manufactured of hardened, stabilized and ground steel
- Accurate to ±0.0001" per inch
- Fitted case
- Angle blocks are 3" long and 0.25" thick

### Angle Plate, 3" Slotted & Webbed

- 3" long, 2.5" tall, and 2" wide
- Accurately machined and ground square and parallel on outside and ends
- Slots provide many options for mounting
- Widely used for machining, layout and inspection
- High tensile cast iron is properly seasoned to prevent distortion

### Angle Plate, 3" Slotted & Webbed CLOSEOUT

- 3" long, 2.5" tall, and 2" wide
- Accurately machined and ground square and parallel on outside and ends
- Slots provide many options for mounting
- Widely used for machining, layout and inspection
- High tensile cast iron is properly seasoned to prevent distortion

### Angle Plate, 4-1/2" Slotted & Webbed

- 4-1/2" long, 2.5" tall, and 2" wide
- Accurately machined and ground square and parallel on outside and ends
- Slots provide many options for mounting
- Widely used for machining, layout and inspection
- High tensile cast iron is properly seasoned to prevent distortion
5385 Angle Plate, 3" Webbed End $18.95
- 3" x 3" x 3" angle plate
- Precision ground finishing
- Square and parallel to .0005" per 6" 
- Webbed end
- Made from high tensile cast iron

5384 Angle Plate, 2" Webbed End $12.95
5386 Angle Plate, 4" Webbed End $27.95

1233 Blocks, 1-2-3 $19.95
- Threaded holes are 3/8'-16 thread
- Through holes are 5/16'
- Pairs of 1-2-3 blocks
- Five 3/8'-16 x 1-1/2" Socket Head Cap Screws
- One Hex Wrench

2881 Blocks, 1-2-3, Ultra Precision $29.95
- Threaded holes are 3/8'-16 thread
- Through holes are 5/16'
- Pair of 1-2-3 blocks
- Five 3/8'-16 x 1-1/2" Socket Head Cap Screws

2186 Center It V-Block $18.95
- CENTER IT makes it easy to drill round stock and tubing
- Bolts to the drill press table and enables the drilling of round pieces parallel and centered
- Grooves on the outer sides eliminate slippage while holding by hand for sawing
- Place CENTER IT on the drill press table, run the stationary bit down to center the fixture
- CENTER IT is a tool for drilling pipe and other round objects
- CENTER IT v-block is made specifically for use in a drill press. No clamping of the tube is necessary since the angled flats of the jig hold it centered. Holes will automatically be centered on the tube with no center-punching required. If tubing is too large to drill in a single operation this drill press v-block can simply be turned over. Especially for the metalworking enthusiast, the woodworking hobbyist, and even the professional automotive mechanic, CENTER IT v-block makes speedy and precise work of drilling tasks. Its "hand vise" grip ridges allow no-clamp holding of round stock for sawing and cutting. CENTER IT is made of heavy aluminum extrusion.
- The CENTER IT drill press v-block is 5' Long, 4' Wide, and 1-3/4' High. The groove at the base of the V is 0.43" wide, so use a drill bit smaller than this to center the CENTER IT.

5380 Gage Block Set, Rectangular, 81 Pieces $169.95
- No. of Blocks - 81pc
- Made of the highest quality tool steel
- Surface hardness: HRC 64
- Grade AS-2 (B) (+/- .0001"
- With fitted wooden case with sizes labeled

4855 Indicator Holder, 3/8" Square Shank $13.95
- Holds dovetail indicators
- 3/8" & 7/32" mounting holes for holding the stem of almost all dial indicators
- 4" long 3/8" square shank makes this great for use in a lathe

2907 Machinists Jack Set $15.95
- Machinists jack
- Two extension bases
- Auxiliary pointed screw
- Inner and outer V bases
- 1" diameter, 1.5" to 2.3" tall

5381 Angle Plate, 1.5" Webbed End $12.95
5382 Angle Plate, 4" Webbed End $27.95

5385 Angle Plate, 3" Webbed End $18.95
- 3" x 3" x 3" angle plate
- Precision ground finishing
- Square and parallel to .0005" per 6" 
- Webbed end
- Made from high tensile cast iron

5384 Angle Plate, 2" Webbed End $12.95
5386 Angle Plate, 4" Webbed End $27.95

1233 Blocks, 1-2-3 $19.95
- Threaded holes are 3/8'-16 thread
- Through holes are 5/16'
- Pairs of 1-2-3 blocks
- Five 3/8'-16 x 1-1/2" Socket Head Cap Screws
- One Hex Wrench

2881 Blocks, 1-2-3, Ultra Precision $29.95
- Threaded holes are 3/8'-16 thread
- Through holes are 5/16'
- Pair of 1-2-3 blocks
- Five 3/8'-16 x 1-1/2" Socket Head Cap Screws

2186 Center It V-Block $18.95
- CENTER IT makes it easy to drill round stock and tubing
- Bolts to the drill press table and enables the drilling of round pieces parallel and centered
- Grooves on the outer sides eliminate slippage while holding by hand for sawing
- Place CENTER IT on the drill press table, run the stationary bit down to center the fixture
- CENTER IT is a tool for drilling pipe and other round objects. The CENTER IT v-block is made specifically for use in a drill press. No clamping of the tube is necessary since the angled flats of the jig hold it centered. Holes will automatically be centered on the tube with no center-punching required. If tubing is too large to drill in a single operation this drill press v-block can simply be turned over. Especially for the metalworking enthusiast, the woodworking hobbyist, and even the professional automotive mechanic, CENTER IT v-block makes speedy and precise work of drilling tasks. Its "hand vise" grip ridges allow no-clamp holding of round stock for sawing and cutting. CENTER IT is made of heavy aluminum extrusion.
- The CENTER IT drill press v-block is 5' Long, 4' Wide, and 1-3/4' High. The groove at the base of the V is 0.43" wide, so use a drill bit smaller than this to center the CENTER IT.

- The CENTER IT drill press v-block is 5' Long, 4' Wide, and 1-3/4' High. The groove at the base of the V is 0.43" wide, so use a drill bit smaller than this to center the CENTER IT.

5380 Gage Block Set, Rectangular, 81 Pieces $169.95
- No. of Blocks - 81pc
- Made of the highest quality tool steel
- Surface hardness: HRC 64
- Grade AS-2 (B) (+/- .0001"
- With fitted wooden case with sizes labeled
**2220 Thin Parallels, 3" Long, 10 Pairs, Ultra-Precision**

- Set of ten pairs of thin parallels in a fitted case
- Parallels are 1/8" thick and 3" long
- Made of A2 tool steel hardened to 57 to 59 Rc
- Parallel within ±0.0001" on the top and bottom. The pairs are matched in height within ±0.0001"

These 3" long thin parallels are great for the small vises used on the mini mill. These thin parallels were made in the USA by the Arthur R. Warner Co. exclusively for LittleMachineShop.com. This set of 1/8" thick parallels contains 10 pairs of parallels that step in 1/16" increments. This gives you more sizes you can use in our small vises. These parallels do not have holes in them. The Arthur R. Warner Co. is a family-owned American manufacturer of high speed steel products with specialization in cutting, shaping, pre-grinding, heat treating, and finish-grinding of premium grades of flat high speed steel (and tool steel). Their quality is excellent and LittleMachineShop.com is proud to carry their products.

**2923 Ultra Thin Parallels, 6" Long** $29.95

- Set of 20 pairs of ultra thin parallels in a fitted case
- Machinist parallels are 1/32" thick and 6" long
- Heights are 1/2" to 1-11/16" in 1/64" steps
- Made of high grade alloy steel hardened to 50 Rc
- Parallel within 0.0001" on the top and bottom. The pairs are matched in height within 0.0001"

**1794 V-Blocks, 1-1/4" x 1-1/4" x 1-5/8"** $49.95

- Vee Capacity Is 1" includes Clamps
- 90° V Groove is accurate within 0.0001" for central, parallel and square with all surfaces

These precision V-blocks are made of hardened steel. They are ground square, parallel and concentric within 0.0001".

The V-blocks are supplied in matched pairs.

V-block clamp set includes clamps for inspection work.

**5383 V-Blocks, 1-5/8" x 1-3/4" x 2-3/4"** $72.95

**3718 V-Blocks, Miniature 0.03" to 0.28" capacity** $139.95

- Hold miniature round parts in these small V-blocks
- Bridges straddle long workpieces allowing use of hold-down screw of containing V-block
- Hardened and precision ground
- Square and parallel to 0.0002" includes fitted case

These mini V-blocks, held in larger V-blocks, provide a unique and universal way to hold small and intricate parts.

**2343 Pip-Squeak Engine Plans** $10.95

Complete plans to build a simple steam engine. These plans were created by Ronald J. Steele. This is a complete set of plans to add CNC to a mini mill. They include a materials list with sources, plans for all the parts, and instructions for making the parts and installing them on the mini mill.

Changes to the original machine are minimal. Three drilled and tapped holes are put into the tail end of the lathe bed to hold the Z axis lead screw thrust washer seat/motor mount plate. The remaining motion control parts are either attached via existing holes or clamped onto the machine.

Project completion time is 30 to 40 hours. Cost for mechanical hardware and materials is between $180 and $220. The plans provide several sources for the electrical parts and software.

**2342 Elbow Engine Plans** $12.95

Complete plans to build a 4-cylinder, 4-cycle gasoline engine. These plans were created by Bill Reichart. This engine uses a unique set of epicyclic gears where one gear revolves around another gear. There are 33 pages of plans that detail every part and describe methods of production. The engine is made from bar stock. No castings are required.

**2340 Epicyclic Steam Engine Plans** $24.95

Complete plans to build an epicyclic steam engine. These plans were created by Bill Reichart. This engine uses a unique set of epicyclic gears where one gear revolves around another gear. There are 54 pages of plans, bound in a saddle-stitched booklet. The plans include detailed drawings of each part along with complete construction notes.

Two castings are required. Plans are included to make your own patterns, or castings can be purchased from LittleMachineShop.com.

**2355 Panther Pup Engine Castings, Aluminum** $149.95

Complete plans to build a 4-cylinder, 4-cycle gasoline engine. These plans were created by Bill Reichart. The Panther Pup is an air-cooled internal combustion engine. There are 54 pages of plans, bound in a saddle-stitched booklet. The plans include detailed drawings of each part along with complete construction notes.

Two castings are required. Plans are included to make your own patterns, or castings can be purchased from LittleMachineShop.com.
**Project Plans: Tools**

**2717 Belt Grinder Plans**

- 17 pages of DIY belt grinder plans
- 18 pages of instructions
- 2" x 72" belt stays sharp longer and cuts cooler than shorter belts
- Use for roughing, shaping, contouring of flat or angular stock
- Plans for a commercial-grade square wheel belt grinder.
- Machines like this sell for over $1000.

This project consists of 17 pages of drawings and 18 pages of well written instructions. The drawings are printed on 11 x 17 paper, making them easy to read. Every aspect of this project has been explained and detailed, including 3 dimensional assembly drawings to show you where everything goes.

Although this machine would feel right at home in a professional metal worker's shop, the average home shop machinist will also find endless uses for this grinder. Use it for deburring, sharpening drill bits, dressing mushroomed punches, and grinding HSS lathe tool bits.

Although this 2" x 72" belt grinder plan is not for a beginner, it was designed with the home shop machinist in mind. Anyone with modest equipment can complete this high performance machine. The prototype was built primarily with a 7" lathe, a drill press, and a MIG welder.

**2304 Rike-Vise Plans**

- Complete plans to build a Rike-Vise
- 17 edges of the vise
- 100 edges of instructions
- 2" x 72" belt stays sharply longer and sharper
- Use for roughing, shaping, contouring of flat or angular stock

The Rike-Vise was invented by Bill Reichart. This simple tool is especially designed for the home machine shop. For many jobs it will replace a standard vise. The Rike-Vise is described as two 90° angle plates joined at the corner, and providing a foot so it can be easily clamped to a machine table or a lathe faceplate. The square donut piece provides an accurate clamp to secure a work piece in the base. It is made of mild steel. The plans include tips on accurately building the vise, plus details on using it.

The plans comprise six 8-1/2" x 11" pages. The plans include information on building and using the Rike-Vise.

**Project Plans: Engines**

**2295 Stirling-Steele Engine Plans**

- Complete plans to build a Stirling engine
- Engine is 10" tall when completed
- 26 pages of plans

Complete plans to build a four-cylinder Stirling cycle engine from bar stock and commercial components. These plans were created by Ronald J. Steele.

The package contains 26 pages of highly detailed drawings and instructions providing all the necessary information to produce this modern compact version of a Stirling engine. The Stirling-Steele engine can be machined on a 6" lathe and small milling machine from readily available material. A full bill of materials is included as or assembly instructions. This is not a kit but a full set of dimensioned drawings.

**3048 Quick Change Tool Post Set, OXA, 4-Degree Cut-Off**

- Quick change tool post set for lathes with up to 9" swing
- 60% of AXA, or series 100 size wedge type QCTP
- This lathe quick change tool post set includes a 4-Degree Cut-off tool holder
- Includes five tool holders
- All steel construction

This is a true wedge type quick change tool post set that is an exact 6/10 scale copy of the AXA, or series 100 wedge type quick change tool post. This quick change tool post set is designed for lathes with up to 9" swing. It requires 3/4" from the top of the compound rest to the center of the lathe. It will hold turning tools with shanks from 1/4" to 1/2". The boring bar holder will hold 3/8" and 1/2" boring bars. It will hold 1/2" tail cut-off blades. All working parts are hardened and ground. It is completely sealed for maintenance-free operation. This set includes the tool post and the following tool holders: 2 - #1 Turning & Facing - #2 Boring, Turning & Facing - #4 Heavy Duty Boring will hold both 3/8" and 1/2" boring bars1 - #7 Universal Parting Blade (for 1/2" inch cut-off blade - 4-degree) This tool post mounts with an M10 stud and is included. It also includes a piece of steel from which you can make a T-slot nut to fit your lathe.

**4117 Quick Change Tool Post Mount, OXA for Lathes**

- Includes five tool holders
- Horizontal cut-off tool holder
- Fits all 7x10 to 7x16 mini lathes

Wedge type OXA quick change tool post set. This quick change tool post set is designed for lathes with up to 8" swing. It is the perfect size for mini lathes. The tool holders have been designed specifically to work on the mini lathes and other lathes that have limited distance from the top of the compound to the center of the lathe. This tool post mounts with an M10 stud, which is included. This quick change tool post requires 5/8" from the top of the compound rest to the center of the lathe. All working parts are hardened and ground steel. It is completely sealed for maintenance-free operation. This tool post mounts with an M10 stud. This set includes the tool post and the following tool holders: 2 - #1 Turning & Facing - #2 Boring, Turning & Facing - #4 Heavy Duty Boring will hold both 3/8" and 1/2" boring bars1 - #7 Universal Parting Blade (for 1/2" inch cut-off blade - 4-degree)

**3112 Quick Change Tool Post Set, OXA, Horizontal Cut-Off, Mini Lathe**

- Quick change tool post set for lathes with up to 8" swing
- OXA, or series 000 size (60% of AXA size)
- Includes five tool steel tool holders
- Horizontal cut-off tool holder
- Fits all 7x10 to 7x16 mini lathes

Wedge type OXA quick change tool post set. This quick change tool post set is designed for lathes with up to 8" swing. It is the perfect size for mini lathes. The tool holders have been designed specifically to work on the mini lathes and other lathes that have limited distance from the top of the compound to the center of the lathe. This tool post mounts with an M10 stud, which is included. This quick change tool post requires 5/8" from the top of the compound rest to the center of the lathe. All working parts are hardened and ground steel. It is completely sealed for maintenance-free operation. This tool post mounts with an M10 stud. This set includes the tool post and the following tool holders: 2 - #1 Turning & Facing - #2 Boring, Turning & Facing - #4 Heavy Duty Boring will hold both 3/8" and 1/2" boring bars1 - #7 Universal Parting Blade (for 1/2" inch cut-off blade - 4-degree)
2280 Quick Change Tool Post Set, AXA $174.95
- Quick change tool post set for lathes with up to 12" swing
- AXA, or series 100 size
- Tool holders interchange with Aloris, Dorian, and Phase II
- All steel construction
- Includes five tool holders and AXA, or series 100, wedge type quick change tool post set.

This AXA quick change tool post set is designed for lathes with up to 12" swing.
It is a good fit on 9x20 lathes, but requires some modification or our mounting sleeve.
Many people feel that these tool posts are too large for mini lathes, but others like the mass and rigidity they provide.
All working parts are hardened and ground. This lathe tool post set is completely sealed for maintenance-free operation.
The tool holders interchange with Aloris, Dorian, and Phase II.
This lathe tool post set includes the tool post and the following tool holders:
- No. 1 - Turning & Facing Tool Holder
- No. 2 - Boring, Turning & Facing Tool Holder
- No. 4 - Heavy Duty Boring Tool Holder, will hold 5/8" or 3/4" round shanks.
- No. 7 - Universal Parting Blade Holder
- No.10 - Knurling, Facing & Turning.

This set also includes a 9/16"-18 threaded stud and a piece of steel from which you can make a T-slot nut to fit your lathe.

3787 Compound Rest Top, for AXA QCTP on C6 $38.44

3674 Tap & Tap Drill Bit, 9/16"-18 Thread $16.95
4914 Compound Rest Top, for AXA QCTP, Bench Lathe $39.34
4426 Quick Change 2MT Tool Holder, AXA $24.95
2283 Quick Change Boring Tool Holder, AXA $21.95
2284 Quick Change Cut-Off Tool Holder, AXA $21.95
2285 Quick Change Knurling & Turning Tool Holder, AXA $24.95
3712 Quick Change Tool Post Mount, AXA for 9x20 Lathes $9.95
4701 Quick Change Tool Post, AXA $147.95
2282 Quick Change Turning & Boring Tool Holder, AXA $15.95
2281 Quick Change Turning & Facing Tool Holder, AXA $14.95
3970 Set Screws, M8x20 Socket Dog Point, Set of 10 $7.95

3876 Quick Change Tool Post Set, AXA, Aloris $483.00
- AXA, or series 100 Aloris quick change tool post set for lathes with up to 12" swing
- Made by Aloris, the originator of the super precision quick change tool post
- Tool holders interchange with Aloris, Dorian, and Phase II
- All steel construction
- Starter set includes two Aloris tool holders

Aloris Tool Technology Company is the originator of super precision Quick Change Tool Posts and tool holders for over 60 years. Since 1946, Aloris has revolutionized the metal working industry with the introduction of the first quick change tool post and has since been the standard of the industry, known worldwide for our integrity and lasting quality, AXA, or series 100, wedge type quick change tool post set.

This AXA quick change tool post set is designed for lathes with up to 12" swing.
It is a good fit on 9x20 lathes. Many people feel that these tool posts are too large for mini lathes, but others like the mass and rigidity they provide. All working parts are hardened and ground. It is completely sealed for maintenance-free operation.
The tool holders interchange with Aloris, Dorian, and Phase II. This set includes the tool post and the following Aloris tool holders:
- No. 1 - Turning & Facing, No. 2 - Boring, Turning & Facing.

This set also includes a piece of steel from which you can make a T-slot nut to fit your lathe.

3658 Quick Change Tool Post Set, BXA $299.95
- Quick change tool post set for lathes with 10-15" swing
- BXA, or series 200 size
- Tool holders interchange with Aloris, Dorian, and Phase II
- All steel construction
- Includes five tool holders

BXA, or series 200, wedge type quick change tool post set. This quick change tool post set is designed for lathes with up to 10-15" swing. All working parts are hardened and ground. It is completely sealed for maintenance-free operation. The tool holders interchange with Aloris, Dorian, and Phase II. This set includes the tool post and the following tool holders:
- No. 1 - Turning & Facing, No. 2 - Boring, Turning & Facing, No. 4 - Heavy Duty Boring, No. 7 - Universal Parting Blade, No.10 - Knurling, Facing & Turning. This set also includes a piece of steel from which you can make a T-slot nut to fit your lathe.
The BXA turning tool holders hold tools up to 5/8".
The cut-off tool holds 11/16" blades.

4443 Quick Change Boring Tool Holder, BXA $36.95
4444 Quick Change Cut-Off Tool Holder, BXA $32.95
4445 Quick Change Knurling & Turning Tool Holder, BXA $53.95
4442 Quick Change Turning & Boring Tool Holder, BXA $23.95
4441 Quick Change Turning & Facing Tool Holder, BXA $21.95

Rotary Tables: Rotary Tables

3519 4th Axis Rotary Table for CNC $1,064.95
- Includes stepper motor
- Includes tailstock
- Includes adapter to mount a 3" lathe chuck
- Includes hold down clamps to mount the rotary table on the mill table

This 4" (100 mm) 4th axis CNC rotary table is great for small CNC milling machines.
The stepper motor is a NEMA 23 YAKO YK57HB76-03A 2-phase 6-wire motor.

1927 Rotary Table, 4" H/V $384.95
- 4" (100 mm) diameter
- Use in horizontal or vertical position
- Worm ratio is 72 to 1
- 10 second rotational accuracy
- 2 Morse taper center hole

This horizontal / vertical rotary table is for indexing, circular cutting, angle setting, boring, and spot facing operations.
The meehanite cast iron table is precision machined and has a 2 Morse taper center hole. The table is graduated with a 360° scale.
A micro collar graduated to one minute with a ten second accuracy vernier scale is provided. The rotary table has lock down clamps and the crank can be disengaged.
The worm gear and center hole are hardened and ground. The table is 2.76" high when horizontal, and the centerline is 2.76" above the table when in the vertical position.
The worm ratio is 72 to 1.

Flatness of clamping surface: 0.0006" TIR
Parallelism of clamping surface to base: 0.0008" TIR
Squareness of clamping surface to angle face: 0.0004" TIR
Squareness of clamping surface to center slot: 0.0008" TIR
Concentricity of center bore: 0.0008" TIR
Max spacing error: 1 minute, 20 seconds.

1943 Clamping Kit, 6 mm T-Slot, 16-Piece $17.95
1799 Dividing Plate Set for 4" Rotary Table $84.95
1931 Rotary Table, 4" with Tailstock & Dividing Plate $489.95
3791 Rotary Table, 4" with Tailstock, Dividing Plate, & 3-Jaw Lathe Chuck $579.95
3792 Rotary Table, 4" with Tailstock, Dividing Plate, & 4-Jaw Lathe Chuck $569.95
1800 Tailstock for 4" Rotary Table $104.95

● Use in horizontal or vertical position  
● Worm ratio is 72 to 1  
● Digital angular readout with 1 minute (0.017 degree) resolution digital angular readout  
● 2 Morse taper center hole  
This horizontal / vertical rotary table is made of precision machined cast iron and has a 2 Morse taper center hole. The table is graduated with a 360 degree scale. The rotary table is furnished with lock down clamps. The digital readout displays degrees and minutes or decimal degrees. This rotary table comes with an adapter to mount a 3” lathe chuck. It works with both 3- and 4-jaw chucks. The table is 2.87” high when horizontal, and the centerline is 2.68” above the table when in the vertical position. The body of the table is 5” (crank handle to back) by 5.5” (mounting slot to mounting slot). The worm ratio is 72 to 1. Flatness of clamping surface: 0.0008”. Squareness of clamping surface to angle face: 0.0012”. Squareness of clamping surface to center slot: 0.0012”. Concentricity of center bore: 0.0008” TIP. |   |
| 5852 Rotary Table, 4” Digital Readout with Tailstock & Dividing Plate | $474.18 |
| 5853 Rotary Table, 4” Digital Readout with Tailstock, Dividing Plate, & 3-Jaw Lathe Chuck | $550.18 |
| 5854 Rotary Table, 4” Digital Readout with Tailstock, Dividing Plate, & 4-Jaw Lathe Chuck | $550.18 |
| 5604 Rotary Table, 4” Tilting | $188.54 |
| ● Tilting table 0° to 90°  
● 4” diameter table rotates 360°  
● 1:36 ratio or 10° per handwheel revolution  
● Scale reads to 15 minutes  
● Low profile - 66mm (2.60”) tall  
Affordably priced rotary table suitable for bolt patterns, arched slots, cutting out flywheels and other medium precision jobs. The small size of the table is good for small milling machines. The table has a low profile of 55mm (2.17”) in the horizontal position. This precision ground graded cast iron table is graduated for a full 360°. The handwheel utilizes a 1:36 ratio resulting in 10° per handwheel revolution. Table comes with two clamping studs, two 45mm clamping bars and two t-nuts. |   |
| 1787 Rotary Table, 6” | $599.95 |
| This horizontal / vertical rotary table is for indexing, circular cutting, angle setting, boring, and spot facing operations. The meehanite cast iron table is precision machined and has a 2 Morse taper center hole. This 6” rotary table is graduated with a 360° scale. A micro collar graduated to one minute with a ten second accuracy vernier scale is provided. This horizontal/vertical rotary table has lock down clamps and the crank can be disengaged. The worm gear and center hole are hardened and ground. The 6” rotary table is 3.35” high when horizontal, and the centerline is 4.92” above the table when in the vertical position. The worm ratio is 90 to 1. Flatness of clamping surface: 0.0006” Parallelism of clamping surface to base: 0.0008” Squareness of clamping surface to angle face: 0.0004” Squareness of clamping surface to center slot: 0.0008”. Concentricity of center bore: 0.0008” |   |
| 3942 Adapter, 5” Lathe Chuck | $119.81 |
| 1801 Dividing Plate Set for 6” Rotary Table | $144.95 |
| 3566 Rotary Table, 6” with Tailstock & Dividing Plates | $924.95 |
| 1802 Tailstock for 6” Rotary Table | $191.95 |

The Arthur R. Warner Co. is a family-owned American manufacturer of high speed steel products with specialization in cutting, shaping, pre-grinding, heat treating, and finish grinding of premium grades of flat high speed steel. Their quality is excellent and LittleMachineShop.com is proud to carry their products.
Threading Tools: Lathe Threading

5370 Threading Tool, Internal, 3/8" Indexable, HSS Triangle Inserts, A R Warner Kit #19 $103.00

- For internal threading
- Includes three T-15 high speed steel TPWM-1.8-1.5-.5 inserts
- Includes two MS-1152S screws and one T-7 wrench

This Arthur R. Warner Co. boring bar for single-point cutting internal threads has 0.375" shank and is 5" long.

This tool requires a 0.5" minimum hole size.

Uses TPWM-1.8-1.5-.5 and TPWM-1.8-1.5-1 inserts.

The maximum thread depth is 0.100".

3571 Threading Tool, Internal, 1/2" Indexable HSS Triangle Inserts, A R Warner Kit #20 $103.00

5439 Threading Tool, Internal, 3/8" Indexable, SIR0375H11 $174.95

- For right hand internal threads
- 3/8" x 4" shank
- 10 TiN coated 11IRA60 carbide inserts
- Includes: 1 tool holder, 1 Torx wrench
- A60 inserts cut 0.5-1.5mm/16-48 TPI threads

Complete with aluminum case, minimum bore 0.47" (11.9 mm)

5440 Threading Tool, Internal, 1/2", Indexable, SIR0500K11 $174.95

2221 Tool Bit, 5/16" HSS Threading $9.95

This threading tool bit is sharpened on both ends to a 60° angle for threading. It is made from high speed steel. Both ends are offset, one so you can thread near a left shoulder, and the other so you can thread near a right shoulder.

4115 Threading Tool Bit and Center Gage $16.95

1895 Tool Bit, 1/4" HSS Internal Threading $12.95

Threading Tools: Tap and Die Sets

2851 Die Set, 0-80 to 5-40 Threads $92.95

- Miniature tap set includes 0-80, 1-64, 2-56, 3-48, 4-40, and 5-40 dies
- Round adjustable split dies
- 13/16" diameter
- High Speed Steel
- Imported

For cutting external screw threads either by hand or with a die stock or by machine with a die holder. They can be utilized to cut smaller or larger tolerances by turning the adjustment screw.

2842 Die, 0-80 Thread $15.95

2843 Die, 1-64 Thread $15.95

2844 Die, 2-56 Thread $15.95

2845 Die, 3-48 Thread $15.95

2846 Die, 4-40 Thread $15.95

2847 Die, 5-40 Thread $15.95

2848 Die, 6-32 Thread $15.95

2849 Die, 8-32 Thread $15.95

3675 Die, 10-32 Thread $15.95

5919 Die Set, 1/4" - 3/4" Rethreading, Hexagonal $35.50

- 8 Piece Hexagon Die Set
- Common sizes from 1/4" - 3/4""
- Right Hand
- Carbon Steel
- Ships in Case

For rethreading rusty or worn threads. Sizes include: one each of 1/4-20, 5/16-18, 3/8-16, 7/16-14, 1/2-13, 9/16-12, 5/8-11 & 3/4-10.

5920 Die Set, M6 - M20 Rethreading, Hexagonal $23.50

- 7 Piece Hexagon Rethreading Die Set
- Common sizes from M6 - M20
- Right Hand
- Carbon Steel
- Supplied with fitted case

For rethreading rusty or worn threads. Right handed. Size include: M6 X 1.00, M8 X 1.25, M10 X 1.50, M12 X 1.75, M14 X 2.00, M16 X 2.00 & M20 X 2.50.

3601 Tap & Die Set, 39-Piece Solid Round Dies $159.95

- 39-piece machine screw & fractional tap and solid round die set
- Machine screw and fractional sizes of plug style taps plus 1" solid round dies
- Includes three tap handles and two die stocks
- 18-leaf standard thread pitch gauge and screwdriver
- Plastic case with lift-out tray

This USA-made IRWIN brand 39 PC set can be used to create new threads. The taps and dies are made from high carbon steel. The Hanson 39-Piece Machine Screw / Fractional Tap and Solid Round Die Set includes machine screw taps, fractional plug style taps, plus 1-inch solid round dies. A adjustable guide diestock for cutting external threads on metal cylinders is included, as well as a adjustable handle tap wrench to create internal screw threads, and a T-handle tap wrench. There's also an 18-leaf standard thread pitch gauge, a screwdriver, and a handy plastic case to keep everything organized. 39-pc set in plastic case includes the following items: Machine Screw Plug Tap and 1" Solid Round Dies in sizes: 4-40 NC, 6-32 NC, 8-32 NC, 10-24 NC, 10-32 NF, 12-24 NCFractional Plug Tap and 1" Solid Round Dies in sizes: 1/4" - 20 NC, 1/4" - 28 NF, 5/16" - 18 NC, 5/16" - 24 NF, 3/8" - 16 NC, 3/8" - 24 NF, 7/16" - 14 NC, 7/16" - 20 NF, 1/2" - 13 NC, 1/2" - 20 NPHigh Speed Steel Plug Tap and 1" Solid Round Dies in sizes: 1/8" - 27 NPT.

Threading Tools: Adjustable Die Stock - 1" Dies, T-Handle Wrench - Taps No. 0 to 1/4", Adj. Handle Tap Wrench - Taps No. 0 to 1/2", 18 Leaf Standard Thread Pitch Gauge, Empty Plastic Case

3597 Tap & Die Set, 41-Piece $149.95

- 41-piece machine screw & fractional hexagonal tap and die set for threading operations
- Machine screw and fractional sizes of plug style taps plus 5/8" and 1" hexagon dies
- Includes three tap handles and two die stocks
- 18-leaf standard thread pitch gauge and screwdriver
- Plastic case with lift-out tray

This USA-made IRWIN brand 41 PC set can be used to restore or start new threads. The taps and dies are made from high carbon steel. The Hanson 41-Piece Machine Screw / Fractional Tap and Hex Die Set includes machine screw taps, fractional plug style taps, plus 5/8-inch and 1-inch hexagon dies in 17 different sizes. A DS-26 adjustable guide diestock and DS-57 plain diestock for cutting external threads on metal cylinders is included, as well as a TR-88 adjustable handle tap wrench to create internal screw threads, a TR-73 two-in-one tap wrench, and a TR-50 two-in-one tap wrench. There's also an 18-leaf standard thread pitch gauge, a screwdriver, and a handy plastic case to keep everything organized. 41-pc set in plastic case includes the following items: Machine Screw Plug Tap and 3/8" Hexagon Dies in sizes: 4 - 40 NC, 6 - 32 NC, 8 - 32 NC, 10 - 24 NC, 10 - 32 NF, 12 - 24 NCFractional Plug Tap and 1" Hexagon Dies in sizes: 1/4" - 20 NC, 1/4" - 28 NF, 5/16" - 18 NC, 5/16" - 24 NF, 3/8" - 16 NC, 3/8" - 24 NF, 7/16" - 14 NC, 7/16" - 20 NF, 1/2" - 13 NC, 1/2" - 20 NPHigh Speed Steel Plug Tap and 1" Hexagon Dies in sizes: 1/8" - 27 NPT.

Threading Tools: Adjustable Die Stock - 1" Dies, T-Handle Wrench - Taps No. 0 to 1/4", Adj. Handle Tap Wrench - Taps No. 0 to 1/2", 18 Leaf Standard Thread Pitch Gauge, Empty Plastic Case

3600 Tap & Die Set, 41-Piece Metric $174.95

- 41-piece machine screw & fractional hexagonal tap and die set for threading operations
- Machine screw and fractional sizes of plug style taps plus 5/8" and 1" hexagon dies
- Includes three tap handles and two die stocks
- 18-leaf standard thread pitch gauge and screwdriver
- Plastic case with lift-out tray

This USA-made IRWIN brand 41 PC set can be used to restore or start new threads. The taps and dies are made from high carbon steel. The Hanson 41-Piece Machine Screw / Fractional Tap and Hex Die Set includes machine screw taps, fractional plug style taps, plus 5/8-inch and 1-inch hexagon dies in 17 different sizes. A DS-26 adjustable guide diestock and DS-57 plain diestock for cutting external threads on metal cylinders is included, as well as a TR-88 adjustable handle tap wrench to create internal screw threads, a TR-73 two-in-one tap wrench, and a TR-50 two-in-one tap wrench. There's also an 18-leaf standard thread pitch gauge, a screwdriver, and a handy plastic case to keep everything organized. 41-pc set in plastic case includes the following items: Machine Screw Plug Tap and 3/8" Hexagon Dies in sizes: 4 - 40 NC, 6 - 32 NC, 8 - 32 NC, 10 - 24 NC, 10 - 32 NF, 12 - 24 NCFractional Plug Tap and 1" Hexagon Dies in sizes: 1/4" - 20 NC, 1/4" - 28 NF, 5/16" - 18 NC, 5/16" - 24 NF, 3/8" - 16 NC, 3/8" - 24 NF, 7/16" - 14 NC, 7/16" - 20 NF, 1/2" - 13 NC, 1/2" - 20 NPHigh Speed Steel Plug Tap and 1" Hexagon Dies in sizes: 1/8" - 27 NPT.
Threaded Tools: Tap and Die Sets

2540  Tap & Die Set, 41-Piece  $51.95
- Tungsten Steel
- Hex dies are ideal for working in tight places
- Furnished in a fitted case with lift-out tray
- Imported

This 41-piece tap and die set includes the common sizes from #4 to 1/2". The set includes a screw pitch gage, a die stock and a T-handle tap wrench. The threads covered include: NC: 4-40, 6-32, 8-32, 10-24, 12-24, 1-14; 5/16"-18, 3/8"-16, 7/16"-14, 1/2"-13NF: 10-32, 1-1/4"-28, 5/16"-24, 3/8"-24, 7/16"-20, 1/2"-20NPT: 1/8"-27

2541 Tap & Die Set, 41-Piece Metric  $51.95

2841 Tap Set, 0-80 to 5-40 Thread, Set of 6  $34.95
- Hand tap set includes #0-80, #1-64, #2-56, #3-48, #4-40, and #5-40
- Plug style (3-5 chamfered threads)
- High speed steel (HSS)
- Utilize in through or blind hole tapping

American-made product from Fisher Machine Shop.

Setscrew in the back end to reverse the point. This is a quality tool, and I never saw him break a tap! Simply hold the tapping block flat against your work, above the hole you've tap drilled. Place your tap through the appropriately sized guide hole and you are assured of perfect tap alignment when starting your thread.

The OMW Tapping Block was inspired by a block used nearly every day by a master tool and die maker I had the pleasure of working with in my shop. He used his block whenever tapping a hole, and I never saw him break a tap! Simply hold the tapping block flat against your work, above the hole you've tap drilled. Place your tap through the appropriately sized guide hole and you are assured of perfect tap alignment when starting your thread.

The OMW Tapping Block is manufactured of the highest quality steel. It is beautifully designed, expertly knurled and chamfered for easy grip, with counterbored holes to allow for material chip clearance when tapping. Fits all common taps from 0-80 thread to 3/8-16 (the seven holes fit tap shanks of #0-80, #1-64, #2-56, #3-48, #4-40, and #5-40). This Tapping Block should be in the tool chest of every machinist, from beginner to expert. Shop lathe threading tools online at LittleMachineShop.com.

2854 Tapping Block, OMW Metric  $43.95
- Tap #10 to 1/2" (M3 - M12) threads
- Quick loading and unloading
- Adjustable clamping range
- Good stability, high precision

Turn your bench mill, or lathe into a tapping machine. Tap #10 to 1/2" (M3 - M12) threads. This is not a reversible tapping head. You must reverse the spindle to extract the tap. Mounts to 33 Jacobs taper arbor. Length 2.87" (72mm) Diameter 1.89" (48mm)

Threaded Tools: Tap Holders and Guides

3602 Tap Adapters, 3/8" Socket Drive  $32.95
- Jaws adjust to tightly secure taps
- Fits all 3/8" square drive wrenches
- Small adapter fits taps for 0 to 1/4" thread
- Large adapter fits taps for 1/4" to 1/2" thread

For use in tight workspaces or for putting some muscle on those hard-to-turn large taps. Designed for use with taps, reamers, screw extractors and other tools with a square shank. Not recommended for cutting new threads.

1963 Tap Guide, Fisher  $15.50
- Made in USA

This tap guide helps you start threaded holes straight. The reversible point is spring loaded to maintain pressure on the tap. One end of the point has a center hole for small taps, while the other end is pointed for larger taps. The 0.500" diameter body is ground and knurled for easy handling. Remove the setscrew in the back end to reverse the point. This is a quality American-made product from Fisher Machine Shop.

3104 Tap Guide, 2MT Short, Fisher  $17.95

3603 Tap Handle, Adjustable  $9.95
- Offset handle adjustable tap & reamer wrench
- Straight handle design provides greater leverage, especially when using larger diameter taps
- For Taps No. 0 To 1/2"

Straight handle design provides greater leverage, especially when using larger diameter taps.
Threaded Tools: Tap Holders and Guides

3434 T-Handle Tap Wrench for #0 to #10 Taps, Starrett
$37.50
- Starrett T-handle tap wrench
- Starrett catalog number 93A
- For holding taps, drills, reamers, and other small tools to be turned by hand
- Fits machine screw taps from #0 to #10
- Fits fractional thread taps from 1/16" to 3/16"

The body of this T-handle tap wrench is centered, enabling the worker to use it on lathe centers or on an upright drilling machine to start the tap straight. The jaws conform to the tool being held, making it rigid and less apt to loosen. They are properly heat treated to withstand ordinary shop use. The wrench has a sliding handle that is frictionally held. This feature permits the handle to be removed entirely or positioned so that leverage can be applied when working in close quarters. These tools are designed to hold square shanks. Round shanks can be gripped, but care must be used. Excessive tightening may break the binding nut.

3555 T-Handle Tap Wrench for 1/4" to 1/2" Taps, Starrett
$51.00
3554 T-Handle Tap Wrench for 7/32" to 7/16" Taps, Starrett
$40.00

2852 T-Handle Tap Wrench for #0 to #8 Taps
$10.95
- For hand tapping and driving screw extractors
- Fits machine screw taps from #0 to #8
- Fits fractional thread taps from 1/16" to 5/53"

For holding taps, reamers, and other small tools to be turned by hand.

2853 T-Handle Tap Wrench for #8 to 1/4" Taps
$11.95

3427 V-TapGuide Hand Tap Guide for Inch Threads
$25.50
- Eliminate tap breakage due to improper alignment
- Automatically squares up the tap with the surface
- 90 degree V-groove along the bottom allows perpendicular alignment on round parts or corners
- Portable, pocket size
- Protective plastic storage tube is included

V-TapGuide™ by Big Gator Tools™ is made of a special alloyed steel that is ground and heat treated for durability. The guide holes are sized for ANSI standard ground taps. The V-TapGuide handles taps for UTS screw sizes of #0, #1, #2, #3, #4, #5, #6, #8, #10, 1/4", 5/16", 3/8", 7/16", 1/2", and 5/8".

3428 V-TapGuide Hand Tap Guide for Metric Threads
$25.50
- Both inch and metric taps
- Eliminate tap breakage due to improper alignment
- Automatically squares up the tap with the surface
- 90 degree V-groove along the bottom allows perpendicular alignment on round parts or corners
- Portable, pocket size. Protective plastic storage tube is included

V-TapGuide™ by Big Gator Tools™ is made of a special alloyed steel that is ground and heat treated for durability. The guide holes are smooth, unlike drilled or reamed holes. Guide holes are sized for DIN standard ground taps. The V-TapGuide handles taps for metric screw sizes of 1.6 mm, 2 mm, 2.5 mm, 3 mm, 3.5 mm, 4 mm, 5 mm, 6 mm, 8 mm, 10 mm, 12 mm, 14 mm, and 16 mm.

3866 V-TapGuide Hand Tap Guide Set, Inch and Metric
$49.95

1192 Arbor, Drill Chuck 3MT Tang to 33JT $10.95

Arbors, Drill Chuck, R8 Shank

The long taper goes in the mill spindle. The short taper goes in the drill chuck.

3999 Arbor, Drill Chuck R8 to 2JT $11.95
5445 Arbor, Drill Chuck R8 to 2JT, Professional Grade $14.95
1676 Arbor, Drill Chuck R8 to 33JT $11.95
5444 Arbor, Drill Chuck R8 to 33JT, Professional Grade $14.95

Arbors, Drill Chuck, Straight Shank

The straight end goes in a collet or other tool holder. The short taper goes in the drill chuck.

4632 Arbor, Drill Chuck 3/8" Straight to 0JT $10.07
2298 Arbor, Drill Chuck 3/8" Straight to 2JT $12.85

1195 Morse Taper Sleeve 3MT-2MT $7.73

- Overall Length Is 4-3/8"
- Hardened and Ground
- Adapts 2 Morse Taper to 3 Morse Taper

Morse taper sleeve adapts 2 Morse taper tools to 3 Morse taper machines. Hardened and precision ground.

1193 Morse Taper Sleeve 2MT-1MT $6.51
1194 Morse Taper Sleeve 3MT-1MT $7.73

3671 R8 to 3MT Sleeve $11.95

- Hardened and Ground
- Drawbar End Thread Is 7/16"-20
- Adapts 3 Morse Taper to R8

This sleeve adapts 3 Morse taper tools to R8 spindles.

It is hardened and precision ground.

2190 R8 to 2MT Sleeve $9.95

Tooling: Clamping Kits

Clamp, Adjustable $11.95

- One piece assembly allows quick set-up
- Instant height adjustment
- Attached brass covers protect machine table and workpiece
- Fits 7/16" and 12 mm T-slots
- Clamps work up to 1.75" (44 mm) thick, clamp is 1.35" (34 mm) wide overall

This adjustable clamp fits into the T-slots on the mill table and quickly adjusted to secure your work piece. Clamp fits 7/16" and 12 mm T-slots and the clamp has a brass covering at the point of contact to protect the work piece.

Clamping Kit, 3/8-16 Thread, Professional Grade 16-Piece $72.95

- 4 toe clamps
- 4 heel step blocks
- 4 3/8-16 threaded bolts
- 4 3/8-16 flange nuts
- Use on 7/16", 12 mm, and 1/2" T-slots with your studs and T-slot nuts

This jig bore style clamping kit is made in the US of case hardened steel. It includes 4 CNC machined case hardened toe clamps. There are two large and two small toe clamps with thin "toes" to get into tight spaces. There are 4 aluminum heel step blocks with end radius that are CNC machined and tumble finished. Included are 4 3/8-16 threaded bolts with a CNC machined radius on the head and black oxide finished for supporting the toe clamps. And 4 hardened flange nuts.

Clamping Kit, 6 mm & 1/4" T-Slot, 42-Piece $49.95

- Six 6 mm T-slot Nuts & Six 1/4" T-Slot Nuts
- Ten M5 Studs
- Six Flange Nuts
- Six Step Clamps
- Four Step Block Pairs

36-piece clamping kit. This clamping kit fits the 6 mm T-slots on the Taig mill, and the 1/4" T-slots on the Sherline mill. The clamping kit includes 10 M5 studs, 4 step block pairs, 6 T-slot nuts (in each of the two sizes), 6 flange nuts, and 6 step clamps. There are more parts included than shown in the photo. The stated dimension of the clamping kit is the width at the top of the T-slot.
**Tooling: Clamping Kits**

**1943 Clamping Kit, 6 mm T-Slot, 16-Piece** $17.95
- Four T-slot nuts for 6 mm T-slots
- Four studs of two different lengths
- Two flange nuts
- Two step clamps
- Two pair step block pairs

This set of T-slot nuts and clamping bars fits our 4" H/V rotary table (PN 1927) and the Phase II 4" rotary table (PN 1727). This mill clamp set also fits Taig mills. The clamping kit includes 4 studs of two different lengths, 2 step block pairs, 4 T-slot nuts, 2 flange nuts, and 2 step clamps. The stated dimension of the clamping kit is the width at the top of the T-slot.

**1144 Clamping Kit, 7/16" T-Slot** $54.95
- Stud Size: 3/8"-16
- T-Slot: 7/16" 1/2" T-Slot
- Made of powered casting steel, heat treated
- Storage rack included

58-piece clamping kit 3/8", 7/16" T-Slot. This machinist clamping kit fits the 12 mm T-slots on the mini mill. The t-slot clamp kit includes 24 3/8"-16 studs, 12 step blocks in pairs, 6 T-slot nuts, 6 flange nuts, 4 coupling nuts, and 6 end hold downs. Comes in a wall mount rack. The stated dimension of the clamping kit is the width at the top of the T-slot.

**5975 Clamping Kit, 7/16" T-Slot, Professional Grade** $74.95
- T-Slot: 7/16"
- Stud Size: 3/8"-16
- Made of IC45 steel
- All parts hardened to HRC30-40
- Manufactured at factory for top US brands

58-piece clamping kit 3/8", 7/16" T-Slot. This professional grade clamping kit is manufactured at a world class factory that produces high quality US brands. Pieces are made of IC45 steel for improved strength and all parts are case hardened or heat treated to HRC30-40. The t-slot clamp kit includes: 24 Studs (3/8"-16) - 4 each 3" 4" 5" 6" 7", and 8" - 4 Coupling nuts - 6 Flange nuts - 6 Forged steel step clamps - 6 T-Slot Nuts - 12 Step blocks in pairs - 1 Wall Rack. This machinist clamping kit fits the 12 mm T-slots on the mini mill. The stated dimension of the clamping kit is the width at the top of the T-slot.

**4833 Clamping Kit, 5/8" T-Slot, Professional Grade** $81.95
- T-Slot: 5/8"
- Stud Size: 3/8"-16
- Made of IC45 steel
- All parts hardened to HRC30-40
- Manufactured at factory for top US brands

48-piece clamping kit 5/8", 5/8" T-Slot. This professional grade clamping kit is manufactured at a world class factory that produces high quality US brands. Pieces are made of IC45 steel for improved strength and all parts are case hardened or heat treated to HRC30-40. The t-slot clamp kit includes: 24 Studs (5/8"-16) - 4 each 3" 4" 5" 6" 7", and 8" - 4 Coupling nuts - 6 Flange nuts - 6 Forged steel step clamps - 6 T-Slot Nuts - 12 Step blocks in pairs - 1 Wall Rack. This machinist clamping kit fits the 12 mm T-slots on the mini mill. The stated dimension of the clamping kit is the width at the top of the T-slot.

**3442 Clamping Kit, 8 mm T-Slot, 10-Piece** $24.95
- Two T-slot nuts for 8 mm T-slots
- Two studs
- Two flange nuts
- Two step clamps
- One step block pair

This set of T-slot nuts and clamping bars fits our 4" precision rotary table (PN 1810). It also fits the Harbor Freight micro mill. The clamping kit includes 2 T-slot nuts for 8 mm T-Slots, 2 studs, 1 step block pair, 2 flange nuts, and 2 step clamps. The stated dimension of the clamping kit is the width at the top of the T-slot.

**1813 Clamping Kit, 8 mm T-Slot, 12-Piece** $20.56
- Two T-slot nuts for 8 mm T-slots
- Two studs
- Two flange nuts
- Two step clamps
- Two pair step blocks

This set of T-slot nuts and clamping bars fits our 4" precision rotary table (PN 1810). It also fits the Harbor Freight micro mill as a milling machine clamp set. The T-slot clamping kit includes 2 studs, 2 T-slot nuts, 2 flange nuts, 2 step clamps, and 2 pair step blocks. The stated dimension of the clamping kit is the width at the top of the T-slot.

**2039 Clamping Kit, 8 mm T-Slot, 44-Piece** $52.95
- 6 T-slot nuts to fit 8 mm T-Slots
- 10 M6 studs
- 6 step clamps
- 6 flange nuts
- 8 step block pairs

36-piece clamping kit. This clamping kit fits the 8 mm T-slots on the micro mill. The clamping kit includes 10 M6 studs, 8 step block pairs, 6 T-slot nuts, 6 flange nuts, and 6 step clamps. The stated dimension of the clamping kit is the width at the top of the T-slot.

**1972 Clamping Kit, 8 mm T-Slot, 24-Piece** $39.85

**T-Slot and Flange Nuts**

T-slot nuts are used on mill tables and rotary tables. They are heat treated and have a black oxide finish. The size of a T-slot nut is the width of the top of the T-slot.

**2253 Flange Nut, 3/8"-16** $1.29
**3150 Flange Nut, 3/8"-16** $3.95
**5668 Flange Nut, 5/16"-18** $1.29
**4978 Flange Nut, M6** $1.29
**3097 T-Slot Nut, 1/4"** $1.95
**5592 T-Slot Nut, 3/8"** $1.49
**1269 T-Slot Nut, 7/16"** $1.49
**2021 T-Slot Nut, 1/2"** $1.49
**5971 T-Slot Nut, 5/8"** $2.95
**2059 T-Slot Nut, 6 mm** $2.59
**2058 T-Slot Nut, 8 mm** $2.37
**2991 T-Slot Nut, 10 mm** $4.07
**1418 T-Slot Nut, 12 mm** $4.27

**Tooling: Drill Chucks**

**1212 Drill Chuck, 1/2"** $11.95
- High degree of accuracy
- All working parts hardened
- Drill chuck with key included
- Capacity: 1/32" - 1/2"
- Mounts to 33 Jacobs taper arbor

1/32" - 1/2" Capacity drill chuck designed for bench and floor drill presses, mills, lathes. Hardened ground center jaw improves durability and ensures straight alignment. Runout of this mini drill chuck is 0.008" (0.20 mm) or less.

**1213 Drill Chuck, 3/8"** $9.50

**1660 Drill Chuck, 1/2" Keyless** $38.95
- Self tightening design
- No chuck key required
- Hardened tool steel
- Capacity: 1/32" - 1/2"
- Mounts to 33 Jacobs taper arbor

1/2" keyless drill chuck. No chuck key is required with this self-tightening design. The Jacobs keyless chuck is made from hardened tool steel to ensure accuracy and extended life. The rated capacity is 1/32" to 1/2". Number 33 Jacobs taper mount. Runout of this chuck is 0.005" (0.13 mm) or less.

**1659 Drill Chuck, 3/8" Keyless** $31.95
5923 Drill Chuck, 1/2" Keyless with Integrated R8 Arbor
- 1/64" to 1/2" Keyless Drill Chuck
- Integrated R8 Shank
- T.I.R. <= .0025" (0.0635 mm)
- More compact than traditional chuck/arbor combinations
- No chuck slipping
- 1/64" - 1/2" Precision keyless drill chuck with integral R8 shank.
The integrated design maximized rigidity and accuracy.
Additionally, the chuck is more compact than a typical combined drill chuck and arbor combination, and there can be no chuck slipping on its arbor. The chucks total indicated runout (TIR) is 0.0025" (0.0635 mm) or less.

5924 Drill Chuck, 5/8" Keyless with Integrated R8 Arbor
- Precision made for reduced runout
- Designed for heavy duty jobs
- Key included
- Capacity: 1/32" - 1/2"
- Mounts to 33 Jacobs taper arbor
- 1/32" - 1/2" Capacity professional grade drill chuck. Designed for heavy jobs; all working parts are hardened and manufactured to the highest standards for durability and straight alignment.
- This chuck is comparable to a Jacobs 34-33 heavy-duty drill chuck, including the runout specification of 0.004" (0.10 mm) or less.
- Chuck key is included.

3153 Drill Chuck, 1/2" Professional Grade
- Precision made for reduced runout
- Designed for heavy duty jobs
- Key included
- Capacity: 1/32" - 1/2"
- Mounts to 33 Jacobs taper arbor
- 1/32" - 1/2" Capacity professional grade drill chuck. Designed for heavy jobs; all working parts are hardened and manufactured to the highest standards for durability and straight alignment.
- This chuck is comparable to a Jacobs 34-33 heavy-duty drill chuck, including the runout specification of 0.004" (0.10 mm) or less.
- Chuck key is included.

4862 Drill Chuck, 3/8" Professional Grade
- Capacity: 1/32" - 1/2"
- Mounts to 33 Jacobs taper arbor
- 1/32" - 1/2" Capacity professional grade drill chuck. Designed for heavy jobs; all working parts are hardened and manufactured to the highest standards for durability and straight alignment.
- This chuck is comparable to a Jacobs 34-33 heavy-duty drill chuck, including the runout specification of 0.004" (0.10 mm) or less.
- Chuck key is included.

4863 Drill Chuck, 5/8" Professional Grade
- Capacity: 1/32" - 1/2"
- Mounts to 33 Jacobs taper arbor
- 1/32" - 1/2" Capacity professional grade drill chuck. Designed for heavy jobs; all working parts are hardened and manufactured to the highest standards for durability and straight alignment.
- This chuck is comparable to a Jacobs 34-33 heavy-duty drill chuck, including the runout specification of 0.004" (0.10 mm) or less.
- Chuck key is included.

2870 Drill Chuck, 1/2" with 2MT Standard Arbor
- Combo Chuck and Arbor package for small lathe tailstock
- Capacity: 1/32" - 1/2" chuck
- Hardened for high degree of accuracy
- Key included
- Mount on a standard 2MT arbor
- Chuck and Arbor combo pack. 1/32" - 1/2" capacity drill chuck with hardened ground center jaw for improved durability and straight alignment. Mini lathe drill chuck runout is 0.008" (0.20 mm) or less.
- This chuck comes with a standard length 2 Morse taper arbor that will eject from most lathes with a 2MT tailstock taper.

1396 Drill Chuck, 1/2" with R8 Arbor
- High degree of accuracy
- All working parts hardened
- Chuck Key included
- Capacity: 1/32" - 1/2"
- Mount: 33 Jacobs taper with R8 Shank
- 1/32" - 1/2" Capacity drill chuck with a 33 Jacobs taper arbor that has an R8 Shank.
- Chuck has a hardened ground center jaw that improves durability and ensures straight alignment. The chuck’s roundout is 0.008" (0.20 mm) or less.
- Fits mini mills with an R8 spindle.

5469 Drill Chuck, 1/2", Ball Bearing
- Capacity: 1/32" - 1/2"
- Taper Mount: 33JT
- +/- .0032" (.0813 mm) TIR
- Ultra smooth with ball bearing
- Chuck key included
- Extra heavy duty, all parts hardened and precision ground. Anti-thrust ball bearing to increase the grip power with high speed drilling.

5470 Drill Chuck, 5/32" Stainless Steel
- Capacity: 1/64" - 5/32"
- Taper Mount: GJT
- +/- .006" (.1524 mm) TIR
- Made of anti-rust stainless steel, acid resistant
- Chuck key included
- Recommended for EDM machines and the food & marine industries.

2951 Drill Chuck, 6 mm for Unimat 3 & 4 and SIEG C0 Lathes
- 0.6 to 6 mm (0.024" to 0.24") capacity
- M14 x 1.0 mounting thread
- Fits Unimat 3 & 4 lathes
- Fits SIEG C0 lathes
- Includes chuck key
- Drill chuck for Emco Unimat 3, Unimat 4 and SIEG C0 4x5 lathes. This threaded drill chuck also works with Harbor Freight 95012 Central Machinery 4x5 Micro Lathe. M14 x 1.0 mounting thread with a chuck capacity of 0.6 - 6 mm (0.024" - 0.24"). Includes chuck key.

4977 Key, 1/2" Drill Chuck
- This chuck key fits our 3153 and 1212 1/2" drill chucks

3790 Sensitive Drill Feed and 1/8" (3 mm) Keyless Drill Chuck
- Fingertip control for drilling small holes
- Helps prevent drill breakage
- GJT taper, 1/2" diameter precision ground straight shank
- Spring loaded 3/4" travel fits most drills, mills, lathes or jig borers
- Capacity: 0" - .5" (0 - 13 mm ) Keyless drill chuck
- Sensitive drill feed designed for drilling small holes combined with a 0"-1/8" (3 mm) capacity keyless drill chuck. To use the sensitive drill feed, grasp the knurled ring and pull it down to feed the drill into the workpiece. The internal spring retracts the drill when the ring is released. No chuck key is required with this self-tightening design. The chuck is made from hardened tool steel to ensure accuracy and extended life. The rated capacity of the drill chuck is 0 to 3 mm. Number 0 Jacobs taper mount. 0.002" (0.05 mm) maximum runout.

3665 Sensitive Drill Feed
- $59.95

3668 Drill Chuck, 1/8" (3 mm) Keyless
- $84.95

Tools & Things: Abrasives

Abrasive Cloth, 1" Wide, Individual Grits
- Aluminum oxide abrasive
- High grade resin-bonded on J-weight cotton cloth backing
- Flexible for contour work
- The price is for one foot. Order as many feet as you want and we will cut it to that length. Maximum length is 150 feet.
- Use for cleaning and deburring metal surfaces. Can be used with water or oil.
- 3890 Abrasive Cloth, 1" Wide, 240 Grit
- $0.19
- 3891 Abrasive Cloth, 1" Wide, 320 Grit
- $0.19
- 3892 Abrasive Cloth, 1", Wide, 400 Grit
- $0.29
**Tools & Things: Abrasives**

Abrasives Sheets, 9" X 11", Individual Grits
- Silicon carbide abrasive
- High grade resin-bonded on J-weight cotton cloth backing
- Flexible for contour work

Use for cleaning and deburring metal surfaces. Can be used with water or oil.

**Cratex Bullet Shaped Points**
- Diameter: 9/32"; Length: 1"; Arbor hole: 1/16"
- For Proxxon and Dremel rotary tools
- Sold individually
- Mandrels fit 1/16" arbor hole

Cratex bullet shaped points are used for smoothing and polishing hard to reach surfaces such as grooves, ball corners, holes, clasps, spirals, flutes, and edges. They are widely used for polishing molds, dies, patterns and light castings.

**Tools & Things: Adhesives**

J-B Weld
- Cold-weld compound
- Can be formed, drilled, ground, tapped, machined, filled, sanded, and painted
- Super strong and safe to use

Don’t scrap that damaged item that nothing else can fix! J-B Weld is the answer. J-B Weld is the world’s finest cold-weld compound. It’s a remarkable easy, convenient, and inexpensive alternative to welding, soldering, and brazing. J-B Weld is the smart way to repair something… and for literally pennies per use. When welding or soldering is out of the question due to cost, down time for repairs, or technical/environmental considerations, J-B Weld is the answer. J-B Weld is packaged in two tubes. One contains liquid steel/epoxy resin, and the other contains hardener. When mixed together in equal portions, a chemical reaction occurs that turns the mixture into a compound as hard and tough as steel -- and with similar properties.

Tools & Things: Lubrication

4949 Pump Oilier with Hard Trigger $13.95
- For ball oiliers (and hundreds of other uses)
- 6 oz. capacity
- Straight spout
- Flared bottom to prevent tipping

This is an old-timey (but brand new) pump oiler to oil all those little ball oilers.
The hardened trigger means it’s good for even thick machine oils as well as most types of cutting oils.

3896 SpillMaster Container $6.95
- Avoid workbench spills
- Holds cutting fluids and lubricants
- Won’t spill, even when upside down

The SpillMaster is a great way to keep cutting fluid handy on your workbench. The included acid brush makes application easy. SpillMasters come with Red, Blue, and White tops. We ship the colors randomly based on availability. If you want a particular color, put a note in the Special Instructions box on your order. We’ll accommodate your request if we have that color in stock.

Tools & Things: Shims

4304 Shim Stock Assortment, 0.0005” - 0.005” Plastic $9.95
- 7 sheets of 5” x 5” sheets of polyester shim stock
- Minimal compression in use
- Thickness tolerances to industry standards
- 0.0005”, 0.001”, 0.0015”, 0.002”, 0.003”, 0.004”, and 0.005”

Color coded shim stock sheets are made from a high quality plastic material. Easy to cut and resists oil. Non-magnetic and non-conductive to electricity. Corrosion resistant.

4294 Shim Stock, 0.0005” Silver Plastic $4.95
4297 Shim Stock, 0.001” Amber Plastic $4.95
4298 Shim Stock, 0.0015” Purple Plastic $4.95
4299 Shim Stock, 0.002” Red Plastic $4.95
4301 Shim Stock, 0.003” Green Plastic $4.95
4302 Shim Stock, 0.004” Tan Plastic $4.95
4303 Shim Stock, 0.005” Blue Plastic $4.95

Tools & Things: Things

1196 Armor Wrap 30G Corrosion Inhibiting Paper, 10 Sheets $1.95
- 10 Sheets 6” x 6” Armor Wrap Corrosion Inhibiting Paper
- Protects exposed metal in enclosed spaces
- Proprietary VCI nanotechnology
- For ferrous & non-ferrous metals
- Protect your valuables and tools from rust and corrosion

Put a sheet in each drawer of your tool box to prevent corrosion. The new global standard in corrosion inhibiting paper for ferrous & non-ferrous metals. ARMOR WRAP® VCI papers utilize proprietary VCI nanotechnology, and are essential to keeping your stored items and in-process metals protected and corrosion-free for years. ARMOR WRAP® VCI papers are impregnated on BOTH sides and provide protection for up to three years. This 30G ARMOR WRAP® VCI Paper is environmentally safe, fully recyclable, biodegradable and non-toxic. ARMOR uses only the highest quality virgin neutral pH kraft paper available. The 30G paper is the best all-around solution since it works extremely well protecting ferrous and non-ferrous metals. Protects exposed metal in enclosed spaces without harmful effect on electrical, mechanical or chemical properties. Use in any enclosed space with metals including your toolbox, gun case or safe, tackle box, truck bed box, and safety deposit box.

1457 Chip Removal Tool with Shovel $15.95
- Remove Chips from Hazardous Areas
- 5” Guard and Handle
- Use on Curled and Powdered Chips
- Handle Length 6”
- Shovel 4.75” x 2.75”

Remove chips and empty chip trays from hazardous areas on machines while avoiding accidents. Sturdy design ensures a firm grip and hand safety. This one tool may be used on both curled and powdered chips.

3953 Chip Shield on Magnetic Base $24.95
- 8” x 10” (200mm x 249mm) clear plastic shield
- Magnetic base and locking arm allow easy placement
- Magnetic base dimensions: 2.6” diameter X 0.4” depth

This is a great item for stopping flying chips or coolant/cutting oil spray. The magnetic base allows you to position it on virtually any metal surface and has easy quick lock mechanisms to adjust positioning.

5178 Chip Shield, Magnetic for 3” - 4” Vise $54.95
- Milling machine chip shield uses strong Neodymium magnets to mount to the front or back of a machine
- Conveniently remove without the hassle of fusing with tools or screws
- Adjustable friction hinges allow setting the side panels at any angle up to 150 degrees
- Compatible with any 3” - 4” milling vise with a flat surface on either end
- Approximate dimensions: 11 1/4” x 3 3/4” x 1/4”

This made-in-USA milling vise chip shield is a great add-on to any 3” or 4” milling vise in your shop. This quickly attaches to a vise to provide a reliable and adjustable chip shield. It’s great for “fly cutting” and other “messy” jobs.

Use caution when placing the milling machine chip shield near the vise or any other metal object as the Neodymium magnets are very strong and will act to rapidly close the gap if they are unintentionally placed too close to the object. To assemble, select the side of the center panel where the magnets are flush with the surface and lay this side facedown on a flat surface. Use the supplied machine screws to attach the supplied hinges joining the center panel to each side panel. Start all 4 screws in each hinge before tightening, then tighten the screws with the hinge square to the panel, and the panels square to each other. Turn the torque adjustment screw on the hinge to the desired friction when moving the side panels.

5179 Chip Shield, Magnetic for 4” - 8” Vise $68.95
- Use on Curled and Powdered Chips
- 5” Guard and Handle
- Magnetic base allows positioning
- 10 Sheets 6” x 6” Armor Wrap Corrosion Inhibiting Paper
- Protects exposed metal in enclosed spaces
- Proprietary VCI nanotechnology
- For ferrous & non-ferrous metals
- Protect your valuables and tools from rust and corrosion

Put a sheet in each drawer of your tool box to prevent corrosion. The new global standard in corrosion inhibiting paper for ferrous & non-ferrous metals. ARMOR WRAP® VCI papers utilize proprietary VCI nanotechnology, and are essential to keeping your stored items and in-process metals protected and corrosion-free for years. ARMOR WRAP® VCI papers are impregnated on BOTH sides and provide protection for up to three years. This 30G ARMOR WRAP® VCI Paper is environmentally safe, fully recyclable, biodegradable and non-toxic. ARMOR uses only the highest quality virgin neutral pH kraft paper available. The 30G paper is the best all-around solution since it works extremely well protecting ferrous and non-ferrous metals. Protects exposed metal in enclosed spaces without harmful effect on electrical, mechanical or chemical properties. Use in any enclosed space with metals including your toolbox, gun case or safe, tackle box, truck bed box, and safety deposit box.

5485 Demagnetizer $75.95
- Demagnetizes tools such as dies, cutters and punches
- 115 VAC with on/off switch
- Table size: 6-1/4” x 4-3/4”
- Weight: 7 lbs

Table top style demagnetizer good for demagnetizing tools such as dies, cutters, and punches.

5017 Machinist Calc Pro 2 Machinists Calculator $94.95
- The first dedicated handheld machining math and reference tool
- Calculate speeds and feeds, right triangle solutions, bolt patterns and much more

The Machinist Calc Pro 2 is the upgraded version of the original dedicated handheld machining math and reference tool which provides a complete assortment of machine shop solutions. It has more complete thread data than the Machinery’s Handbook, including step-saving thread and drill size chart look-ups, speeds and feeds, right triangle solutions, bolt patterns and much more. Spend more time machining and less time looking up specs and data in books, on charts or in computer programs. New features include the ability to enter WOC (width of Cut), LOC (Length of Cut), and DOC (Depth of Cut). It also includes settings for 20 popular materials, 6 processes and 3 Tools. It also has a new larger 2-line LCD display.

### Starrett Automatic Center Punch

- Starrett Automatic Center Punch with adjustable stroke
- Starrett catalog number 18A
- Length: 5"  
- Punch Diameter: 9/16"  
- Knurled steel handle

Rugged automatic punches have all-steel handles and parts. This Starrett center punch has a mechanism that automatically strikes a blow when downward pressure is applied. No hammer is required, making one hand always free to steady the work. The adjustable knurled cap of the Starrett 18A regulates the force of the blow. Should a heavy mark be required, the cap is screwed down. Progressively lighter marks are obtained by turning the cap upward. The tension of the spring, which regulates the blow is constant, so marks made by the point are uniform in depth and size for each setting. The point can be easily removed for regrinding and/or replacement. All sizes are identical in style, differing only in the striking power.

### 2620 Automatic Center Punch, Starrett

- Length: 5"  
- Punch Diameter: 5/8"  
- Aluminum Handle  
- Properly Hardened Tool Steel

Starrett Automatic Center Punch with adjustable stroke.

Starrett catalog number 818.

This punch has a lightweight, knurled aluminum handle for a positive grip and easy handling. No hammer is required! Just hold the punch in an upright position, press the handle down, and a built-in mechanism strikes a perfect center mark every time. The force of the blow can be adjusted by turning the knurled cap.

All working parts are made of tool steel, properly hardened. The hardened tool steel point can easily be removed for resharpening or replacement. Works on metal, plastics, wood and other machinable materials.

### 3189 Bench Block

- Made from steel; hardened and ground  
- Handy tool for holding work, driving pins, drilling and so on  
- Knurled edge provides a good grip  
- V-groove accommodates round and odd-shaped objects  
- Holes from 1/8" to 5/8" diameter

This bench block is 3" in diameter and 1.5" thick.

### 4676 Boreoscope, Wired with Color LCD Monitor and 9 mm Camera

- 2.4" color LCD monitor  
- IP67 Water-proof camera with 39" flexible line  
- Night vision feature  
- 9mm camera head (640 x 480 resolution)

This bore scope allows for easy inspections in hard to reach areas. The lightweight handheld design lets you easily find, diagnose and solve problems. Features: Vivid 2.4" color TFT LCD monitor allows image rotation for detailed images, 39" flexible gooseneck cable retains configured shape, Optional 78" flexible shaft with 9mm or 17mm camera available. Mini waterproof 9mm (IP67) camera head provides on-the-spot viewing. Night Vision Range: 20" Power indicator, low voltage indicator, mirror button. LED brightness control. LCD contrast control. Power Supply: 4 x AA battery. Dimension: (WxDxH) 8x3.3x2.4". Operating Temperature: -14 ~ -122°F. Weight: 14 oz.

### 4687 Boreoscope, Camera Head Extension

2891 Grinder, Proxxon IB/E Professional Rotary Tool
- Ball bearing spindle of ground steel, with lock button for rapid cutter changing
- Streamlined die-cast aluminum head for exact bearing seats and optimal stability
- Powerful 100 W motor with full-wave electronics for variable speeds between 5,000 and 20,000 RPM
- Proxxon rotary tool comes complete with six triple-slit steel collets covering 1/32' to 1/8' (1.0 - 3.2 mm) along with a collet nut are included. Proxxon IBS/E Professional Rotary Tool is packed in a durable plastic case, complete with the 34 bits & cutters as shown above.

3633 Accessory Kit for Rotary Tools $41.85
3634 Accessory Kit for Rotary Tools, Modelmakers $21.00
3632 Collet Set, Proxxon Micromot $13.95
2969 Cut-Off Disks, Aluminum Oxide for Rotary Tools, 50 Count $13.50
3033 Grinder, Proxxon IB/E Professional Rotary Tool 230V $119.95
2967 Grinding Wheels, Aluminum Oxide for Rotary Tools, 10 Count $8.15
2968 Grinding Wheels, Silicon Carbide for Rotary Tools, 10 Count $8.15
2935 Rotary Tool Mount for Mini Lathe $32.75
3635 Wire Brushes, Brass for Rotary Tools, 5 Count $11.75

3562 Hacksaw Frame, Heavy Duty, Starrett $36.95
- Starrett Closed Grip Heavy Duty High-Tension Hacksaw Frame
- Starrett catalog number K145
- 12" (300mm) frame
- 4-3/8" (110mm) throat depth
The K145 is a rugged, professional quality high-tension frame constructed of cast aluminum with an extra-thick tubular steel bar for added strength. The steel tube also provides on-hand storage for spare blades. The K145 High-Tension Frame is engineered for use with Starrett bi-metal Bluestripe® and Greenstripe® blades. With just three 360° turns, the easy to use adjusting screw will tension the blade up to 28,000 psi (2,000kg/cm) which prevents the blade from twisting and binding when bearing down on the cut. Each K145 Heavy Duty High-Tension Frame is shipped with a Starrett Bluestripe bi-metal unique ground tooth hacksaw blade.

5928 Hammer, 1-lb. Dead Blow, Professional Grade $22.95
- 16 Oz. Dead Blow Hammer
- Shot loaded interior produces a powerful driving force
- UPE plastic material strike faces
- Head diameter is 1.2"
- Overall length is 12"
Dead blow hammers are designed for applying striking force while minimizing damage to your surface and in reducing rebound. This 16 oz. dead blow hammer is shot loaded for powerful driving force. The striking faces are made of UPE plastic which is resistant to industrial chemical, is non-marring and non-sparking. Head diameter is 1.2", overall length is 12". The handle is padded.

3614 Hammer, 8-oz Ball Peen $8.95
- Drop forged and polished head
- Hardened striking face
- Fiberglass handle
- Shock absorbing rubber grip
- Polished round pein
Ball peen hammers are used in striking and shaping metals. This 8 ounce Ball Peen Hammer has a shock absorbing grip and a hardened striking face.

3613 Hammer, Dead Blow 18 oz. $14.95
- Shot-loaded head provides powerful driving force
- Non-marring, non-sparking
- Polypropylene is resistant to most industrial chemicals
- Head 100 mm x 38 mm (3.94" x 1.50")
- Overall length is 287 mm (11.30")
Dead blow hammers are designed for applying striking force while minimizing damage to your surface and in reducing rebound. This 18 oz. dead blow hammer is shot loaded for powerful driving force. It is case out of durable polypropylene which is resistant to industrial chemical, is non-marring and non-sparking. Head dimensions are 100 mm x 38 mm (3.94" x 1.50"). Overall length is 287 mm (11.30").

1114 Hammer, Hobby, with Interchangeable Tips $12.95
- Six interchangeable tips
- Aluminum grip
- Use for riveting, blending, and chisel work
- 7.5" overall length
- 2.5 ounce head

5840 Handee Clamp $17.95
- Attach nuts, bolts, or hose clamps in hard-to-reach places
- Simply put desired nut, clamp, or bolt in the Handee Clamp and tighten nut on other end to secure
- Made in USA

The Handee Clamp is a small handheld device that firmly holds nuts, bolts and clamps. Its design allows for the placement of the item in vise like jaws that can be tightened from one end. Once secured, simply put the held item into place with one hand, freeing the other hand for actions such as tightening. The Handee Clamp will securely hold onto whatever you put in its jaws, enabling you to reach into that tight crevice so you can focus on the job at hand and not worry about dropping the hardware you need. There is no telling when the next time you'll need The Handee Clamp to help you with that "Out of Reach Grasp". For a relatively inexpensive product, it can save you hours of frustration that makes it more than worth its value. Order this and other lathe tools online at LittleMachineShop.

4331 Hex Wrench Set, T-Handle Ball End, Inch $48.95
- Cushion grip T-handle
- Sizes 5/32" and up have ball end
- Includes stand
- Ball end tips work at up to 25 degree angle
Ball end T-handles feature welded steel handles with cushion grips sized for maximum torque while protecting the ballpoint tip and screw from rounding or stripping. The cushion grip handle is ergonomically shaped eliminating pressure points. The heavy duty handle generates flywheel effect for fast insertion and extraction of screws. Comes with a molded stand that mounts on the wall or work bench. Only available from Bondhus, Protanium® steel means these are the strongest tools available.

Tools are Made in the USA with Bondhus proprietary Protanium steel and are up to 20% stronger than competitive tools. ProGuard Finish is 5 times more effective than the next leading brand in preventing rust, protecting your investment over time.

**Tools & Things**

- **5871 Needle File Set, 12 Pieces**
  - Swiss Pattern File Set of 12
  - 6” length, #2 Cut
  - Ideal for Die Makers, Gunsmiths, Machinists, Modelers
  - Common Swill Pattern Shapes
  - Storage Wallet Included
  - Set of 12 Swiss Pattern needle files, ideal for die makers, jewellers, modellers, craftspeople and hobbyists. Use for removing, smoothing and shaping a wide range of materials. Files are #2 cut and 6”. Shapes include: half round, hand, knife, round, round straight, square and three square shapes. Set comes in a vinyl storage envelope.

- **5466 Pin Chuck Set, 0 - 3/32”**
  - Holds small drills firmly
  - Ensures complete collet length
  - Overall length: 2-1/2”
  - Shank size: 1/4”
  - Includes: 3 collets - capacity: 0 - 1/32”, 1/32” - 1/16”, 1/16” - 3/32”

- **1113 Pin Punch, 13 Piece Set**
  - 13 Piece Pin Punch Set
  - 8 Long Punches - 8” (200 mm) Long
  - 8 Smaller Punches - 4” (200 mm) Long
  - Knurled Grips
  - Sizes Stamped on Handle
  - Combination set of popular size pin punches, 13 pieces in all.
  - The long drive punches are 8” (200mm) in length and the small punches are 4” (100mm) long. Punches have knurled grips and come in a convenient storage envelope.

- **1131 Pin Punch, 8 Piece Set, Brass**
  - 8 piece brass pin punch set
  - Sizes from 1/6” (1.6 mm) to 5/16” (8.0 mm)
  - Eight piece brass drive pin punch set.
  - Set includes sizes 1/16” (1.6 mm), 3/32” (2.4 mm), 1/8” (3.2 mm), 5/32” (4.0 mm), 3/16” (4.8 mm), 7/32” (5.5 mm), 1/4” (6.4 mm), and 5/16” (8.0 mm).

- **5467 Pin Vise Set, 0 - 3/16”**
  - Hollow handle for long wire or rods
  - Includes: Ranges: 0-.055”, .025”-.075”, .045”-.125”, .110”-.187”

- **3560 Pocket Level, Starrett**
  - Starrett 3.5” pocket level
  - Starrett catalog number 135B
  - 3.5” (88 mm) long
  - Satin nickel plated finish
  - This is an extremely useful Starrett level that fits handily in the pocket with no sharp edges. Made from hexagonal stock with convex ends and satin nickel-plated finish.

- **4085 Prick Punch, Starrett**
  - Length: 4”
  - Punch Diameter: 5/64”
  - Properly Hardened Tool Steel
  - Starrett Prick Punch 5/64”.

- **4732 R8 Tool Fixture**
  - Provides a safe way to change cutting tools in R8 based tool holders.
  - Easy assembly and installation.
  - Mounts to the front slot of a mill table, workbench, or vise.
  - Includes a tool caddy for quick access to frequently used tools
  - Convenient for changing R8 based indexable-insert tooling

- **5198 Stamp Set, Numbers and Letters, 3/16”**
  - Numbers (0-9) & Letters (A-Z)
  - Hardened to RC 59-61 at tip and tempered to RC 41 Rockwell at striking end.
  - Made from carbon steel.
  - Character style designed to give sharp clear impressions.
  - Packed in a durable box for easy selection and storage.

- **4208 Thread Restoring File, 12-28 TPI**
  - Eliminates damage on threads of bolts and shafts
  - Suitable for pitches 12, 13, 14, 16, 18, 20, 24 & 28 threads per inch
  - Featuring a crosscut design
  - Square profile shape with overall length of 8 1/2”
  - Sizes are clearly marked

- **4209 Thread Restoring File, 0.7-3 mm Pitch**
  - Torx Wrenches, Flag Style
  - Molded Flag Style Handle with spinner top
  - This is a great replacement torx wrench for many indexable turning tool sets that use torx screws.
  - The flag style Torx wrench is designed to prevent overtightening of insert retaining screws.

- **5443 Torx Wrench, T-6**
  - $1.95

- **5551 Torx Wrench, T-8**
  - $1.95

- **5552 Torx Wrench, T-9**
  - $1.95

- **5553 Torx Wrench, T-10**
  - $1.95

- **5554 Torx Wrench, T-15**
  - $1.95

- **Torx Wrenches, Flag Style, Wiha**
  - Molded Flag Style Handle with spinner top
  - Made of High Performance CRM 72 Tool Steel
  - Hardened Oxide Finish
  - Made In Germany

- **5511 Torx Wrench, T-5, Wiha**
  - $5.95

- **5512 Torx Wrench, T-6, Wiha**
  - $5.95

- **4842 Torx Wrench, T-7, Wiha**
  - $5.95

- **4843 Torx Wrench, T-8, Wiha**
  - $5.95

- **4844 Torx Wrench, T-9, Wiha**
  - $5.95

- **4845 Torx Wrench, T-10, Wiha**
  - $5.95

- **4846 Torx Wrench, T-15, Wiha**
  - $5.95
Tools & Things: Tools

4279 V-DrillGuide Hand Drill Guide for Inch Drills $27.50
- Drill guide is sized for drill bit sizes: 1/8" to 3/8"
- 17 drill sizes - 1/64" increments
- Special nickel alloyed steel heat treated for durability

V-DrillGuide Hand Drill Guide by Big Gator Tools** is like a portable drill press for precision alignment. The V-groove along the bottom of the guide allows for perpendicular alignment with all drill sizes on round parts or corners. The image shows both the top and bottom of the guide. The bottom surface is precision ground to assure stability and accurate perpendicular alignment on flat surfaces.

4911 V-DrillGuide Hand Drill Guide for Metric Drills $27.50

Tools & Things: Workwear

3968 Shop Apron $13.95
- 5 pockets designed for metalworking tools
- We had these aprons custom-made to our design out of heavy-duty denim.

5099 Users Guide, KX3 Milling Machine, 3503 $39.95

Videos and Books: Other Videos

3440 DVD: Shop Secrets, Volume 1: Measuring Tools $39.95
- Teaches you to operate and maintain precision measuring equipment
- Easy-to-understand words, diagrams, and three-dimensional graphics explain operation of the tools
- Covers equipment that even experienced machinists may not know how to operate

Shop Secrets, Volume 1 is a two-hour video on the use and care of machinist measuring tools and related machine shop operations. Produced for the beginning machinist, this video is in use at technical high schools in the US and in industry both in the US and the Far East. Topics include adjustable parallels, backlash, calipers, combination squares, optical comparator, dial indicators, edge finders, left-handed lead screw operation, micrometers, precision squares, radius gages, shop safety, small hole gages, thread gages, telescoping gages, thread pitch gages, vernier scales, vision assists, wigglers, steel rules. Running time: 1:52 hours.
Vises: Accessories

3070 Soft Jaws, 3” Vise
- Aluminum soft jaws fit 3” vises
- Magnets hold jaws firmly in place
- Magnets are removable for easy cleaning
- V-groove for round objects
- Includes two aluminum jaws
- 3” hardened aluminum soft vise jaws designed to protect work from scratching. Mount onto a 3 inch vise with magnets which can be removed for cleaning. The jaws have a 120 degree horizontal V-groove for round objects, and a vertical groove for marking out and center punching. Set includes two hardened aluminum jaws.

3443 Soft Jaws, 4” Vise
- Aluminum soft jaws fit 4” vises
- Magnets hold jaws firmly in place
- Magnets are removable for easy cleaning
- V-groove for round objects
- Vertical groove for marking out
- 3” aluminum soft vise jaws designed to protect work from scratching. Mount onto a 3 inch vise with magnets which can be removed for cleaning. The jaws have a 120 degree horizontal V-groove for round objects, and a vertical groove for marking out and center punching. Set includes two hardened aluminum jaws.

SwarfRat Videos
SwarfRat provides the hobby machinist with top-notch instruction that is both easy to understand and enjoyable to watch. They take the subject of metalworking and break it down into easily understood lessons: lessons that are chock-full of on-camera demonstrations, on-screen charts, animations, and 3-D computer simulations, all designed to make sure you can visualize and understand the concepts and techniques. Our lesson format is good for those of you who have some experience too; you can pick just the topics you need a little help with. Visit our Web site for a full description of these videos.

Vises: Milling Vises

2045 Swivel Base, 3” Precision Milling, Heavy
- $29.95
- Detachable swivel base features easy to read divisions
- Ground top and bottom

2239 Swivel Base, 4” Precision Milling, Heavy
- $36.95

1647 Vise, 3” Milling
- $64.95
- Jaw Width 3.15” (80.0 mm)
- Jaw Depth 1.18” (30.0 mm)
- Swivel Base
- Maximum Jaw Opening 2.56” (65.0 mm)

2500 Vise, 3” Precision Milling
- $99.95
- Detachable swivel base
- 360 degree rotation
- Ground and hardened jaws
- Jaw Width 3.15” (80.0 mm)
- Jaw Depth 0.93” (23.5 mm)

2024 Vise, 3” Precision Milling, Heavy, No Swivel Base
- $104.95
- Precision 3” Kurt-style milling machine vise
- No swivel base
- Hardened replaceable jaws
- The top, bottom of vise bed, gib, jaws, swivel base, and all plate mounting surfaces are ground. 3” Kurt-style milling vise. Top, gib, jaws, bottom of vise bed and all plate mounting surfaces are ground. The angle tight positive lock style jaws are hardened and ground, and can be mounted on either end of the fixed and movable jaw providing a wide range of clamping distances. Overall length is 10.85” and the height is 3.05”. Jaws are 3.15” wide, 1.04” deep, open 3”, and are perpendicular to the ways within 0.002” in 4”. The ways are parallel to the base within 0.0006” in 4”.

2066 Soft Jaws, 3” Vise, Prism Face
- $7.02
- Aluminum soft jaws fit 3” vises
- Magnets hold jaws firmly in place
- Magnets are removable for easy cleaning
- V-groove for round objects

2068 Soft Jaws, 3” Vise, Rubber Face
- $9.00
- Aluminum soft jaws fit 3” vises
- Synthetic rubber cover
- Magnets hold jaws firmly in place
- Magnets are removable for easy cleaning
- Includes two aluminum jaws

2069 Soft Jaws, 4” Vise, Rubber Face
- $9.60
- Aluminum soft jaws fit 4” vises
- Synthetic rubber cover
- Magnets hold jaws firmly in place
- Magnets are removable for easy cleaning

See the vise comparison chart at www.littlemachineshop.com/vise.
Vises: Milling Vises

1699 Vise, 3" Precision Milling, Heavy, with Swivel Base
- Precision 3" Kurt-style milling machine vise
- Detachable swivel base features easy to read divisions
- Hardened replaceable jaws
- The top, bottom of vise bed, gib, jaws, swivel base, and all plate mounting surfaces are ground

Precision Milling Machine Vise: 3" Kurt-style milling vice with detachable 360° swivel base and easy to read divisions. Top, gib, jaws, swivel base, bottom of vise bed and all plate mounting surfaces are ground. The angle tight positive lock style jaws are interchangeable with industry standard machine mounting surfaces are ground. The replaceable jaws can be swivel base, and all plate mounting surfaces are ground. Overall length is 10.85" and the height is 3.05" without base, and 4.21" with base. Jaws are 3.15" wide, 1.04" deep, open 3", and are perpendicular to the ways within 0.002" in 4". The ways are parallel to the base within 0.0006" in 4" without the swivel.

- Jaw depth 1.5"

- Jaws, 3" Precision Milling Vise
- Jaws, 4" Precision Milling Vise
- Soft Jaws, 3" Vise
- Vise Mounting Kit, 1/2" T-Slot
- Vise Mounting Kit, 3/8" T-Slot
- Vise Mounting Kit, 7/16" T-Slot

1879 Vise, 4" Precision Milling, Heavy, No Swivel Base
- 4" Jaw opening
- Hardened and precision ground parallel and square within 0.0004"
- Vertical angle can be adjusted with fine adjustment knob
- Vise revolves 360° horizontally with 3' engraved graduations and 45° vertical with 3' engraved graduations
- Hex wrench included for locking vise at any position
- Vise, 3" Screwless
- Vise, 1.5" Screwless
- Vise, 1" Screwless, Square Jaws
- Vise, 1" Screwless, Built-in Parallels
- Vise, 1" Screwless, Square Jaws
- Vise, 3" Screwless plus Parallels and Mounting Clamps
- Vise, 3" Screwless with Clamping Slots
- Vise, 3" Screwless with Hold Down Clamps

Vises: Other Vises

4140 Vise, 2.5" Drill Press
- Cast iron construction
- Vertical and horizontal V-grooves in fixed jaw
- 2.5" jaw opening
- 2.5" jaw width
- 1.5" jaw depth

With this quick-slide vise for your drill press, you slide the jaws against your workpiece and lock it into place with the lever for a secure hold. The 1/2-inch slot allows the vise to be mounted to nearly any machine table using common T-slot clamps. Made of high grade stress-relieved iron casting.

3643 Vise, 3.5" Tilting, 0-90 Degree
- Full 90° horizontal to vertical adjustment
- Multiple bolt slots in base for easy mounting
- Angle dial on one side and locking knob on opposite side
- Made from strong cast iron
- Has a rail for secure angle adjustments

The jaws are 3.5" wide, 1.25" deep, and open to 3.25" capacity. The front and rear slots are 0.5" wide. The corner slots are 0.4" wide.

Vises: Screwless Vises

1590 Vise, 3" Screwless
- Hardened and Precision Ground
- Square and Parallel within 0.0002"
- Ground "V" Way

This high precision toolmakers screwless vise has a one-piece body. The body and jaws are hardened to Rc 58-62. All sides are flat, square and parallel to 0.0002". There are horizontal and vertical vees on the inside face of the movable jaw to hold round objects. The jaws are 1.38" deep and open to 3.78" capacity. The vise is 7.28" long, 2.76" tall and 2.875" wide.

2675 Clamps, Screwless Vise
- 3142 Vise, 1" Screwless, Built-in Parallels
- 3949 Vise, 1" Screwless, Square Jaws
- 3950 Vise, 1.5" Screwless
- 1591 Vise, 2" Screwless
- 3769 Vise, 2" Screwless with 3" Thin Parallels
- 3763 Vise, 3" Screwless plus Parallels and Mounting Clamps
- 2356 Vise, 3" Screwless with Clamping Slots
- 3767 Vise, 3" Screwless with Hold Down Clamps
Vises: Screwless Vises

1756 Vise, 3" Screwless Sine $142.95
- Sine range: 0-60°
- Hardened and precision ground
- Tolerance of .0004" center to center
- Jaw can be opened or closed without unbolting from work surface

3" Precision screwless sine vise. Jaw width is 2.9" (73 mm), jaw depth is 1.4" (35 mm), jaw opening is 4" (100 mm). The base size is 7" x 2.9" (190 mm x 73 mm). The center distance of the cylinders is 100.00 mm. Hardened and precision ground to a tolerance of .0004" for both parallelism and squareness. Sine range: 0 - 60°. Jaw can be opened or closed without unbolting vise from work surface.

1757 Space Block Set $74.95
4216 Vise, 3" Sine Screwless & Space Block Set $196.95

4871 Vise, 3" Screwless with Clamping Slots - BLEM $102.95
- These vises have blemishes--cosmetic defects but function normally

This high precision toolmakers screwless vise has a one-piece body. The body and jaws are hardened to Rc 58-62. All sides are flat, square and parallel to .0002". There are horizontal and vertical vees on the inside face of the movable jaw to hold round objects.

This screwless vise has slots along the sides so you can clamp it to the mill table with a clamping kit.

The jaws are 1.357" deep and open to 3.94" capacity.

The vise is 7.72" long, 2.76" tall and 2.875" wide.

3583 Z-Clamp $6.73
